It is easy enough now to say that the strike was ill-timed, ill-advised and badly managed. It is easy enough now to make Martin Irons a scapegoat and say he ordered the strike without authority; but the truth is that every local assembly voted to give the district board power to demand an adjustment of the grievances complained of and the reinstatement of Brother Hall. It the board erred in acting prematurely and without proper consultation with the general executive board, or the knowledge of the resources they could command to carry on the strike, the disastrous failure of the strike is sufficient punishment, without any harma criticism from me.

THE RAILROAD BLACK LISTS. Among the interesting facts developed in the course of the investigation was the existence of a black list, upon which was placed the names of all persons discharged. he acknowledges with gratitude the consideration with which he was treated by the Conarrespional committee.

THE LOSS OF THE CHARBERLAIM The Crew Becomes Panie-Stricken a Fire of Them Drowned.

CRICAGO, Oct. 15 .- A special dispatch from

Milwankee regarding the sinking of the large

steam barge Selah Chamberlain, says: Captain Greenley, of the Chamberlain, in an interview states that after he discovered the light of the approaching vessel he had only time to give one whistle before the collision occurred. His boat, he said, was struck on the port bow, and had a large hole stove in. From the rush of water into her hold he knew it was impossible to keep her free, and headed her for the short fut it was only a tew minutes before she be But it was only a few minutes before she began to sink, and he ordered the crew to take to the small boats. It was a terrible night, the log being so thick that it was impossible to see from one end of the boat to the other, while the rain came down in torrents. Not knowing how far off land they were, and knowing that their lives would be in peril in the small boats with a sea running, the crew became panic-stricken. It was during this excitement that five men lost their lives. The four deck hands, with the second engineer, got into one of the boats and second engineer, got into one of the boats and started to lower it from the davits, but the rope of one of the davits fouled, and as the other end of the boat was suddenly lowered the five unfortunate men were thrown into the water and were lost to sight in the darkness and fog, although their screams for help could be distinctly heard for several minutes. Luckily the Chamberlain carried two locats and the captain Chamberlain carried two boats, and the captain with the ten others of the crew, boarded it, abandoning hearly all their personal effects. Taking a compass to guide them through the tog, they pulled for the shore. It was life or death to all of them. As they realized their peril they became more caim, and after a steady pull the Sheboygan light was sighted, and they made the harbor at a late hour.

The judicrous sameness of this reply finally upset the dignity of the committee, and after being repeated some sixty times, never sailed to bring a broad smile to their faces.
