ANSWERS

"School Girl" asks: "Is there any way in which one can keep the hair in curl when it's not naturally curly?"—Some girls do this: At right comb hair free from all snarls, then mix white of egg with equal amount of water and few drops of toilet water, beating thoroughly. Separate hair into small strands, dip comb into mixture, moisten hair well with it, twist each strand around like a rope, then, beginning near scalp, wind hair over kid curler.

In morning hair is curled and process need not be repeated more than once a week.

How can I get rid of cockroaches?—M. P. S.—Turpentine added to the water used to wash around the sink and a little poured down the pipes will drive them away. Sprinkle borax freely about the infected parts. Absolute cleanliness is the only safeguard. No food should be left uncovered in the kitchen over night and nothing left about their haunts which will attract them.

"I am 58 and my hair is turning white in streaks. What can I do to make it entirely white?"—Grandmother.—It is refreshing to get a letter from one whose hair is turning white and who does not want to dye it. Also unusual. Time is the only remedy, but a little bluing in the water in which you rinse your hair will add very much to its appearance. Shampoo frequently and always use the bluing.

"C. W." asks: "Is it proper for a girl to furnish her household linen when she is to be married?"—Yes, it is customary. Often the girl's friends give showers in her behalf, and thus much of the linen is given to her.

"Young Man" writes: "When a man calls upon a woman should she precede him in going upstairs or down?—The man precedes going up and the woman going down."
