A FACT PROVEN.

SHOULD CONVINCE EVEN THE MOST SKEPTICAL OF ITS TRUTH.

If there is the slightest doubt in the minds of any that dandruff germs do not exist their belief is compelled by the fact that a rabbit inoculated with the germs became bald in six weeks' time.

It must be apparent to any person, therefore, that the only prevention of baldness is the destruction of the germ which acts successfully accomplished in the few minutes of the application of Newb's Herpicide.

Baldness is caused by the same germ which causes head-lice and can be prevented with the same remedy—Newb's Herpicide.

Accept no substitutes. Destroy the cause, you remove the effect.

Send for leading druggists. Send for stamps for sample to The Herpicide Co., Detroit, Mich. Edward Stern, special agent, 9th and Pa. ave.

PILES

"I have suffered with piles for thirty-six years.
One year ago last April I began taking Cancren
for constipation. In the course of a week I noticed
the piles began to disappear and at the end of six
weeks they did not trouble me at all. Cancren
has done wonders for me. I am entirely cured and
feel like a new man." George Kridger, Napoleon, O.

BUT ONE OLD-TIMER

**POLICEMAN FLYNN'S COMMENT
ON POLICE COURT CONDITIONS.**

He Clears a Passage-way and Then Has
Coffee and Sandwiches
Distributed.

"There's only one old-timer here this morning," said Policeman Flynn, after he had announced that there were twenty-six prisoners in the Police Court cells. "He is 'Handy,' the big policeman added, 'and while he came in on a charge of disorderly conduct, it's hard to anticipate what he will be charged with before court adjourns.'"

"Old-timers," he explained, "do not take up so much time of the court as they did a few years ago, for the reason that many are given longer sentences. Then, again, many of the bad ones have died. Annie Foley was given a six months' sentence the last time she appeared, and Becky Smith was also given a long term. 'It's only long sentences that will keep them away from court,' the policeman said.

Turning to the several persons who were on the steps, obstructing the entrance to the court, the policeman ordered a clearance.

"Step inside, if you want ice water," he exclaimed, "or you may have to go where the water is served without ice."

"Hot coffee would be more preferable a morning like this," suggested a member of the party.

"If it's coffee you want," he was told, "it can get accommodated, for the heavenly aroma is being wafted this morning with bread and meat thrown in."

As those in the small gathering had been told, the heavenly aroma was on them and was soon in the building.

Leaders of the Procession.

Irving Courtney and Coleman Saunders were the leaders of Judge Kimball's procession. It was alleged by Policeman O. E. Duval that they had been disorderly at Florida avenue and 7th street.

For the first time since the case was brought to the corner last night, said the policeman, "and it was evident that they had been in a fight."

"No, sir," he said, "the fight?" the court asked.

"I can't fine them without some proof against them," said the court. "Step out," Fred Kelly, who was in shirt-waist costume, was next in line.

"I'm guilty," was his response to a charge of disorderly conduct.

"This is the young man's first offense," Policeman Williams informed the court, "and I'm going to ask that mercy be extended to him. I don't wish to help him, and I hope your honor is."

"Personal bonds," said the court.

An order for the release of base ball was the cause of trouble on a lot on Tennessee avenue yesterday afternoon. Col. Lorenzo D. Bumpus and Fred E. Hoffman participated in the case, and they also participated in a court case.

"This man," said Policeman Hurd, pointing to Hoffman, "was drunk at the Bumpus and thrown down. He jumped up and struck at the colonel, and I arrested them."

Explanations were made by the defendants. They gave the court the information that Hoffman was thrown down by Colonel Bumpus because he got in front of the former.

"And I naturally jumped up and struck at him," said Hoffman. "I couldn't understand why he threw me down, and I thought my arm skinned without a word of warning."

It was his contention, so Colonel Bumpus said, that at ball game it is a case of "first come, first served."

Judge Kimball said that Colonel Bumpus said that at ball game it is a case of "first come, first served."

"She screamed murder because she thought her husband was about to strike her," the Special Policeman said, "and I arrested her. Judge Kimball, the officer continued, 'she certainly is one awful woman.'"

A woman's husband did the best he could to have her sent down, but the court held that no case had been made out and the woman was discharged.

"She made so much noise and kicked up such a racket," volunteered Warren, "that I had to sound my whistle to get control of them."

Physicians Exempt in Extreme Cases.

During the trial of a case involving the speed of an automobile, Judge Kimball announced that where the law is violated by physicians in cases of life and death he will accept the explanations and not consider the case as one of contempt.

Bayne, resident physician at Providence Hospital, was the defendant in the case before the court. He was charged with crossing the intersection of Pennsylvania avenue and 17th street at the rate of twelve miles an hour. The doctor said he was in a hurry to reach the hospital, as he had an ill patient under the charge of his admittance. The police officer explained, did last night.

In response to Judge Kimball's inquiries, he said there were other physicians at the hospital. The court said that he did not present a case that should be exempted and imposed a \$10 fine.

THE PIUS FUND SILVER.

Weighted 70 Tons and Was Sent to San Francisco to Be Coined Into Pesetas.

The 142,620 Mexican silver dollars which were turned over to the State Department by the Mexican government in payment of the California Plus fund award and were purchased by the Treasury Department as bullion to coin into Philippine pesos, have been delivered at the San Francisco mint and are being sent to the United States mint at San Francisco to be coined into pesos.

This great mass of silver, weighing nearly seventy tons, was turned over to American authorities by the Mexican government and was a source of embarrassment to the State Department until this means of disposing of it to the United States was found. A express to San Francisco in seven shipments, the transportation charges reaching \$5,000.

The amount paid by the treasury was at the rate per ounce for silver bullion in London on each of the seven days of delivery, and aggregated \$100,274. The express charges, the amount turned over to the church was \$96,274.

The Plus fund was created for the California church, under the terms of the agreement, which included upper and lower California. After the annexation of upper California to the United States, the church of that portion claimed a share of the fund which was retained by the Mexican government, and after a long diplomatic correspondence, the church in upper California was entitled to a share.

Outlook for Spindleshanks.

From the American Wool and Cotton Reporter.

Now that King Edward has set the fashion for knee breeches in full dress affairs and is being followed by many of his subjects, it is likely that they will be received long on this side of the water. They must, of course, be made of black silk or satin, and the effect resulting from such a dress will, to say the least, be somewhat curious. Those who favor the innovation will be the well-built, athletic class, while those who are of a more delicate build, and who will not adopt such a ridiculous fashion will have, no doubt, some personal reasons for not wanting to be seen in knee breeches. It will not be long, however, before the fashion adopted that has made men look ridiculous, or will it probably be the last. King Edward has set the fashion in London. There is little question as to the style there at least.

SHUT OFF BY RUSSIA

JAPAN'S WHEAT SUPPLY FROM RUSSIA CUT OFF BY MANCHURIA.

Russians Had Heretofore Ignored Violation of Law—English Press Aroused.

A dispatch from Peking yesterday says: The Russian administration of Niuchuang has stopped the exportation of wheat to Japan. The export of grain from Chinese ports is illegal, but the Russian authorities have ignored the law. During the past week the Japanese obtained many shiploads from Niuchuang, apparently preparing for war contingencies. Several ships were employed in bringing wheat from Shanghai and southern ports to Niuchuang, where it was transhipped as a direct export. The prohibitory order was issued by the Russian officials on Thursday.

Gen. Kondratovich has been placed in charge of six armed commercial boats and the navigation of the Liao river, which is construed here as another sign of Russia's intention to retain Niuchuang and the surrounding territory. Great numbers of Russian civilians and soldiers' families, it is reported, are being brought to Manchuria, it is believed in pursuance of a comprehensive plan to rapidly colonize the province. At the present rate there will be almost 100,000 Russian civilians in Manchuria, including Port Arthur and Dairen, before the date fixed for the final evacuation next fall.

LONDON, July 28.—Manchurian affairs occupy a great deal of attention in the London papers this morning. Besides an interview with the Japanese minister, the statements made at the Japanese legation last Friday to a representative of the Associated Press, to the effect that Japan's policy was to keep the Russian forces out of Manchuria, and to develop the province in the east, all the dailies reproduce the Associated Press interview with the Japanese minister.

The latter attracted serious comment. Commentaries are drawn between the peaceful and the aggressive attitude of the Japanese officials and the "insulting, provocative character" of the remarks of the Russian dispatch, whose statements are regarded as demanding a withdrawal on the part of the Russian government.

The Graphic says: "Unless the director of the Russian mission in London will become exceedingly delicate, for Japan is not likely to sit quiet under the threat of annihilation."

The Standard takes a milder view, and thinks, stripped of grandiose phraseology, that the director's statement, on the one hand, and the Japanese minister's statement, on the other, are very clear and solid assurances about the proposed open ports, and that it is needless "to pay much attention to the insinuations of the Tokyo dispatch, which is a mere repetition of the part of Russia and duplicity on the part of Great Britain."

An analysis of the morning papers in Tokyo yesterday indicates that the leading Japanese journals regard the increase in the Russian military and naval force in the Manchurian provinces as a serious matter, and that they write in a calm, confident tone.

RELINCE TO DEFEND CUP.

Formal Selection Made at Newport After Race Yesterday.

A dispatch from Newport, R. I., yesterday says: After the racing season at the Reliance, Constitution and Columbia, in which the former boat again demonstrated her superiority over the other two, the challenge committee of the New York Yacht Club selected the Reliance as the defender of the America's cup.

It was also decided to discontinue the trial races. The attitude of the Japanese Commodore Bourne and Messrs. Forster, McCormack and Robinson of the cup committee, C. Oliver Iselin, managing owner of the Reliance, E. D. Morgan of the Columbia, and August Belmont of the Constitution.

Messrs. Morgan and Belmont were perfectly satisfied with the choice of the committee. After the concluding race, they announced their selection they heartily congratulated Mr. Iselin and wished him the best of luck.

The showing of the three boats during the season the Reliance is fairly entitled to be the defending vessel. In every respect she has been the leader, and has lost but few events on the whole. It is probable that the defender will proceed to Bristol for a thorough overhauling, and then go to New Rochelle.

SHOCKING CASE OF INFANTICIDE.

Child Murdered by Parents in Fayette County, Pa.

A dispatch from Brownsville, Pa., yesterday says: William C. Arnold, twenty-five years old, well-to-do farmer of Jefferson township, Fayette county, was taken to jail tonight, charged with the murder of his son, William C. Arnold, two years old, who is also charged with murder, and the legal course will be taken with her also as soon as she has recovered from the childbirth that forms a part of the unusual tragedy.

Late on Friday night Dr. L. Riley of this place was summoned to the Arnold home, where he found a woman and a newborn babe. He was told by one of the parents that he was called in to kill the child. The physician examined the babe and found from its mouth a mass of cloth that nearly choked it. He then told the couple that he would kill the child he would kill.

Yesterday Dr. Riley, with a friend, went to the Arnold home and asked to see the babe. The mother refused to let him see the child, but he was told that the child had been buried by her husband. Officers later exhumed the body and the coroner's jury found that the infant had been murdered by its parents.

The disclosure is a shock to the community, as the couple were very popular.

RAILROAD PRESIDENTS.

Pennsylvania System Pays Its Executive the Largest Salary.

A. J. Cassatt, president of the Pennsylvania railroad, probably receives the largest salary of any railroad official in the United States. He is credited with receiving \$50,000 a year. While no other railroad president receives as much, the Pennsylvania system is credited with drawing a salary as President Cassatt, there are a number of presidents who receive \$50,000 a year. James J. Hill is understood to draw a salary of \$50,000 a year as president of the Northern Securities Company. In addition, he draws a nominal salary as the head of the Great Northern railway. Samuel Spencer, president of the Southern railway, receives \$40,000 a year.

Frederick D. Underwood was appointed president of the Erie railway at the request of James J. Hill. The story is told that Mr. Underwood, who had done so much to build up the Erie, was asked to take the position by J. P. Morgan to make an inspection of the Erie. After he had made the inspection, Mr. Morgan asked Mr. Underwood if he would take the position. He was asked in regard to the salary. He answered that with free way he could save 20 per cent of the cost of operating the Erie, and put it to work with the other trunk lines. He added that it would take the hardest work of his life. Mr. Morgan said that he would pay him \$50,000 a year. His terms were accepted.

Among the other railroad presidents who are understood to receive salaries of \$50,000 a year are E. P. Ripley of the Atchafalaya, Topeka and Santa Fe, William H. Newman of the New York Central, A. J. E. Darling of the Erie, Paul W. Treadwell of the Lackawanna, and Marvin Hight of the Chicago and Northwestern.

Mr. Underwood's salary is understood to be \$50,000 a year. George B. Harris of the Burlington railway received a smaller salary, \$30,000 a year. The head of a Chicago Great Western, is also believed to receive about \$30,000 a year. President Joseph Ramsey of the Wisconsin railway is credited with drawing a salary of \$40,000 a year. The smaller railroads pay from \$15,000 a year upward.

ON THE RIVER FRONT

LIGHTER, KEARNEY LAUNCHED FROM MARINE RAILWAY.

Other Government Vessels—Shoal Near New Sea Wall—With the Cargo Carriers.

The United States coast survey steamer Endeavor, which has been in port for the past two or three days, will sail today for the shoals down river and will resume her work.

The light house engineers' steamer Jesmine, which has been cruising among the light houses on Chesapeake bay making repairs, has returned to Baltimore for a short stay.

The United States army quartermaster's department lighter Kearney, the tender to the light house, is on duty at Washington barracks, which has been hauled out on the marine railway at Alexandria for several days past undergoing repairs, was put overboard yesterday morning and will be ready for duty in a few days.

There was but a scant supply of fresh fish on the wharves and small markets on the 11th street wharf this morning, and the demand was quite brisk, the stock on hand being quite disposed of to the up-town dealers. The large amount of grass covering the river flats has made the catch of river fish small so far this season, as the bass and other fish find plenty on which to feed in the grass and do not come out into deep water, where the nets are located.

For small trout, \$6 to \$7 per barrel; medium trout, \$4 to \$5 per barrel; large trout, 6 to 7 cents per pound; butter fish, \$5 per barrel; small fish, \$3 to \$4 per barrel; Spanish mackerel, 10 to 11 cents per pound; pan rock, 10 to 12 cents per pound; herring, 10 to 12 cents per pound; yellow perch, 10 to 12 cents per pound; carp, 15 to 25 cents each; eels, 5 cents each.

Hard crabs sold this morning at \$1.50 to \$2 per barrel; soft crabs, 25 to 50 cents per dozen, and clams, 50 cents per hundred. The dealers are looking for the arrival of the steamer from the Chesapeake bay before the end of the week.

In the process of raising the land reclaimed from the Eastern branch and added to the Washington barracks Park, a shoal place has been found along the sea wall where four or five feet of water runs in at low tide. The shoal is caused by the deposits of mud which came with the water through the outlet chute in the sea wall and is located at the extreme southwest corner of the building.

About the Wharves.

The owners of Beale's wharf, on Nomini creek, are having the structure rebuilt and put in thorough order for the landing of steamboats from this city. A large oyster-packing house is also being erected on the wharf and will be in service during the coming oyster season.

All the tomato-packing plants at the wharves, on Nomini creek and on the Coast and Yonemore rivers in Virginia are now packing tomatoes for winter use. As yet the fruit is scarce and high and the factories are not working full time. The tomato and fruit-canning factories down the river are now packing for the winter.

The tide yesterday afternoon was lower than it has been in several weeks. All the river flats were exposed to view. In many of the docks the water was so low that the vessels in the river were aground.

A two-masted schooner is lying at the Washington barracks wharf on the Eastern branch unloading a cargo of about 250 tons of coal. The coal is being used by the soldiers during the coming fall.

A large Philadelphia coal-carrying barge is hauled out on the marine railway at Alexandria. The barge is being used for the purpose of unloading coal from the river.

Several scows belonging to the Columbia Sand Dredging Company have been rebuilt recently at Dean's boatyard at Alexandria. The scows are being used for the purpose of dredging the river.

The schooner Murray Vandiver, laden with hard coal, is reported in the river below Alexandria. The schooner is being used for the purpose of transporting coal from the river to the city.

The punky Ada Ballenger, laden with foundry iron from a down-river point, arrived at Alexandria yesterday, consigned to the city.

The schooners J. D. Bell, Little Carter, Col. J. Merrick, Isaac Solomon and two other vessels are at the wharf of Carter & Co. in the river below Alexandria.

The punky Winnie Windsor, laden with hard coal, is reported in the river below Alexandria. The schooner is being used for the purpose of transporting coal from the river to the city.
