out success. GOLD-FILLED STUDS, buttons, scarf rings, at Prigg's.

SWINDLERS AND TRAMPS.—For some time past it has been the custom of our police authorities to furnish transportation to other ci les in cases of extreme poverty, where the applicant is a worthy object of charity and is properly vouched for by persons well known to the authorities. This system has been adopted on the score of economy, it being thought cheaper to pay for a railroad ticket and start the applicants on their way than to maintain them in idleness in the poorhouse or jail. In most cases, as a precautionary measure against imposition, Connell, the sanitary officer at police headquarters, goes to the railroad depot with the parties and gives the ticket to the conductor. On Friday a white man, giving his name as George Leffier, about 32 years applied for a ticket to Philadelphia, bringing with him a recommendation from an official in the Treasury department well known to Major Brock. he told a pitiful tale about his misfortunes and poverty, and the major knowing the party well who recommended him directed Officer Connell to procure transportation for him to Baltimore. thinking this would give him a good start on his way and that the Baltimore authorities might aid him in like manner. The ticket was procured and in place of going with the man Connell trusted him with it. Very soon afterwards Connell had occasion to go into the office United States as a resort.

Rock Enon (Va.) springs and baths will open

June 1st. The terms at this deligntful resort

for sai Connell, who happened to be standing

near, rec. gpized the ticket as the one he had furnished to Leffler. The ticket was sold to the scalper for fifty cents and the tramp left, followed by Connell, who saw him connect with Leffler at the foot of Capitol Hill and divide the money. In a twinkling the officer had Leffler by the collar and marched him to headquarters, and the day following he was taken to the Police Court on the charge of vagrancy and Judge

Snell sent him down for thirty days, LADIES' TRIMMED HATS from \$2 up at Samstag's, 720 7th; also, 50 more doz. soft Fayal hats, white and black, 50 cts.-Adv.

The several sections were distinguished by their colors. The divisions were headed by Misses Gorman, Buck and Dewning, representing respectively the joyful, sorrowful and glorious mysteries of the rosary. Miss Kate Wade led the procession, and the queen, Miss Talty, ac-companied by her maids of honor, the Misses Murray and Moore, and her pages, Miss Foley and Miss Carroll, followed in the rear, and delivered the act of consecration and offering. PUBLIC SCHOOL CENSUS. -On Tuesday next under the provisions of the school law, the clerk of the city school board, will commence the census of persons over 5 and under 21 years of age. It is hoped, therefore, that our citizens will answer the clerk's questions promptly

Yellow Fever. That this terrible disease has for years held a despetic sway, at certain seasons of the year, in portions of our own fair land, and in other countries, is known by every one. And it is also known that a way one. tries, is known by every one. And it is also known that a cure, or even a preventive, has not been heretofore discovered.

It is known to every intelligent man and woman, that the reason for this fearful scourge is neither more nor less than the mularial poison that emanates from low marshy lands—whether adjacent to sait or fresh water especially in certain stages of the drying process, under a hot sun, and that uncleaned cess-pools, insufficient drainage, or unremoved filth of any kind, are generators of this same death-dealing miasma. Typhus and Intermittent Fevers are the lesser results of breathing these noxious vapors while Yellow Fever is the dreadful scourge that has the same origin.

After a careful reading of the late report of the National Board of Health, no other conclusion can be drawn, than that if the blood is kept in a healthy condition the birth and spread of yellow fever is materially lessened, if not actually prevented. It is well known that if the kidneys and liver—the organs that filter and cleanse the blood—are kept in a wholesome and sound condition, this same vital fluid will be clear from all impurities. That these organs the kidneys and liver, can be kept free from disease, and at all times in condition to faithfully perform their duties, is a matter beyond dispute, and it is equally true that a free use of Warner's Safe Kidney and Liver Cure, in connection with Warner's Safe Pills, will actually compel these same organs to perform their allotted functions.

Testimonials by the thousands are in the hands of the proprietors of Warner's Safe Kidney and Liver Cure vouching for its positive curative qualities in all diseases of the kidneys and liver, and hence as a cleaned to the series of the kidneys and liver, and hence as a hat a cure, or even a preventive, has not been

The Hidneys.

The name of certain double glands, having for their office the secretion of urine. They resemble a French Bean, their average length being from 4 to 4½ inches: breadth 2 inches; thickness 1 inch. they are of a brownish color, flattened from before backwards, and grooved on the interior border for the great vessels. They are made an of masses of the great vessels. they are of a brownish color, flattened from before backwards, and grooved on the interior border for the great vessels. They are made up of masses of minute blood vessels urinferous tubes, cells of a spheroidal and protecting form, nerves, arteries, veins, all imbedded in interlacing fibres, the whole covered by a thin, firm, transparent cellular envelope. They are by all odds the most important creans of the human frame, and excepting the eye, are the most delicate; yet they receive the least attention, and are the most abused.

The kidneys are subject to an infinite variety of dangerous and painful diseases, and also many of a minor character, while little attention is given to the latter, It is these little "Acorus" that grow and flourish, and culminate in the big "Trees," named Bright's Di-ease, Diabetes, Scrofula, Droosy, Gravel, and kindred ailments. It is almost impossible to name separately the symptoms of diseases of the kidneys. The different diseases are preceded by different symptoms. If any reader should notice a dull, heavy pain in the small of the back, if there is a numbness in the thinghs, if retention of urine is apparent, if nausea and vomiting is at hand, a positive conclusion can be arrived at that something is wrong with the kidneys. That one-half of physical disorders that human beings are afflicted with arise from imperfect action of the kidneys, is a settled truth, and that these disorders might be prevented by using Warner's Safe Kidney and Liver Cure, and in connection therewith Warner's Safe Pills, is equally true. Thousands of people, including prominent physicians, scientists and divines, who have known of its wonderful powers, enthusiastically endorse and recommend it. It is for sale by all druggists, and everyone should keep constantly on hand this conqueror of disease. m31
