## U. S. MOVIE BOARD PROPOSED IN BILL

Representative Would Provide Censorship and Research in His Measure.

Creation of a new division in the United States bureau of education, to be known as the Federal Motion Picture Commission, whose duty it will be not only to censor all films, but also to conduct inquiry and research into the recreational and educational possibilities of motion pictures and the dissemination of such information to the public, is provided for in a bill introduced yesterday by Representative Appleby of New Jersey. This was referred to the committee on education, and Representative Appleby says that he will urge for early hearings.

Discussing the purposes of his bill, Representative Appleby said: "Certain states now have censorship, but owing to the difference in regulations of different states and the fact that no two censorship boards seem to think exactly alike, great loss and difficulty is being caused the producers. I believe that producers are agreed that if a censorship is desirable—and to this I think the majority of them are agreed—it would be far better if it were under federal regulations."

"All the opponents of censorship ignore the basic reasons for such regulation, and that is the important relation of the motion picture to children and illiterates. A large proportion of the attendance at motion picture theaters consists of children of immature years; to which may be added a vast army of illiterates, the ignorant, and it is incredible to think that the federal government will longer permit the creation of lasting impressions upon these minds based on the immoral, the obscene, the indecent and the crime-inciting. With the establishment of federal censorship objectionable films will quickly disappear, as the opportunity for profit for the producer of salacious pictures will be so restricted that it would never pay them to continue such productions."

**\$6,000,000 U. S. CLAIM.**

Instructions have been sent to Federal District Attorney Davis at Detroit to prepare for the filing of a claim for \$6,000,000 in the federal courts there against the Detroit Trust Company as a receiver for the Lincoln Motor Company, it was said today at the Department of Justice. The Lincoln company was recently purchased at a receiver's sale by the Ford Motor Company. Actual proceedings in the case, officials explained, would start as soon as documentary evidence in support of the government's claim could be transmitted to Detroit. The claim, it was said, was for unauthorized allowances for depreciation and prospective profits on contracts for Liberty motors during the war, and was to be filed, officials added, as a result of the complete audit of a wartime aircraft contracts now being made by the War Department.
