BY J. RUSSELL YOUNG.

DEARBORN October 21 -- President Hoover is here today to pay tribute to his warm personal friend, Thomas A Edison, on the occasion of the celebration of the fiftieth anniversary of the invention of the incandescent lamp.

The President's luck finally deserted him, and a steady rain greeted him and Mrs. Hoover and those who accompanied them from Washington as they stepped from their train. They were dressed for the elements and entered upon the program arranged for their entertainment with enthusiasm.

It was because of his real attachment for the 82-year-old inventor and because of his keen appreciation of all that Mr. Edison has contributed toward the betterment of humanity that President Hoover came here at the invitation of Henry Ford to participate in the observance of the "birthday" of Mr. Edison's invention.

GIANT PLANE TAKES 169 ALOFT FOR HOUR'S FLIGHT OVER LAKE

51-Ton Load of Human Freight Breaks All Records for Passengers Carried by Any Type Aircraft.

ALTENRHEIN, Switzerland, October 21.—The huge 12-engined flying boat DO-X, which was launched here last July, today made an amazing one-hour flight with a human load of 169, the first time in the history of aviation that so many persons have been carried into the air on any conveyance. The giant Dornier plane took off at 11:15 a.m. and landed just one hour

later. The amchine flew over Lake Constance, her motors working faultlessly, and landed with her 51-ton load at 12:15 p.m. without a hitch.

The DO-X carried 159 passengers and a crew of 10. She had made previous test flights, but this was the first time that so great a load was taken up. The flying boat, which may be used for a transatlantic crossing for the purpose of trying out her capacities, was built in the greatest secrecy. She was designed to carry 40 passengers normally, but has accomodation for 100 if necessary. Her 12 engines can develop a total of 6,000 horsepower, and each engine can be treated individually without affecting its neighbors. The DO-X measures 150 feet from tipp to tail. Its wings are 10 feet thick and 150 feet from wing tip to wing tip. Six great turrets project from each wing and each turret is equipped with two engines of 500 horsepower. The turrets are manned by mechanics who can walk along a passage on the inside and landed with her 51-ton load at 12:15 p.m. without a hitch.

Unstinting praise for the work of Policeman Robert J. Allen of the eighth precinct was the answer today of Capt. Robert E. Doyle, commander of that precinct, to the demand of Maj. Henry G. Pratt, superintendent of police, for comment and recommendations on the officer's defiant letter of explanation regarding a published statement that he proposed to investigate the failure of the United States attorney's office to prosecute W. L. Moffatt, an investment broker, indicted in February, 1928, and arrested last week on a new charge.

"For his attitude in the Moffatt case," said Capt. Doyle, "I honestly believe that Pvt. Allen should have been commended rather than

In obedience to Maj. Pratt's instructions, Capt. Doyle made considerable pertinent comment on Allen's letter and closed his report with two recommendations. The first was, "That, in accordance with the customs of the department, I commend to you the excellent work of Pvt. Allen in the Moffatt case." In the second recommendation Capt. Doyle said:

"Believing as I do that Pvt. Allen meant no disrespect to the major and superintendent or the honorable Commissioner in writing the said letter of October 19, 1929, I recommend that said letter be

filed without further action.' Second Defense of Allen. Capt. Doyle's report marked the second time within the last week that he has come to the defense of Allen. In the first instance the

officer issued a public statement commending Allen's activities in connection with the Moffatt case. In Capt. Doyle's official commendation of Allen he said the officer. since he has been a member of his command, had impressed him as "a man of high intellect and one capable of doing splendid police work," and called specific attention to his investigation in the case of Dexter

Alien's letter to Maj. Pratt, in explanation of the statement that he proposed to inquire into the failure of the United States attorney's office to prosecute Moffatt, was returned to Capt. Doyle Saturday with orders that he comment on it and make recommendations. Capt. Doyle had transmitted the letter to Maj. Pratt with a statement that it was "self explanatory."

Maj. Pratt at the time indicated that he was highly displeased with the contents of the letter, and in returning it to Capt. Doyle stated specifically that he did not like its "tone." In reference to this, Capt. Doyle said he believed it was "unfortunate" that Maj. Pratt saw fit to call on him for an interpretation of what was in the mind of Allen when he wrote the letter.

Lures Thief to Auto

The theft of a two-tone French automobile horn that played "No-body Knows How Dry I Am" was reported to police of the four-teenth precinct last night by Miss Frances Feist of 2610 Connecticut

Miss Feist said the horn was stolen from her car while it was parked in the alley at the side of the apartment house in which she lives. She valued the instrument at \$75.
