

COTTON DROPS ON
WEATHER REPORTStatement is More Favorable
Than Expected and Starts
Prices Downward.

A more favorable weekly weather report than had generally been expected led to a decline of about 1/4 cent a pound in yesterday's cotton market. Up to the time of the publication of the report the market was another dull and featureless affair of local evening up. The Government report failed to testify to the economy conditions mentioned in private advice received daily from all over the cotton belt. On the whole, the report was bullish, but hardly as much so as had been expected. Public report in the market continued at minimum pressure came from Liverpool, West Street and Southern wire houses and uncovered a few scattered loss orders in the final hour, when the market made its low level.

Initial sales were 2 points higher to 2 lower. The market did a bit better directly after the call on early reports of warmer weather in the western cotton belt. Liverpool cables were about as usual, reports from abroad speaking of a featureless market. The official weather report was clear but warm with a few showers, while the Mississippi heavy showers fell at places. Macon reported more than an inch of moisture.

In the first hour the market advanced about 1/4 to 1/2 point, but pressure increased gradually after 11 o'clock with the early weakness of securities and the unsettledness of foreign exchange. There seemed to be a disposition among local operators to sell the market in the face of bullish crop news, probably on the theory that the market was thoroughly fed up on it. The market held steady until the fourth hour when prices dropped about 1/4 to 1/2 point under Tuesday's finish. The list dropped further in the last half hour, the market closing around the low, 21 to 24 points down from the preceding final. The local spot market was off 20 points to 12.80 cents.
