movement, using her influence to
promote equal rights and opportunities
for women.

BIG EATERS GET
KIDNEY TROUBLE

Take a Glass of Sake Before Break-
fast if You Back Huts or
Believe You Do.

The American man and women
who eat big meals are more likely
to suffer from kidney trouble,
according to a study published in
a recent medical journal.

The study found that people who
consume a high volume of food
are at a greater risk of developing
kidney problems.

The researchers believe that
the large amounts of food
consumed can lead to an
overload of waste products in
the body, which can put
stress on the kidneys.

They recommend that people
who are prone to kidney
trouble limit their
intake of large meals.
