TELEGRAMS, &c.

Yesterday morning, an officer of the twentythird precinct police in New York arrested Thomas Healey, on the charge of being the person who murdered Col. O'Brien in Second avenue, during the memorable riots of July, 1963. The officers claim to have in their possession strong evidence identifying the prisoner as the perpetrator of the deed. Healy

will be brought up for examination to day. Yesterday, an accident resulting in the drowning of two boys, occurred at Saratoga Springs. The lads-one named Henry Hulin, aged about 12 years, son of Emmett Hulin, and Charles Hunt, aged about 8 years, son of Geo. Hunt, hatter, went down to the mill pond, two miles south of the village, and went in to bathe. By some means both were drowned.

A boat, containing a sailing party on Piscataqua river, N. H., upset Sunday afternoon, drowning Michael Couss, a resident of Newmarket, and a young lady, name not given. Six others in the boat were rescued. A young freedman, named Frank Smith, has

applied to the Secretary of War for a cadetship at West Point, from the first congressional district of South Carolina.

A general closing of the bar rooms Charleston, S. C., was enforced yesterday. No drinks are obtainable, except at the hotels. The Kentucky tobacco fair was held in Louisville yesterday.

FROM MEXICO.

The Execution of Maximilian. We have received the following particulars of the execution of Maximilian :-- The trial of Maximilian, Mejia and Miramon ended on the 14th, and they were sentenced to be executed on the 16th of June. Juarez saspended the execution three days, and they were shot at 11 a. m. on the 19th ult. The colonels are sentenced to six years, and the minor officers were sentenced to two years imprisonment. Brigadiers and exceptional officers are to be tried by court-martial. The City of Mexico surrendered to Diaz on the 21st. Juarez sent him a congratulatory note, with directions regulating the disposition of prisoners, saying:—"The native prisoners you will transfer to your own command, or put at liberty, according to the circumstances in which you find them. Foreign prisoners will be retained for further disposition by the Government. Among the archives taken upon the occupation of Queretaro were the same documents relative to the last will of Maximilian, wherein, in case of his death, Feodosco Learez, Jose Maria Larcunezo and Marquez, the assassin

to Tacubuya, are declared regents. General Escobedo Writes from Queretaro as follows: "I have, by the execution of three master traitors, made terror the order of the day everywhere. I have imposed large con-Tibutions on the rich, confiscated their property and all. Where I could not do it in person my delegates have strictly complied with my orders. I hope, before the close of my military career, to see the blood of every foreigner spilt that resides in my country." It is reported that Maximilian was shot in

the face and the Mexican generals in the backs, as traitors. Both the Liberal and Imperial papers in Brownsville condemn the execution. The Ranchero is in mourning. Beriozabal. Governor of Matamoros, had all the beils rung and rockets fired on the receipt of the news of the execution, and sent official information to General Reynolds. The Monterey stage was robbed of eleven thousand dollars in coin.

A Galveston despatch says a Monterey letter, written previous to the execution of Maximilian, states that the Emperor was stripped entirely naked, and that General Escobedo presented him with a shirt to cover his nakedness.

The Indiana

The Denver papers publishs despatch from dian matters, in which he says:-- We must not remain on the defensive but follow them up, and attack them on all possible occasions. We must clean out all the Indians between the Platte and Arkansas, and move against the hostile tribes in force beyond these rivers. An Omaha despatch says that Colonel Patrick, the agent for the northern Cheyennes, Arrapahoes, Agulallahs and Sionx, has just returned from the North Platte where he met "Spotted Tail," "Swift Bear" and other several chiets in council, with a view of gathering all the peaceable Indians at one point, to be subsisted by the Government. About 1,100 Indians were represented, and are now camped near the North Platte. They profess friendship, and agree to remain in camp subject to the Government during the present hostilities. "Big Mouth," with his band, Agulallahs, "Pawnee Killer," with fifty lodges and other bands, including "Red Cap" and "Dog Hand," who, with their bands, participated in the Fort Phil. Kearney massacre, are all moving to join this camp, which will number about 4,000. ColonelPatrick thinks that the arrangements will be carried out in good faith, but that the public must not be misled. He said 'Red Cloth." the greatest Sioux chief, and all the Chevennes on the Smoky Hill route, are clamorous for war, so that hopes for an early peace cannot be indulged in.

From Russia.

ST. PETERSBURG, July 1.—The Emperor of Russia entered the capital at noon, and met with a warm reception by his subjects. There was an immense popular demonstration, and the streets were crowded, but there was no military display. At one o'clock the Czar attended a Te Deum at the Kazan Church, which was filled with the highest dignitaries of the Empire, the members of the diplomatic corps, the officers of the army and navy, and the city functionaries. He afterwards received the congratulations of the diplomatic corps at the Winter Palace. Senator Doolittle was pre-

TRAGEDY IN A COAL MINE.—The Journal de Liege says that the men engaged in reopening and repairing the works of the coal mine of Bow Buveur at Jemeppe, after reaching a depth of nearly 160 metres, have, at the end of four months, come upon a gallery communicating with the lower ladders. There they discovered seven bodies of the unfortunate workmen who were there imprisoned while making their way to the surface. The bodies are completely mummified, the shriveled flesh adhering to the bones. This phenomenon is attributed to the abundant exhalations of carbonic acid gas. The bodies lay on their backs, one after the other, the hands being crossed under the head. Two were found locked in a close embrace. No satisfactory conclusion has as yet been arrived at as to the cause of the death of these men, whether frem the inhalation of carbonic acid or from want of food, being thus entombed. The gallery was unsafe at the time the discovery was made, but care is being taken to ventilate it, and to bear away the bodies safely. The work of reparation is yet likely to be tedious, for much injury has been done, and the work requires to be set about with great caution.

HORRIBLE CASE OF INFANTICIDE .- On Satnrday. Catharine Garvin, a widow woman, thirty-eight years of age, deliberately murdered hernew-born babe. She gave birth to the child in an out-house connected with the dwelling of her brether, in Troy. N. Y., and then threw it down the vanit. To stifle its cries, which were heard by the neighbors, she poured a pail of water down upon the babe, and thus succeeded in strangling it. The dead body of the child was discovered shortly afterward, and was removed from the vault. Upon looking for the woman she had fied, but was subsequently found at a house some distance from the scene of the murder, and was arrested. Sne is now in the hospital, where her condition is said to be quite critical.

In the case of the United States vs. Vickers, &c , guerrillas who robbed negroes in Nelson county, Kentucky, on trial in Louisville last week, there was no evidence save negro testimony. This was admitted under the Civil Rights law, because denied by State iaw. The parties were convicted. A motion in arrest of judgement was made and argued before Justice Swayne and District Judge Ballard, because it was alleged, first, that the Civil Rights law is unconstitutional; second, that it has no applicability to criminal cases, and hence the United States court has no jurisdiction in the case at the bar.

A HIST FOR THE WARM WEATHER .- WORKmen, predestrians and others whose vocations necessitate anything like exposure to the sun while the thermometer is up among the ninecase of sun-stroke and general prostration from the effects of heat has been prevented by keeping wet green leaves in the crown of the hat. If leaves are not attainable, a pocket handker-chief, saturated with water and placed in the hat or cap, will be found to be beneficial in warding on the attacks of the sun.

SCOTLAND.—The great question of union be-tween the United Presbyterians and the Free Presbyterian Church of Scotland, was decided affirmatively in the General Assembly of the Free Church May 31st, by a vote of 316 to 102. The United Church had voted several weeks before in favor of the measure, 300 to 50. It is remarked that the 31st of May was the anniversary of Rev. Dr. Chalmers's death, just twenty years before.

The case of Horr vs. Van Vranikin (on trial at Vatertown,) an action against a conductor of the Keme, Watertown and Ogdensburg Railread, for putting the plaintiff off the cars on the charge that he had no ticket, the jury rendered a verdict of \$500 against the conductor. The plaintiff preved that he had purchased a ticket and previously delivered it to Van Vraukin the conductor.

THE WORKING PROPER.-The Albany Work. The Working Proper.—The Albany Workingmen's Convention, on Friday adjourned
mutil the fourth Tuesday of January next.
The only proceedings of importance on that
day were the appointment of committees to
represent the workingmen before the New

Chapter to the second stagest AND THE PARTY OF A CO. A. CO. A. CO.

A Curious Affair. 19 REV. MR. MEERILL DEOWNED. [From the Albany Argus.]

It will be remembered that a few weeks ago this name was mixed up with that of a young lady, who, it was asserted, had come on from a New England village to meet Mr. Merrill in Troy. It was stated then in the Troy papers that an elopement had been planned by the parties, but that the whole thing had been frustrated through the discovery of the girl's friends. Nothing more was heard of the friends. Nothing more was heard of the Rev. Mr. Merrill until the startling announcement that he had been accidentally drowned in the Saranac river, leaving a wife and nine

It is said that once before he arranged a plan so that it would be reported that he had been drowned in Lake Champlain. This was at the time he had arranged to meet the young lady at Troy. He left home with the understanding that he was going West to visit his grand-mother—had his trunk taken to his state-room on the steamer, and was particular to have his name entered in full upon the passenger list. In the morning the gentleman was not to be found. He had steatthily left the boat at the Burling'on landing, about three o'clock in the morning, but learning that the flight of the young lady had been intercepted, he invented reasons for giving up his visit to his grand-

However, his guilt or innocence was to depend upon his future conduct. It was believed that he continued to hold intercourse with the young lady, and it was said her parents were sbout to commence a suit against Merrilt for attempting to abduct her, or for a worse crime. It appears that Merrill had secured an insurance on his life, in an accident insurance company, for six thousand dollars. This was to expire on Thursday noon. On Wednesday he drew two hundred dollars on his salary, and towards evening took two of his own beys and another boy of the village of Platts-burg, and went out fishing on the Saranac river. If his insurance was available, his time was somewhat short, and the drowning must be accomplished on the river, or his plans would avail nothing. When it became dark, and while pulling in the boat anchor, he snddenly went overboard. The water was shallow, and there was no current, but instead of coming toward the boat in which were his affrighted boys, he went away from them as rapidly as possible. They pushed the boat after him; but he told them to never mind, he was well enough; and the last seen of him he was away under the river bridge, and disappeared in the darkness.

Pugilistic. The roughs and rowdies of this and neighboring cities have lately made a practice of desecrating each consecutive Sabbath, by witnessing and assisting at rough and tumble encounters in the environs of Manhattan Island, with but very little interruption from the local authorities. A brutal exhibition of this kind occurred between Saugerties and Malden on Saturday morning, the participants being two fellows named Edward Weldon and Johnny Malone for the sum of \$200 a side. The fight, after lasting thirty-eight rounds, was declared draw, one of the rowdies having given the ther a foul blow. Another fight occurred on the same day at a prace near Jamaica Bay, on Long Island, between another Malone and a man named Parsy Eagan, for \$200 a side. The fight lasted nineteen rounds, and after both men had been beaten to the consistency of farina jelly, the sponge was thrown in the air by their several seconds, as neither of the gladiators could respond to the call of time. Barney Aaron, the victor in the late fight for the championship of the light weights, has been challenged by his late antagonist to fight the battle over again for any sum from \$1,000 to \$5,100 a side, at 128 pounds weight. Aaron declares his willingness to fight Collyer at 120 pounds weight, but Collyer is determined to make his fight at his weight, or give up his title of champion. A fight occurred at Hudson Oity on Friday last between two men named McManus and Powers, which lasted 53 which time 22 rounds were fought. The fight between Elliott and Gatlagher has been declared off, Gallagher having

paid the forfeit of \$500. Between 4 and 5 o'clock yesterday morning. a couple of Brooklyn pugilists named John Feeley and Billy Sullivan, accompanied by about 100 roughs, mostly from New York, assembled on some vacant lot in Conover street. South Brooklyn, for the purpose of engaging in a prize light. A ring was pitched, seconds chosen, a reteree and bottle-holder appointed, and Feeley had made his appearance in the arena. Just as the "sport" was about to begin a squad of police from the Forty-second Preciact appeared in view, and the roughs withdrew in precipitate baste. No arrests were made. - N. Y. Tribune, July 1st.

BLACKBERRY WINE .- There is no wine equal o the blackberry wine, when properly made. either in flavor or for medicinal purposes, and all persons who can conveniently do so should manufacture enough for their own use every year, as it is invaluable in sickness as a tonic, and nothing is a better remedy for bowel dis. eases. We therefore give the receipt for making it, having tried it ourselves, we speak advisedly on the subject.

Measure your berries and bruise them; to every gallon adding one quart of boiling water. Let the mixture stand twenty-four hours, stirring occasionally; then strain off the liquor into a task, to every gallon adding two pounds of sugar, cork tight, and let it stand till the following October, and you will have wine ready for use, without further straining or boiling, that will make the lips smack as they never smacked under similar influence before. Lynchburg News.

NEW WAY OF PRESERVING MILK .- Gav-Lussac has proved that milk kept from the air is preserved for a long time perfectly good. Profiting by this experience, says the London Mechanics' Magazine, Mr. Mabrun warms milk in a moderate temperature in a tin vessel, furnished with a tube of lead, to expel the air; hen the tube is compressed and the orifice is closed with solder. When the milk is used at the end of several months it will be found desirable to stir up with it the cream which is formed on the upper part of the liquid M. Mabrun, having laid this process before the Academy of Sciences for their examination, the committee report that milk thus preserved after six months still possesses all the properties of fresh milk. A prize of fifteen hundred francs has been awarded to M. Mabrun.

SUSPECTED DEATH BY POISONING .- Prof. Mosher, of this city, has for some time past been engaged in a chemical analysis of the stomach of David Nickerson, of Broome, Schoharie county, a young man aged nineteen years, who died very suddenly, under peculiar circumstances, on the 5th of March last. Prof. M. testifies that he found cantharides enough to blister, and that his opinion was that death had been caused by the poison. It is alleged that the deceased and another young man, who has since disappeared, were both paying attention to the same young woman, and it is believed that the Italian method of disposing of a rival has been resorted to in this instance.- Albany Evening Journal.

REGARDING HATS .- The sacred "stove-pipe" is in danger. It is about to be abolished, su-perseded. The works proceeds by degrees, and consists in gradually lowering the crown and widening the brim until it becomes a "low, stiff sombrero of silk-covered cardbeard, with soft interior edges." It will be light because it will be little. It will furnish a grateful shade for theeyes with its broad brim. It will be easy of use in salutation, because the brim is stiff. We could wish it were less neating for the head than the superseded stove-pipe, but persons of an imaginative turn will readily persuade themselves, as hitherto, that a hat with a small spoked hole in the centre of the crown, must necessarily be well ventilated.

no end to the calamities attending the house of Hapsburg: The Archduchess Louisa has died from the effects of her burns. The hopes recently awakened of Archduchess Charlotte's recovery have been dispelled, and her physicians announce that she cannot live long. Maximilan has been shot, and our foreign files informs us that the hereditary Prince Maximilian, of Tours and Texis, has just died at Carlsbad. His wife, a sister of the Empress of Autria, had given birth to a child only a few days before.

A Plous Fraud.—A Constantinople journal says: "That the Shtik-ul-islas has issued a fetfa (religious degree,) which declares that the Sultan may go to Parie; but to reconcile that declaration with the letter of the Coran, which assigns to the ruler of the faithful whatever country he sets his feot on, recourse will be had to a certain legal fiction. In virtue of which the soil of France will be considered as ttoman Territory during the whole time that the Suitan shall abide there, but with the reservation of subsequently making a retrocession of the country to the Emperor of the French.

Upon the suffrage question, two reports were made last week by the committee that is considering the subject, to the New York Constitutional Convention. One was made by Horace Greeley, the chairman, and was signed by the majority of the committee, admitting colored men to the exercise of the elective franchise, and the other, made by the minority, recommended that the question of extending the franchise to colored men be submitted to the people to be voted on separately from the resoft the constitution.

Straightening Leaning Trees. No fruit 'ree will be so productive when the entire top and body have blown partially over as it will when in an erect position. When a tree leans, sprouts will almost start from the upper side of the body, or branches, and grow perpendicularly. By this means the largest proportions of the sap flows into the erect stems, while the horizontal part of the top receives only a limited supply of nourishment.
When it is desirable to straight in up a
lesning fruit tree, to which a chain, or rope and pulleys may be attached, and the tree straight-ened up and secured with wire extending from a stake in the ground to a strap around the main part of the tree In case a tree is large, and well rooted, let the earth be excavated on the upper side, and a few of the larger roots loosened, and the earth removed beneath them, so that the top of the tree may be brought up with ease to the desired position. The guy wires will always hold trees in position, until the roots keep the top erect. If long branches grow too erect, it is easy to wire them down to the proper position, when the wires may all be removed after one season. As a general rule, fruit trees are neglected

quite too much .- Exchange.

Arrangment of Summer Flowers. Although some of our readers will have planted out their summer bedding plants ere this number reaches them, yet many will not have done so, and even to those who have, we wish to suggest a word by which perhaps they may improve. It has been and yet is with most who group, to think of colors; but they should go one step farther, and adopt in a messure the system by which practical boquet makers give such effect to the arrangement of a few flowers, and that is, "use filling in." To this end, as we now have a large number of variegated and colored foliaged plants, we suggest their use as a filling in among the plants whose great beauty is their blooms; by this means a more satisfactory and less monotonous tone is given to the group and if then we add a few more whose beauty is in their form and grace as well as color o foliage, we shall have created a mass closely resembling, but more artistic and scarcely less graceful than nature in her wildest and most harmonious moods .- Horticulturist, for June.

The subscribers, thankful for the patronage here
tofore bestowed upon them by the citizens of Wash tofore bestowed upon them by the citizens of Washington and others, take this occasion to state that they are still prepared, and have ample facilities, to perform all orders in their line of business, and done in as expeditious, cheap and workmanlike a manner as can be done in this or the Northern cities. Their work comprises Steam Engines and Boilers, with all their appendages, either portable or stationary, for use on land or for steamboats; Circular Saw Mills, Shafting and Gearing for mills, Castings, iron or brass; Architectural or Miscellaneous Wrought Iron Work, or heavy Forgings; Boiler Iron Work, such as Water Tanks or Gasometers, and Pattern Making; in fact, all the branches of Mechanics appertaining to a first-class Foundry. They would also respectfully call the attention of the public to their "Patent Differential Beturn Tubular Boiler." This plan of Boiler, patented by them in 1862, has now been introduced and in successful operation for various purposes, and has given general and entire satisfaction as possessing every quality essential in a first-class steam generator, viz: Economy in fuel, facility for and in successful operation for various purposes, and has given general and entire satisfaction as possessing every quality essential in a first-class steam generator, viz: Economy in fuel, facility for cleaning, exemption from priming or foaming, and smallness of space occupied, as can be shown by certificates now in our possession. They have all been constructed by us at these works, and are in operation in this city and elsewhere. We will be glad to avail ourselves of the opportunity to explain its merits and show it in operation in these "Works." The following is a list of the Boilers on this plan and now in use, viz:—At Willard's Hotel, for warming building; at Metropolitan Hotel, do., do.; at John C. Rives' Globe Printing Office; at United States Hotel, warming building; at Soldier's Home, north of the city; at Lunatic Asylum, across the Eastern Branch; at U. S. Arsenal, Washington city; at U. S.
