NEWS AND GOSSIP OF THE MINING WORLD.

TO BE WORKED EXTENSIVELY WITH MACHINERY THIS YEAR.

Developments Will Probably Be Greater in This District Than During Any Previous Season Since Discovery Was Made.

There is to be a greater development of the Slate creek mining district this season than ever before, in the opinion of Richard McGibbon, of San Francisco, who, with other California capitalists is interested largely in that section. Mr. McGibbon, with four men, arrived in the city Wed-nesday and left for that camp yesterday, taking with him ten men.

taking with him ten men.

"There will be fully \$50,000 to \$75,000 worth of machinery taken into the Slate creek district this year," said Mr. McGibbon.

"There are some twenty claims owned by California mining men on which was expended in the neighborhood of \$20,000 last season. This year these will be producers, but they are all properties for syndicate working. The district is nearly all that character of ore. It has, however, made a spiendid showing. We are going to work some surface rock this year that was taken out last summer. It will all pay under our process.

Rich Quarts From Yuneman Group.

The richest quartz seen in the Keremeos valley is said to come from the Yung-man group of claims, situated on the head of Ollala and Fifteen-Mile creeks, and located last summer. The work is being done on the Pine claim, where a crossicut has been run, striking across the main ledge and cutting two smaller ledges which parallel it. As far as known the ore body on the main ledge is five feet by the while sixteen and twenty-two inches of fine quartz carrying free gold is found on the smaller ledges. Specimens show free gold distributed all through the quartz, which is seamed with, fine arsenical iron. Assays made last fall gave gold values of \$196 and \$146 from the small velns, and an average of \$20 from the three-foot ledge. Development work will be carried on steadily during the summer!

In the Mount Baker District. Work in the Mount Baker district is now being done on the claims of English & Co., of San Francisco: Lane & Co., the Portland Mining Company and others, and those who own prospects are already going into the district to do the annual assessment work. W. J. Conner has three assessment work. W. J. Conner has three tunnels driven on his property, one of which is in 350 feet and will soon crosscut the ledge. Another has been driven 100 feet and good ore has been encountered. J. O. Carlyle's property shows up well, the ore carrying tellurium and assaying high. The claims of Thomas Lay and partners, which run toward the boundary line, look promising, and considerable work will be done upon them this summer.

The working shaft on the Copper Queen on Texada Island is now down 45 feet. The winze on the 400-foot level is down twenty-seven feet, and continues in ore, while the stope on this level is being worked. It has narrowed considerably since last writing, but the grade of ore produced is satisfactory. In the No. 3 stope on the 300-foot level the ore body is also smaller; stoping at both these points will be continued. The stops on the 200-foot level continues satisfactory, the vein being between five and six feet wide, while the face, ahead of the stope, shows about two feet of ore. The ore shipments to the smelter have been less than formerly.

IN THE NORTHWEST CAMPS.

The development work which is now progressing on the Willcock at Ymir is every day improving the appearance of the mine. The tunnel which is run to tap the Fourth of July shaft is now in 120 feet, and the showing is the best encountered. The vein is six and a half feet wide, between smooth and well-defined walls, and contains over two feet of solid galena ore. The tunnel has to be run another seventy feet, after which an uprise of forty-seven feet will connect it with the bottom of the Fourth of July shaft, giving a vertical depth of 145 feet.

Word has just been received from the Montana mine, one of the well known Tracy creek. B. C., properties, that the new tunnel is in fifty feet, and at that point there is ten feet of ore on the hanging wall, and that better and more ore has been found in the tunnel than anywhere else on the property. This tunnel has been driven 120 feet below the shaft, and the ore was encountered at forty-five feet. It is the intention to con-tinue work to a point under the shaft and then make an upraise to connect. The crosscut from the foot-wall in the shaft has been run forty-four feet, and the

IN THE SLATE CREEK MINES, hanging wall is not yet reached. There are four feet of ore on on the foot-wall, which will average \$50 per ton. In sinking the shaft the last forty-five feet was all

NEW YORK STOCKS.

CHICAGO WHEAT.

Corn, Oats, Pork and Lard.

The Mammoth, in the Sauk district, has operated and crushed ten tons of ore per day, producing about \$1,000 per day at \$100

The San Poil Lumber Company has begun to build a new wagon road to the site of the proposed mill a mile and a half above the Republic brewery, on O'Brien

John Irvine, who owns the North Star and Chestnut claims, located between Lake and Hope creeks, at the foot of Trout lake, will leave this week to do his assessment work. Assays from surface showings run from 250 to 300 ouces in silver and also carry gold values.

wer and also carry gold values.

The Nelson-Poorman deal with the Duncan mines at Rossland has been closed up. The shares which the vendors took in part payment have mostly been disposed of in London at a premium. In the original Poorman claim there has been opened up a very fine shoot of ore in the lower workings. The ore gross average returns about 31 on the plates and 38 in the concentrator. The tunnel is being driven in to tap the White and Granite claims, which now belong to the Duncan mines. This tunnel, it is anticipated, will give about 1,000 feet of backs in these two claims. This will give the deepest workings in any of the mines of the Nelson division.

tinued large receipts and the drop in London. The close was weak, at \$28.90 bid and \$29 asked. Pig iron warrants were very weak at \$15.00. Northern No. 1 foundry was quoted nominally at \$11@22. Spelter, however, ruled quiet at fully sustained prices, closing at \$4.5% bid and \$4.6% asked. The brokers' price for lead was \$4.00, and for copper \$17.00.

FOREIGN.

Financial.

NEW YORK, May 10.—The Commercial Advertiser's London financial cablegram says:
There were weak spots in the market here today, but taken as a whole the markets were harder. The cheering influences were the news of Gem. Roberts' continued advance and the good bank returns. Bear operators were disposed, also, to close before the settlement, particularly their commitments in mines. Funds, however, continued to droop, affected adversely by the money outlook.

Americans opened firm, the low level at which they closed yesterday attracting moderate purchases, both for London and the continent, but New York made only slight response to the rise here, and the close was undecided, Baltimore & Ohio reacting especially. Tintos were it off, owing to the weakness in copper, while Anacondas rose to parity. The bank received £50,000 gold from Norway and lost £19,000 to South America.

Bills and call money are inclined to be easier. The bank did a fair business in discounts. There was less talk of gold shipments from America, despite the half penny rise in the buying price of engles, as it is thought the Bank of England will not pay interest on gold in transit. Silver was 29-16d at the close, on Indian coinage orders. Financial.

THE SEATTLE MARKETS.

Stocks of vegetables and fruits received additions through the arrival of the steamer from San Francisco late yesterday evening. There has been a lively trade during the day, though prices are, in the main, unchanged.

Strawberries are down to from \$1@2 per crate, and receipts are increasing daily. The fruit has not been of the best, however, and the Lake Washington berries are looked for to improve the quality of the product as well as to lessen the price. Other fruits and vegetables have no new features in condition or price. fruits and vegetables have no new features in condition or price.

Butter still continues firm and active at 20622c for Washington creamery, and eggs are stiff at If@ilsc. Live poultry is more plentiful and in active demand at unchanged prices.

The fish market shows no change, except that salmon receipts are increasing with the advance of the season. Halibut continues to come in from the cape. Quotations, however, are unchanged. Wheat continues inactive at the prices quoted. Hay and feed are steady, and the former especially in good demand. Outgoing vessels to the north are taking good lots, the transport service calls for supplies and these are added to by the increasing home demand. home demand.

Wool and hides continue dull. Prices have not advanced, and the result of the sales in London on Tuesday are not an indication that there will be an increase.

PURCHASING PRICES.

The following prices are being offered to the profucer by the local dealers for delivery in round lots
on the dock and in the car at Seattle:
Grain—Oats, \$19@20: barley, \$16.50; wheat, chicken
feed, \$16.0026.50; bran, \$10: shorts, \$11.

Options at first were steady on the Michigan state report, but eventually weakened under selling, impelled by predicted rains in the Northwest, warmer conditions in southwest section, and further deliveries on May contracts. Closed steady, with corn at \$\frac{1}{2}\$c decline. May closed 71\$c, July 72\$c, September, 73\$c.

(CHICAGO, MARKETS.

CHICAGO MARKETS.

The Board of Trade. The Hoard of Trade.

CHICAGO, May 10.—More favorable weather and lower cables started wheat weak. A slight rally followed, but realizing sales were met with and the improvement was only temporary. The weak feeling in corn, which prevailed early, also had an adverse influence, but traders were decidedly apathetic, owing to the near approach of the government crop report, there being a disposition to hold off until the report was made public and something definite was known as to the present prospects of the coming crop. After the initial flurry, with the price almost at a standstill. July closed a fraction lower, at 67c.

at 67c.

There was a weak start to corn, owing to a sharp break at Liverpool and favorable planting weather, but several bull leaders came to the support of the market, starting an upturn. An announcement that 1,000,000 bushels of cash corn had been sold here for export by interests active on the bull side helped along the advance. July closed is up, at 3846330c.

Oata ruled from her advance.

Charged.

A good shipping demand for cash meats and small receipts of hogs strengthened provisions. Trade was active, with general buying by packers, but the advance was all lost near the close on profit taking.

The leading futures ranged as follows:

ELECTRICIT

Is a Genuine Pick-me-up.

When pressure of business. cares of life, wear down mind and body, the result is nerve weakness, stomach or kidney trouble. Brace up your system on my Electric Method. If you've made mistakes in life, treat them as grindstones to sharpen your wits on and avoid repetition. A serious disease often results from a

lesser one; fix it in time. The ideal tonic for all weakness is that agreeable, reviving nerve builder, my

Dr. Sanden Electric Belt

When you put on this famous battery you cure yourself and break away from the old ruts or drugs and cure-alls. Electricity is in the blood, the brain, the nerves; it flows throughout the body and is that warm force given by Nature. To replenish this power when lost by disease is the work of my new and scientific application. In this way I promote circulation and nerve action. drive out pain and completely cure your ailment. For Rheumatism, Lumbago, Weakness of all kinds, Varicocele, Drains, etc., there is no remedy at all comparable with it.

MY BELTS DO NOT BURN ANYONE

For more than ten years I have been using an extra special covering for my discs, so arranged that the same may be worn on the body with or without this covering, at the option of the wearer. Other advertisers claiming that they alone furnish such covers with their Belts, simply print falsehoods.

BUY NO BELTS

Which require immersion in strong vinegar or other acids for charging purposes. Such belts last the wearer less than a month. All my Belts carry a special guarantee with them for their lasting qualities, and any repairs needed occasionally are made free of

THIRTY YEARS BEFORE THE PUBLIC

Constantly, as my Dr. Sanden Belts, with attachments, have been, ought to be enough evidence to sufferers that dealing with me they run no chances of dangerous experiments. Is it not better to use my Belt, under my own experienced advice, than to use that of some other person whose name you never heard of a year or so ago?

At least all owe it to themselves to examine my Belts and appliances before purchasing those of other makes. I will accomodate anyone to make this examination of my Belts at their own homes if they will but ask it.

SINS OF THE FATHER.

"The sine of the father shall be visited upon the sons even unto the third and fourth generations,"

This is a true statement of a natural law. It is a familiar fact that syphilis in the blood, manifested by its many wellknown symptoms, may come to you as al inherited punishment for the sins of your ancestors. You cannot help what your ancestors did, but you can help yourself.
You can eradicate the terrible poison from your own system, thereby escaping the camerited punishment for yourself and pre-venting its transmission down to another generation. Scrofula, Rheumation and

innumerable Skin, Blood and Bone diseases are its descendants. No matter whether

I CURE SYPHILIS TO

the result of my life work. It contains of any kind. It goes to the very botte

of any kind. It goes to the very bottom of the disease and forces out every particle of impurity. Soon every sign and symptom of Syphilis disappear completely and forever. The blood, the tissue, the flesh, the bones and the whole system is cleansed, purified and restored to perfect health, and the patient prepared anew for the duties and pleasures of life.

I also cure to stay cured forever VARICOCELE, STRICTURE, NERVO-SEV-UAL DEBILITY, and all associated diseases and weaknesses of men. To these maladies alone I have earnestly devoted 22 of the best years of my life. Is it set worth your while to investigate a cure that has made life anew to multitudes of men? men?

If you cannot call, write me your symptoms fully. My home treatment by com-

spendence is always successful. My counsel is free and sacredly confidential, give each patient a legal contract in writing to hold for my promise. Address E. M. RATCLIFFE, M. D., 713 First Aves to

MANHOOD RESTORED "CUPIDENE"
tion of a famous French physician, will quickly cure you of all nervous or diseases of the generative organs, such as Lost Manhood, Insommia, Fains in the Back, Seminal Emissions, Nervous Deblity, Pimples, Undiness to Marry, Exhausting Drains, Varicocele and Constitution. It stops all losses by day or night. Prevents quickness of discharge, which if not checked leads to Spermatorries and sof discharge, which if not checked leads to Spermatorries and Elithe herrors of Impotency. CUPIDENE cleanses the liver, the kidneys and the urinary organs of all impurities.

CUPIDENE strengthens and restores small weak organs.

The reason sufferers are not cured by Doctors is because ninety per cent are troubled with Prostatius. CUPIDENE is the only known remedy to cure without an operation. 500 testimodials. A written guarantee given and money returned if six boxes does not effect a permanent cure \$1.00 a box, six for \$5.00, by mail. Send for Frencisco. Col. Por Scale by

90 90 90 Monthly Crop Bulletin. WASHINGTON, May 16.—The monthly report of the agricultural department is as follows: Beturns to the statistician of the department of

been about 25,585,900 acres, or 2,563,900 or 11.8 per cent, less than the area estimated to have been sown last fail. The reduction in acreege in the principal states, owing to winter killing and the ravages of the hessian fit, is as follows: Indiana, 1,565,000. Ohio, 980,900; Michigan, 317,000; Pennsylvania, 158,000, Illinois, 137,000 acres.

For the area remaining under cultivation the average condition May 1 was 88.9. While this average is 8.2 points above he mean of the averages of the last ten years and has been exceeded only three times in fifteen years, it must be remembered that the acreage nlowed up, out for forman (except in California, where it is not yet definitely ascertainable or otherwise abandused, ass occur cultively elim— California, where it is not yet definitely ascertainable) or otherwise abandanced, has seen outlied; eliminated. The high averages of condition reported last month for Kansas, Missouri, Teras and other more release important wheat producing states that have escaped the ravages of the fly, have been fully maintained, and on May I nearly one-half of the entire winter wheat acreage remaining under cultivation reported a full, normal or still higher condition.
