Anty Drudge Discovers Why George Has No Appetite.

Anty Drudge—"What? Eating dinner in this steamy, smelly kitchen? I should think it would take your appetite away."

Mrs. Slow—"I have noticed that George doesn't eat much on washdays."

Anty Drudge—"How can he! Why don't you use Fels-Naptha? Boiling water isn't necessary; and you'll be through your wash plenty of time to have dinner in the dining room. Or if you prefer the kitchen, there will be no steam or bad smells."

Talk about energy!

A half cake of Fels-Naptha soap can display more energy in getting rid of dirt in half an hour than an able-bodied woman can in half a day.

But there's this difference: Much of the woman's energy is wasted.

When she rubs clothes hard on a washboard she wears out the clothes in trying to rub out the dirt.

Fels-Naptha concentrates its energy on the dirt—dissolves it into tiny particles that are easily rinsed away—without harming the most delicate fabric.

And it does this in cool or lukewarm water, without hot water or boiling, summer or winter.

Do you prefer to supply the dirt-removing energy yourself or to use that stored up in a cake of Fels-Naptha?

If you choose the easier and better way, follow directions on the red and green wrapper.

Choice of all the Lingerie Waists which sold up to \$2.50 for. **69c**

BRYAN HITS AT TAFT SCOUTS OF THE SKIES

Says Republican Candidate Doesn't Like His Platform.

AND WANTS TO BORROW

Rosewater Puts a Pertinent Question to the Peerless.

"THOU SHALT NOT STEAL"

Asks Definition of Difference Between Larceny of Votes and Larceny of Property.

FAIRVIEW, LINCOLN, Neb., July 30.—Charging that William J. Taft "is not satisfied with the work of the Chicago convention," which nominated him as the republican candidate for the presidency, and that "he is deeply impressed with the work of the democratic convention," William J. Bryan has issued a statement in which he expresses the opinion that Mr. Taft "fears the uprising which republican abuses have caused, and yet hesitates to adopt his real and substantial reforms." The statement was called forth by the allegation made by Taft in his speech of acceptance at Cincinnati Tuesday that Mr. Bryan was a destroyer of business. In regard to the speech Mr. Bryan said:

"I read it, and shall discuss it as I deal with the various subjects upon which it treats. For instance, in a speech at Topeka between now and the first of September I shall discuss the guaranty of banks and contrast Mr. Taft's position with the democratic position. In my Labor day speech at Chicago September 7 I shall discuss his attitude on the labor question. In other speeches I shall discuss his attitude on the tariff question, the trust question and other questions on which he has expressed himself."

Calls Taft a Borrower.

"The most noticeable feature of his speech is his attempt to amend the republican platform by grafting on it some of the planks of the democratic platform. He is evidently not satisfied with the work of his convention, and is deeply impressed by the work of the democratic convention. He is uncharitable, however, in not giving the democratic party credit for having pointed out the reforms which his own convention repudiated, but which he, in a half-hearted way, indorses. The speech shows that he fears the uprising which republican abuses have caused, and yet hesitates to adopt his real and substantial reforms."

Confirmation was given by Mr. Bryan to the story printed in the afternoon that it was not his intention to make an extended campaign tour, but only to deliver a few prepared speeches at central points before the list of October, and that during that month he expects to remain home and assist in the educational work of the campaign through the discussion of public questions in the form of signed articles, interviews and letters.

"The outline of my plan of campaign as printed today," said Mr. Bryan, "is substantially correct, but I am not prepared yet to announce the number of speeches or the places. Besides speaking at Topeka in August and at Chicago on Labor day, I shall attend the democratic convention at Peoria on September 6, the notification of Mr. Kern at Indianapolis on a date not yet fixed, and a farmers' congress at Madison, Wis., about September 28."

Many Visit Fairview.

Although the heat was intense today, a large number of visitors rode out to Fairview and paid their respects to the democratic leader. One of these was J. T. Flynn of Bellair, Ohio, who was a delegate to the Denver convention. Mr. Flynn discussed politics with Mr. Bryan for some time and expressed the belief that Ohio would be under the banner of the column in November.

The actual writing of his speech of acceptance has not yet been begun by Mr. Bryan, but he said today that the ideas were about formulated and he would enter upon the work of preparation in a day or two. The fact that an additional stenographer has appeared on the scene is an indication that all is in readiness for this important task.

Will Bryan Disapprove?

Rosewater Asks That He Frown on Sharp Practice.

OMAHA, Neb., July 30.—Victor Rosewater, republican national committeeman for Nebraska, yesterday published an open letter to William J. Bryan asking him to disapprove of an attempt that was recently made to file the names of the democratic presidential electors from this state under the head of "people's independents." Mr. Rosewater recently filed a protest in the case with the secretary of state. This matter is an outcome of the bolt of the Nebraska delegation, headed by Thomas H. Tibble, from the St. Louis convention of the people's party, which nominated Thomas E. Watson for president.

Mr. Rosewater first refers to Mr. Bryan's speech last February before the Civic Forum in New York, the subject of which was "Thou Shalt Not Steal," and in which Mr. Bryan divided the theft into "larceny in violation of law" and "larceny through operation of law."

"I ask you, Mr. Bryan, when Mr. Rosewater, 'the larceny of something more precious than property—namely, the unpurchasable votes of the people—is not equally reprehensible whether the theft is committed in violation of law or under cover of legal technicalities?"

Larceny Just the Same.

"Let me call your attention to the fact, if you are not already aware of it, that a conspiracy is now on foot in this, your own state of Nebraska, engineered by your own brother-in-law as chairman of your democratic state committee, for the purpose of purloining votes not intended to be cast for you and to count them for your candidacy. In the interest of square dealing I have filed protests with the secretary of state against the misbranding of democratic presidential electors. The filing of the names of democratic electors as 'people's independents' is a palpable attempt to secure votes for you by false pretenses. If this plot succeeded you would have the benefit of the votes intended to be cast for Thomas E. Watson, as well as of the votes intended to be cast for you. If this would not be a case of larceny, through the operation of law, I would like to know what you would call it."

Mr. Rosewater closes with an appeal to Mr. Bryan to put the stamp of his disapproval on the proposed action.

Bryan "Hasn't the Time."

FAIRVIEW, LINCOLN, Neb., July 30.—When informed of the open letter of Victor Rosewater, proprietor of the Omaha Bee, Mr. Bryan said:

"I have not the time to make answer."

"He was not certain that he would reply at all, but said that the subject would be investigated."

Airships for Spying on Enemy's Strength and Position.

PICTURES FROM HEIGHTS

Photographing From Balloons With Telephoto Outfit.

SEA FORTS MAY BE CHANGED

Chief of the United States Signal Corps Talks of Possibilities of Aerial Transit in War.

NEW YORK, July 30.—Scouting in the sky photographing camps and defenses of the enemy from balloons and sending information by wireless to headquarters are possibilities of warfare of the future being considered by Lieut. Col. George P. Scriven, chief of the United States Signal Corps for the Department of the East. Interest in aerial maneuvers in war will be accentuated in the tests to be held by the War Department at Fort Myer in August.

Valuable for Scouting.

While he does not believe that the flying machine has yet shown itself to be entitled to consideration, Col. Scriven said he believes that scouting from balloons in Europe with the dirigible balloons, as well as with lesser ones in this country, show that these ships of the air will be valuable in collecting information about the enemy which heretofore has been impossible.

In discussing these possibilities Col. Scriven said he is of the opinion that complete photographic picture, showing fortifications and the distribution of forces, by means of the telephoto, a new instrument with which, by the use of an aerial lens, it is possible to focus on objects at a distance of perhaps a mile and secure such detail as will make the picture seem as if it had been taken at a few hundred feet.

Hard to Get Range.

Col. Scriven explained that the camera could be placed in the bottom of the balloon and operated by clockwork. He stated that there would be some danger of a balloon being hit by projectiles while engaged in such scout work. It has been demonstrated in Europe, he said, that a balloon at a height of one mile can be destroyed by gun fire, and a mile is about the limit of ascent. At the same time the wrecking of a balloon at such a height would require great skill.

The balloon in warfare, said this officer, might also be used to tow exploding shells through the air and drop them into the enemy's strongholds. He said that such war ballooning as he foresaw might necessitate changes in the construction of our seacoast defenses.

FARMAN WOULD GIVE LIFT TO PRESIDENT ROOSEVELT

Aeronaut's Wife Interested in His Affairs, But Has Never Taken Flight.

NEW YORK, July 30.—Henry Farman, the aviator, was greatly relieved to find that his flying machine had stood the long journey from Paris without injury to any of its delicate parts.

He watched the opening of the big cases in which it was packed eagerly to see if any damage had been done. Because of the delay caused by the order of the collector of the port that an appraiser must be present to break the seals of the boxes the machine could not be assembled yesterday as had been planned.

Farman discounted the delays, however, by having big arc lights installed in the aerodrome at Brighton Beach so that his assistants can work all night.

Among the things that he said that President Roosevelt is greatly interested in Mr. Farman has expressed a desire to see him fly. Mr. Farman says he is delighted at the interest of the President and will be pleased to explain the working of the aeroplane to him and will give him an aerial ride if he wishes it.

A special deal which the public will be excluded may be set aside to give an exhibition for the President and his friends.

Mrs. Farman Talks.

One of the most interesting women in this city is Mrs. Henry Farman, wife of the aviator. Mrs. Farman is Irish and she was brought up in London.

Nobody would ever believe it, though, if she did not say so, for ten years' residence in Paris has transformed her into a typical French woman. She even speaks English with a French accent, and arranges her words at times in a way which reminds one of la belle France.

Mrs. Farman has large dark eyes and hair deeply rich red. In this hair she wears always, arranged like a Greek fleet, a bright emerald ribbon, the only reminder she has of the little Isle. She wears a pair of large earrings.

Mrs. Farman is of an extreme and dainty slenderness. She has a long, slim throat, a long, slim figure, long, slim hands and a small oval face, sharp cut as a cameo.

In discussing her husband and his business, she said:

Interested in His Affairs.

"In England when a woman marries she thinks to keep her house. In France she thinks to help her husband make money in his business. It would be very dull for me, or very stupid, to think only to dust my house and order the dinner and things like that. I think it is the duty of a woman to occupy the mind of an intelligent woman, an educated woman."

"I should think it very strange, indeed, if when my husband comes in he should have to talk to me about house or servants. Instead he talks to me about the business—yes, about the invention, about the science, about the progress of the flying machine, the contracts, the possibilities of the future; yes."

"It was the same with the motor cars. He began to work on the flying machine. It is generally so in France. Almost always the wife is in business with her husband and if she is left a widow she often carries on the business herself, and carries it on very well, too, and makes money."

"I think it is the duty of a woman to occupy the mind of an intelligent woman, an educated woman."

"I should think it very strange, indeed, if when my husband comes in he should have to talk to me about house or servants. Instead he talks to me about the business—yes, about the invention, about the science, about the progress of the flying machine, the contracts, the possibilities of the future; yes."
