laboring men and mechanics without means, who have come here soley dependent upon what they could make from their daily carnings, and too text difficulty in ravigating the turbulent in the Straits, and vice versa. Lake Washington, during a few days represent g a New York from their daily carnings, and too text difficulty in ravigating the turbulent in the Straits, and vice versa. Lake Washington, during a few days represent g a New York from the only firm where the silvertype picture is made. We addiss those who have an opportunity to examine the capitalists or even men of moderate waters. means. The result has been a depression in our labor market, and a slow development of our resources. We need now, more than anything else, at the crib in the labor market, or to

shalk listlessly about our thriving little town like Micawber ever waiting for something to turn up, it were quite as well for him perhaps that he stay away.

WATER PIPE.—The pipe factory at Tumwater appears to be rushed up with orders just now, and it has rather a flattering prospect ahead for an extensive business during the coming year. The proprieters, we learn, have recently received orders from California for four miles of 8-inch pipe (i. e. 8-inch bore.) besides numeruos smaller orders. The Dakota will take down this time eighty cords of their pipe to California. The business is a paying one and must soon become very extensive in this Territory, as the demand in California will be continually on the increase, and for several reasons promises to become enormous in the course of a fwy years at legat. It requires but the capital to start and operate a factory of this kind, and we see no reason at the continually and the continually on the increase, and operate a factory of this kind, and we see no reason at the continual property of the business of their pipe to capital to start and operate a factory of this kind, and we see no reason at the capital to start and operate a factory of this kind, and we see no reason at the capital to start and operate a factory of this kind, and we see no reason are found to the sum total of the different kind of the lighty of wild gee and ducks. These were put in the market and disposed of muck the market and disposed of in quick time at stiff prices.

The Portland Bee says that a man in that city has invented a machine for knitting, and as fast as twenty men could do it. It is almost as large as a start with the received to said the course of the deciration of the charact ay of this kind, and we see no reason tured by machines of this patent. wby some of our Seattle capital might not be enlisted in a similar enterprise. That there is money in it is Coombs, T. S. Russell, John S. Condon A CHANCE FOR BUSINESS that it could be operated here with as as floor managers for the ball to be much or greater profit than at Tumwa-ter is evident. We have no water pow-cal entertainment and lecture in the er 'tis true; but as we have an abundance of fuel one could be operated every bit as cheap by steam here as it can by water there. Then we have as great a supply of timber here, of the very best quality, for that purpose as can be found at any point on the Sound, while in the matter of shipping the booming over again as a result of the pipe, we possess greater advantages than recent heavy rains and the warm weathany other place on the Sound.

called attention to the wretched and al. water being so deep as to seriously re most impassable condition of Main street bill, over which the stage is obliged to pass in reaching Lake Washington. That it on the to and might be repaired at once is true. But these repairs must accessarily be so extensive and costly before the hill is made decent and passable, that we can hardly hope to see any improvement there row. We are informed, however, that the old County road, the former stage route to the lake, can be placed in tolerable good condition for the paltry sum of \$39. The only impediment to travel there now is the slide at the intersection of Mill street, and which can be effectually removed for the sum mentioned above. Why not do it at once. Of course it never would do for a moment to think of taking some of the light fingered gentry out of the city jail, and permit them to soil their deli- That journal justly thinks the thief cate hands in doing such work? Of in question caps the climax of concourse not. They were not created to temptable villiany. work, those fellows, and we suppose that is just the reason why they are never made to fulfill the requirements of the law, which says that the fines imposed by the Police Judge in their cases shall to paid either in money or by work upon the streets.

FROM BELLINGHAM BAY .- Operations at the Bellingham Bay coal mine have been entirely suspended on account of the large amount of coal on hand. The bunkers are now full and there is no place to store the esal. The company are anxiously awaiting the arrival of their ship Germania, which saile I from San Franci co on the 25th ult. for that port. We are also informed by the Capiain of the Libby, that considerable excitement prevails at Schome among the coal miners over the reports of rich discoveries of gold on the North per of the first class. Sak river. But nothing can be done then, he says, in the way of mining it until very late in the spring or the carly part of summer on account of the high water on the river. Many are of the opinion, however, that the gold- tons of coal. diggings of the Nootsack will turn out much the same in the end as the claims at Port Townsend some y ars ago.

M. A. Kelly & Co. received a new addition to their large and extrusive stock of drugs, medicines and follet articles.
