JAUREZ PREPARING TO RESIST MADERO

Border City Believed Real Aim of Rebels.

El Paso, Tex., April 10.—Information received in Juarez today is that the entire Maderista army, which has been "besieging" Chihuahua for a month and which moved west on Saturday night toward Madera, has again turned north, with Juarez as the objective point. Juarez for defense has about 70 soldiers, two machine guns, and two machine gunners. The Mexicans call them. The Mexican Northwestern Railroad is now operating south to Juarez, and it is only a short march north of Madera, and it is now believed that Juarez, without molestation within a very few hours.

People in Juarez can see no other meaning to Maderista's actions, if that is not his purpose. If he comes to Juarez they can see why he has been spending six weeks marching to Chihuahua and surrounding it, only to pull up stakes and leave it. He was drawing the federal army into that region so that he might make a hurried return to Juarez and take it and have a port of entry. He has often said he wanted to take Juarez. The junta has always talked mysteriously about Juarez, and it is now believed that he has intention to take it. If not, the Maderista campaign is beyond explanation of strategists.

An army officer said today that if Madero was really making for Juarez, his generalship in the past six weeks had been splendid.

ARIZONA IS URGED TO VOTE ON RECALL

Taft Wants Free Expression on Judiciary Provision.

As a solution of the difficulty raised by the recall of the judiciary provision in the Arizona constitution, which is now known to be the only hindrance to its approval, President Taft yesterday suggested to Representative Flood, of Virginia, chairman of the House Committee on Territories, that this clause be resubmitted to the people of Arizona for a separate vote.

It is the plan of the President for Congress to eliminate from the constitution that part of the recall relating to the judiciary. The constitution would then, the President believes, find little difficulty in obtaining the approval of Congress. This would give Arizona the complete right of Statehood, without the delay that is inevitable because of this recall provision.

It could then be arranged for a vote to be taken by the people of Arizona on this clause of their constitution. If they showed by their ballot that they wished it, they would probably have much less trouble than at the present time, when their desire for it is at least doubtful, to have it approved by Congress and the President.

The President argues that for the people of Arizona to have defeated the recall provision would have meant a defeat of the entire constitution, and their vote could hardly be considered a fair test of their attitude toward the recall of the judiciary. It is a matter of such great importance, he thinks, that it should be segregated from the rest of the constitution and submitted to a separate vote, so that there could not be the slightest doubt of its having been approved simply because of its inclusion with the constitution.

PHILLIPS ACCUSED OF AIDING REBELS

Continued from Page One.

put expert detectives on his trail and discovered the alleged false pretenses. It is the first arrest of the kind that has occurred in the National Capital for years. Although the neutrality laws have been an intelligence in the laws protecting life and property have been disrupted, and in case Phillips is found guilty by the courts he will suffer a heavy penalty.

Among the revolutionary agents stationed in Washington the opinion seems to prevail that Phillips will not be convicted. They say he has so surrounded himself with loop-holes of escape, that no jury will find him otherwise than innocent.

Whether the ammunition was consigned direct to the insurgent forces was not learned last night. It is certain, however, that dozens of their allies are stationed in El Paso, Tex., and that while the cartridges were sent there, they were meant for the fighting men who are in the field. It was learned on the best authority that the shells were adaptable to the old United States Springfield rifle, and which have been sent in large quantities to Mexico for service against the federal government.

Shipped from New York.

The war material was shipped from New York on January 25, according to Judge Taylor. The warrant for the arrest of Phillips was issued in New York on or about February 27. For days the Department of Justice secret agents scoured that city in search of the alleged offender, finally discovering he had come to Washington on another mission entirely removed from the present trouble.

The case was turned over to the Washington police department, with the result that Phillips' arrest followed almost immediately. After being taken into custody, the Department of Justice was notified, and Inspector Marshall was quickly dispatched to get the man. Detective Howlett, acting on instructions from Maj. Sylvester, delivered his charge over to the deputy, who in turn took him to the United States commissary.

Phillips refused to make a statement, other than saying he was not guilty of the charges against him. The explanations were made to Judge Taylor by Phillips' attorney, Henry L. Davis, who would not talk of the affair.

Judge Taylor said last night that Phillips had taken his arrest on a serious charge without complaint. He seemed to be perfectly assured he would be acquitted.

It will be remembered that it was Phillips who warned the agents of the revolutionists in Washington, that D. D. Hallen, known to the Washington police as a man of many aliases, intended stealing valuable papers from the offices of Hopkins & Co. in the Hibernia Building. Washington counsel for the entire revolutionary forces of Mexico. His timely telegram to Mr. Hopkins is said to have been the only protection the federal government's agents had against the capture of the Central office men and warned to leave the capital within twenty-four hours, as his presence was a detriment to the city. Great excitement was occasioned in the city, and the federal government's agents referred to was formerly a portion of the right of way of the Baltimore and Ohio Railroad.

The most important of a number of bills introduced yesterday by Senator Gallinger provides for the extension of the Morrill land act to the District of Columbia and names George Washington University as the beneficiary. The bill is the same, generally speaking, as the measure introduced last year. It provides that the act donating public lands to the several States and Territories which possess colleges for the benefit of agriculture and mechanic arts, shall be amended so as to include the District of Columbia within its terms. The George Washington University is designated to receive the appropriations. As ex officio members of the board of trustees of George Washington University are Senator Gallinger, Secretary of Agriculture, the Secretary of Labor, and the Commissioner of Education.

New System to Designate Land.

A bill providing for a new system of designating land on the plats in the office of the District assessor was also introduced by Senator Gallinger. The District Commissioners have recommended this legislation with a view to simplifying the records of the office, preventing errors of location of improvements in assessing property for taxes, doing away with the present complicated system of the annual advertised tax-sale list, enabling the taxpayer to identify his property from the face of his tax bill without recourse to other records and the consequent reduction of the liability to error in many respects.

Senator Gallinger also introduced bills to confirm the name of Commodore Barney Circle for the circle located at the eastern end of Pennsylvania avenue southeast; to change the name of Fort place, from Seventeenth to Eighteenth streets northeast, to Irving street.

Wants Statue to Mendie.

Mr. Moore, of Pennsylvania, yesterday introduced a bill appropriating \$100,000 for the erection of a foundation and pedestal on ground belonging to the United States in the city of Washington upon which to place a statue, to be furnished by the State of Pennsylvania, of Maj. George Gordon Meade. The State of Pennsylvania is to expend \$20,000 for the statue.

Representative Dickinson, of Missouri, introduced a bill amending existing law relative to the sale of intoxicants to minors, in such manner as to provide that a liquor dealer who sells or gives intoxicants to any person under twenty-one years of age, "knowingly" or not, shall be subject to a fine of \$25 or imprisonment for thirty days, or both, and in addition to such penalty the license for the place in which sale or gift to a minor occurs shall be revoked.

Salvation Army Head Is 82.

London, April 10.—Gen. Booth, head of the Salvation Army, celebrated his eighty-second birthday to-night by addressing a huge meeting of his followers for an hour. He said he hoped after his coming tour through the United States and Canada to have a cataract operation in the fall, and that he would then be young again.

Man of Education.

He is thirty-two years of age, and a man of education and refinement. It is said he has the confidence of some of the highest government officials, and in the days when he was connected with the Secret Service was regarded as the most valuable man in the entire force.

It was learned from a confidential revolutionary leader, last night, that the Department of Justice has been after Phillips for months. He has eluded and fooled them time after time. It was stated, yesterday, that the department was in what seems to be a violation of the law.

That Washington is a hotbed of revolutionists seems to be an established fact. Ammunition is bought through Washington agents, and shipped to either Mexico or Texas for use in the armies of the insurgents. It is alleged, here the heads of this government are kept in constant surveillance by the agents, and nothing happens that is not reported to the Mexican authorities.

Names Sent to Senate.

The President sent to the Senate yesterday the following nominations for the Secretary of the Interior—Walter L. Fisher, of Illinois.

To be assistant director of the thirteenth century monument—R. P. Falkner, of the District of Columbia.

To be a member of the California debris commission—Maj. Sherwood A. Chene, Corps of Engineers.

Women Fly with Jannus to Fifty-Foot Elevation

Two Washington society girls flew over Potomac Park in an aeroplane yesterday with Antony Jannus, operator of the Rex Smith biplane. The flights were of about two minutes duration, covering over two miles at a height of about fifty feet.

The girls who made the flights are Miss Helen Walcott, daughter of Charles D. Walcott, secretary of the Smithsonian Institution, and Senora Rivero, daughter of the Cuban Minister to the United States. Both expressed the greatest enthusiasm over their trip in the air. Miss Walcott said that aeroplanes was de-

\$2.00
Heatherbloom
Petticoats

\$1.29

It's been several weeks since we were able to offer Genuine Heatherbloom Petticoats at this price; and only after a diligent search did we locate these. There are only 200 in the lot, and we got them considerably under price. (Black only.) All lengths, 38 to 42, and are worth \$2.00. Special today. \$1.29

WEST VIRGINIA AS NAME FOR AVENUE

Bill Introduced in the Senate to Honor State.

MORRILL LAND ACT AGAIN

Senator Gallinger Asks that the Measure Be Extended to Apply to the District and that George Washington University Be Designated to Receive Appropriation.

Through one of the Senators from Florida, the State of West Virginia may yet attain the honor of being sponsor for a street in Washington. A bill introduced by Senator Fletcher yesterday orders a "West Virginia avenue" to be constructed out of a strip of land extending in a northeasterly direction from the intersection of Sixth and I streets northeast to Florida avenue. The strip referred to was formerly a portion of the right of way of the Baltimore and Ohio Railroad.

The most important of a number of bills introduced yesterday by Senator Gallinger provides for the extension of the Morrill land act to the District of Columbia and names George Washington University as the beneficiary. The bill is the same, generally speaking, as the measure introduced last year. It provides that the act donating public lands to the several States and Territories which possess colleges for the benefit of agriculture and mechanic arts, shall be amended so as to include the District of Columbia within its terms. The George Washington University is designated to receive the appropriations. As ex officio members of the board of trustees of George Washington University are Senator Gallinger, Secretary of Agriculture, the Secretary of Labor, and the Commissioner of Education.

New System to Designate Land.

RELIGION CAUSE OF BROKEN TROTH

Reason Why Miss May Will Not Wed Mr. Bacon.

It was learned yesterday that the cause of the breaking of the engagement of Miss Cecilia May, younger daughter of Col. Henry May, and Mr. Robert Bacon, son of the United States Ambassador to France, was due to religious differences. Although it was known that there had been a barrier in the way of the marriage, that had been overcome in the dispensation granted by Cardinal Gibbons, and all seemed as merry as a marriage bell, until the startling announcement that the marriage had been put off until the late summer, and that Ambassador and Mrs. Bacon had sailed for their return trip to France after a hurried visit to Washington, where they were the house guests of the Secretary of the Navy and Mrs. Meyer.

It is believed that the young people will settle the trouble and the marriage will, eventually take place. They are greatly devoted to each other, and have been familiar figures on the uptown streets in their daily walks, which were frequent. Walking is the favorite exercise of both, and it is said that most of Mr. Bacon's courting was done during these walks. Miss May was a debutante of two seasons ago, and was one of the bridesmaids at the marriage of the young Countess von Bernstorff to Count Pourtales last month. Mr. Bacon is a graduate of Harvard, class of 1907, and was appointed to a position in the State Department early in the year, with a view to entering the diplomatic service.

LABORATORY GIVEN CITY BY STRAUS

Pasteurized Milk Station to Be Owned by People.

After visiting the different city stations yesterday afternoon, Nathan Straus, the founder of the pasteurized milk laboratory in Washington, was greatly pleased with the interest shown by the mothers who brought their children to the stations.

A bill asking the District Commissioners to accept the laboratory as a gift has been introduced in the Senate by Senator Gallinger.

"Now, it is only to wait the action of the government to take the matter in hand, and when this is done the death rate among the children will decrease probably as much as 50 per cent," said Mr. Straus. "Less than one-half of the number of children have died since the milk was introduced in New York."

"No way could the American Public Health Association have so many mothers from bitter grief and loss of their little ones as by hastening the time when efficient pasteurization will be the rule, which the milk carrying disease will be as rare as the plagues that medical science has practically abolished."

Mr. Straus will go to his home in New York City today to await the action of the government.

DAMAGED BY WATER.

O'Donnell's Drug Store Stock Suffered from a Blaze.

Fire, which caused a blockade of traffic in F street for about an hour about 11 o'clock last night, did \$2,000 damage to the stocks of James O'Donnell, druggist, at 304 F street northwest.

Persons at the soda fountain noticed smoke coming from the second floor, and a clerk turned in an alarm. In a few minutes several chemical and engine companies responded and extinguished the blaze. Most of the damage was done by water. The cause of the fire was not learned.

BUREAU FOR CLERKS.

Headquarters Established in the Colorado Building.

Temporary offices were obtained in the Colorado Building yesterday for the promotion bureau which will be run in connection with the plan inaugurated by P. C. Chase to raise the salaries of the department employees. The office is located in room 701, and will be under the direction of Senator Dick.

The office will be opened in a few days, and the campaign for better salaries begun in earnest. Up to date \$14,550 has been raised by subscription.

WEATHER CONDITIONS.

U. S. Dept. of Agriculture, Weather Bureau.

Washington, Monday, April 10, 1911, 8 p. m.

During the last twenty-four hours the weather was fair and cool, with a light breeze from the west. The temperature was 60° at Washington, D. C., and 65° at New York, N. Y., and 70° at Philadelphia, Pa., and 75° at Baltimore, Md., and 80° at New Orleans, La., and 85° at San Francisco, Cal., and 90° at Los Angeles, Cal., and 95° at Honolulu, Hawaii.
