

CHARLES B. BOOTHE & CO. MINING AND MILLING MACHINERY RAILWAY SUPPLIES. LOS ANGELES, CALIFORNIA.

Mines and Mining

Lambert Smith of Kingman went to Chloride the first of last week to put men to work on two mining claims upon which the assessment work for 1899 has not yet been done.

A. D. Rocheford returned Thursday afternoon from Mexico, where he has been looking after his mining interests, says the Kingman Miner. He was met by M. L. Regan of San Francisco and the two gentlemen will probably outline a plan for the development of their extensive mining interests in Mohave county.

Charles Gracey was in Kingman recently purchasing supplies for his mines at Virginia Camp. He bought a ten ton ore wagon and sent it to the mines, where it will be used in hauling ore to the mill. Several hundred tons will be hauled down before the ten stamps are put in operation. The mine is looking extremely well and is now capable of producing ore enough to supply a fair sized mill.

While doing the usual assessment work on one of the mines of the Southwestern Mining company at El Dorado canyon recently a great body of splendid trilling ore was cut. In all the other mines owned by the company good ore is now in sight. The lost vein in the Wall Street mine has been recovered and a good quality of ore found. The company will probably put in a narrow gauge road to the mines from the river and work them on an extensive scale.

Judge W. W. Dunbar of Kingman returned a few days ago from a trip which he made in company with T. J. Grant to the mines in northern Mohave county. At the old Adams mine in Grand gulch he found many men at work in the development of one of the largest bodies of copper ore in Arizona. The mine is located eighteen miles north of Scanton's ferry and eighty miles south of St. George. The mine is paying \$1,000 per day. Messrs. Dunbar and Grant visited the Copper Mountain mines, also south of St. George, and went into the Dixie country, where they rested up from their hard trip. They are very enthusiastic over the copper prospects of the northern strip and predict great things for it in the future.

Clemente Maldonado, a miner at the King, was struck by a falling rock Saturday, says the Clifton Era, and sustained a compound fracture of the left leg below the knee, and the limb was badly lacerated. Sunday Richard Jones, a railroad employe, got one of his shoulders dislocated by a hand car running against him at Corona.

The new concentrator building now under construction by the Arizona Copper company at Clifton will be of iron. A large portion of the iron is on the ground and more is arriving daily.

Work in crosscutting the veins of the Gerald and Surprise group in the Minnesota district of Mohave county have shown up wonderful bodies of low grade ore. In places the vein exceeds two hundred feet in width. The mines are situated in a basin on the high table lands overlooking the Colorado river.

Dan Murphy, the well known Needles merchant, was in Kingman recently and in company with J. S. Withers went out to look at the New London mine, where he has several men at work. Mr. Murphy has many interests in Mohave county mines and expects great things of them. He recently secured options on oil lands in California for which he has been offered a big sum of money, says the Kingman Miner.

Russell and Ziemer have let a fifty foot contract in the shaft of the Man mine in Todd Basin, says the Kingman Miner. The shaft now stands at a depth of 130 feet and a crosscut at the bottom shows nine feet of sulphide ore. On the surface the outcrop showed less than two feet, but the vein has maintained a gradual widening all the way

down. The tunnel on the vein is in several hundred feet and shows ore in abundance.

The White Hills company is now operating ten stamps of the big mill, says the Kingman Miner. Monday eight tons of gold ore from the Golden Eagle and Golden Star mines in Weaver district, were crushed and on the result hinges important improvements on the properties, as the removal of the ten stamp mill on the G. A. R. is contemplated. After a ten days' run on company ore A. L. McKesson will put in a thirty days' run from the William J. Bryan mine. Nothing definite is yet known of the future movements of the company.

Clack brothers have five tons of very rich ore on the Nighthawk mine in Mohave county ready for shipment to the sampler.

A carload of hoisting machinery went out to Chloride from Kingman Thursday morning of last week.

It is thought that the Mocking Bird mine, Weaver district, will be extensively worked in the near future. The mine is a remarkably good one.

Great improvements in the ores of the Midas Mining company mines now under development in Mohave county are reported. A foot of ore is now in one shaft from the surface to a depth of thirty feet, that gives assay results of over \$100 to the ton in gold. The development work done has been limited.

The San Francisco mine has improved wonderfully since operations were begun on it by the Yucca Cynide Mining and Milling company a few weeks ago, says the Kingman Miner. In the shaft mineral bearing ore now reaches from wall to wall and the value is in excess of that in the old workings. The company is thoroughly satisfied with its bargain.

Quite a number of miners from the Sheeptrail mines came to Kingman one day recently. The furnishing of poorly cooked food to the men was the cause of the exodus. Food in plenty was furnished but the cooking would not have passed muster even in a Chinese kitchen.

W. P. Dunham and G. A. Whiteford returned from Mineral creek Monday and went on to Los Angeles, says the Florence Tribune. Mr. Eben Smith of Denver, who is one of the wealthiest mining operators in the west, accompanied them. He went over the Ray properties, speaks very highly of them, and predicts a great future for the camp. Speaking of the proposed railroad Mr. Smith said it was an absolute necessity, and presented no engineering difficulties whatever compared to a road he and his partner, Mr. Moffett, built from Florence to Cripple Creek, Colorado, a distance of forty miles, at a cost of \$2,400,000. If Smith & Moffett become interested in Mineral creek, which is not unlikely, they will make things hum.

The El Paso News publishes the following which will be of interest here: "J. W. Payne, one of the most prominent mining men in Arizona and for a number of years general manager of the Grand Reef mine in Arivapi district in Arizona, passed through this city. Mr. Payne closed a deal in New York where he had been for the past month and where he sold two of the largest bodies of the Grand Reef property for \$400,000 to eastern capitalists. The Grand Reef is the property of John Mackay. A great deal of development work has been done on the property, which is gold, silver and copper, and although it is only a low grade proposition there are immense bodies of ore in sight. The property is about sixty miles from Wilcox."

General Manager Blair reports a scarcity of carpenters at the Mammoth and an overflow of miners, says the Tucson Star. There is marked activity at the mine and mill, at the latter in view of the introduction of more stamps and machinery, heretofore missing. Operations have commenced in Aravapi canyon in connection with establishing electrical power for service at the mill and mine. Additions to the tramway are being introduced.

The St. Louis Gold Recovery company continues to dispose of old mill tailings at the rate of 240 tons daily, while the Bladfield cyaniding plant is treating the dump created since fall a year ago.

Michael Irish and John Ellis filed notice of the location of four mining claims in the Pima mining district, with the county recorder today.—Tucson Citizen.

William T. Smith, the assayer of Los Angeles, reports having received a sample of the ore said to be platinum found near Williams and upon analysis of it could not find a trace of platinum.

From present indications it may be expected that the vicinity of Solomon Springs will soon be the scene of considerable mining activity, says the Bisbee Orb. The terms of the bond on the Conley grant given to Felix Leavick, representing Denver capital, requires that systematic development work be inaugurated at an early day. As Mr. Leavick's operations in this section have already shown him to be an experienced and energetic mining man, representing or controlling abundant capital, there is no doubt but that that section of this district will be thoroughly explored and its value determined.

Attorney Lynn Helm, brother of the late Dr. Scott Helm of Phoenix, was in the city yesterday from Los Angeles, says the Tucson Star. He had business with the land office in regard to closing up the mining patents in the interest of the South Elisee Copper and Townsite company. He said that the company's force was down 800 feet on the shaft and were crosscutting at the 700 foot level.

Word from Helvetia is to the effect that the smelter is running and turning out 400 pounds of copper every hour and is not running more than two-thirds of its capacity, says the Tucson Star. It is also reported that they have developed immense bodies of high grade sulphide ores and the end of the crosscut has not yet been reached. A second jacket will be installed shortly. The force in all departments aggregates three hundred men.

About two months ago Martin Costello made application for patent on the Triangle, Iron Prince and Standard Quartz mines, at the local land office. Today Francis A. Owens and L. C. Shattuck started contest proceedings at the local land office against the application for a patent on the Triangle mine. W. H. Brophy, Ada Evans and L. C. Shattuck started contest proceedings against the application for a patent on the Iron Prince mine, and Emil Marks, H. R. Hanniger and L. C. Shattuck filed contest proceedings against application for a patent on the Standard quartz mine. Barnes and Martin are attorneys for all of the contestants.—Tucson Citizen.

Tol Laman, brother of Mrs. J. D. Henderson, left this morning for Eddy, N. M., to spend a few months with relatives and friends. Tol is the fortunate owner of mining claims at Troy, which are bonded to Boston capitalists, who are developing them with most encouraging results, and with every prospect of opening a big copper mine.—Globe Silver Belt.

Adolph Jacobs returned on Tuesday from a trip to Mineral creek. He reports much activity at the Ray camp. The company is pushing development work and the construction of the narrow gauge railroad from the mines to the Gila river. The traction engine which was employed to transport the company's freight from Red Rock to the Gila river has not proved the success that was anticipated, and a railroad will undoubtedly have to be built from the Southern Pacific to the terminus of the Ray company's narrow gauge road at the Gila river. The recent fatal shooting affray seems to have had a salutary effect, as nearly all idle and dissolute characters have since left the Ray camp.—Globe Silver Belt.

G. W. Middleton, manager for the North American Exploration company, is pushing work on properties under the control of that company. A carload of machinery and a carload of lumber passed through Prescott, says the Journal-Miner, en route to Wickburg for use at the mines being operated by him near there, and a carload of oil was received at the Prescott depot for use at his Richman property. At the latter property Mr. Middleton has just placed two gasoline engines, one of which operates a hoist and the other air compressors for three engines. It is his intention to sink to a depth of 800 feet on this property just as rapidly as the work can be done.

Last Sunday William Weston and J. D. Murphy arrived in Kingman and the next day proceeded to White Hills, where they will probably inaugurate one of the most important mining schemes in the history of Mohave county—the sinking of a prospect shaft 1,000 or 1,500 feet on the White Hills group of mines, says the Mohave Miner. Messrs. Weston and Murphy are two of the best known mining men in Colorado, and their thorough knowledge of the situation and financial equipment for the work in hand is sure to put the mines among the great producers of the world. Yesterday F. W. Stehr of Colorado Springs arrived in Kingman on the flyer and proceeded to White Hills. Mr. Stehr is the secretary and treasurer of the reorganized company, and will probably remain until the new work is well under way. The White Hills mines are among the greatest silver producers in the west, having produced millions of ounces in silver since their discovery seven years ago. The ore were phenomenally rich in both gold and silver. One carload of fourteen tons, as an instance, contained 29,000 ounces silver and seventy ounces gold. Water line the usual leaching process is many tons of ore running over 3,000 ounces in silver were shipped during the early days of the camp. Near the visible, but where the chutes have been followed below that level the ores have been found as thoroughly mineralized as on the surface. The miners of the company are well situated for economical working through one main shaft, being in a compact body within a radius of 3,500 feet. The mineral bearing zone is about one mile in length from north to south. In isolated places the gold bearing veins of the Gold Basin district, to the east, break through the lime cap of the upper range and pass into the northern part of the district.

The deeds for mining properties now on deposit in escrow in the Prescott banks represent many hundred thousands of dollars and a mining man who has been "keeping close" on the trail can be sold or rented without any trouble. If the former, you are at once recouped for rent expense while in Phoenix; if the latter, your tenant (and they are plentiful for this size cottage) takes your place; eventually paying out for your property which, considering the amount invested, is far better than any savings bank account or FIVE PERCENT TRACT that you are being sorely tempted to purchase. We lay stress on the last sentence and ask that you preserve this ad; reading it twelve months hence.

(For our Single Lot Sales see Want Column in this paper).

Sealed proposals will be received until 11 o'clock a. m., on December 29, 1899, by the board of control of Arizona at their office in Phoenix, at which time and place bids will be opened in the presence of bidders for furnishing supplies to the insane asylum, in such quantities (more or less) as may be required for the three months commencing January 1 and ending March 31, 1900.

All supplies must be furnished at such times and in such quantities as may be required by the superintendent of the asylum.

Samples of all goods bid on, to be furnished to the board when required. All goods to be delivered at the asylum. If required by the superintendent. The board reserves the right to accept or reject part or all of any bid.

E. J. BENNETT,
Secretary Board of Control.

WHEN SHE WAS MRS. HAZEN.

Her Reply to the Man Who Cut Down Her Husband's Appropriation.

Washington—The quick wit of Admiral Dewey's wife, just at present one of the most conspicuous women in America, is shown by the following incident of her life in Washington when she was Mrs. Hazen.

General Hazen was the first head of the weather bureau in Washington, and found the new position by no means a sinecure. It was almost impossible to persuade the members of congress to vote for him the necessary funds with which to carry out his plans as he desired, and he was at the same time grieved at as if he were positively and personally responsible for the weather, which it was a fact of the moment to say that he furnished. Mrs. Hazen was the recipient of all his woes, and gave him her full sympathy, especially one spring when the appropriation had been shamefully cut down by the economy loving chairman of the committee on that special appropriation.

A few days after the passing of the mutilated bill Mrs. Hazen was a guest at an afternoon reception at the house of one of the cabinet members, where the most detestable and unendurable weather, untimely and unlooked for, was the topic of the moment. As Mrs. Hazen crossed the room to make her adieu to her hostess she was waylaid by the arriving chairman of the offending committee, who accosted her thus:

"Well, Mrs. Hazen, well, madam, and is this the best your husband can do for us in the way of weather?"

Mrs. Hazen turned, looked at him with a sudden flash in her pretty eyes, then answered, clearly and sweetly:

"Yes, Mr. Blank, the very best—for the appropriation."

The discomfited man fled, in the midst of the hardly concealed smiles of the surrounding guests.—New York Tribune.

HOW'S THIS?

We offer One Hundred Dollars Reward to be paid by Hall's Catarrh Cure.

F. J. CHENEY & CO.,
Proprietors, Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him.

WEST & TRUAX, Wholesale Drug-
gists, Toledo, O.

WALDING, KINNAN & MARVIN,
Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price, 75c per bottle. Sold by all Druggists. Testimonials free.

Hall's Family Pills are the best.

COOK STOVE HER MONUMENT.

In Washington county, N. Y., there is a cemetery containing one of the oldest monuments in the country, erected in memory of his wife by Aaron Crosby. It is a common cast iron cooking stove, on the top of which is a marble slab with the inscription and name. This monument was erected in 1848. Subsequently Aaron moved to Springfield, Ill., married again and again lost his better half. Not wishing, evidently, to show partiality, he erected another cooking stove memorial, the counterpart of the first. Neither slab contains any allusion to the virtues of the deceased, but it is a safe inference that the stove is the best testimony to the fact that they were both excellent cooks.—New York Mail and Express.

DO YOU KNOW

Consumption is preventable? Science has proven that, and also that neglect is suicidal. The worst cold or cough can be cured with Shiloh's Cough and Consumption Cure. Sold on positive guarantee for over fifty years. Dr. G. H. Keefer, Druggist.

'GOOD RESOLUTIONS LIKE EGGS—UNLESS HATCHED INTO ACTION—WILL RUN INTO ROTTENNESS' (Written for Sensible Thinkers Heads of Families.)

KILROY'S NEW PALESTINE—Room 316 Fleming Block—now offers lovely homes, viz: Ten four-room new brick cottages (with bath) in one of the loveliest locations in Phoenix—on the installment plan, monthly payments of ten dollars. NOW! ASK YOURSELF THIS QUESTION: WHY am I paying exorbitant monthly rents for poor rooms or houses when I can just as easily save it? Should you desire to leave Phoenix in six months or a year after taking one of these homes—THE SAME CAN BE SOLD OR RENTED WITHOUT ANY TROUBLE. If the former, you are at once recouped for rent expense while in Phoenix; if the latter, your tenant (and they are plentiful for this size cottage) takes your place; eventually paying out for your property which, considering the amount invested, is far better than any savings bank account or FIVE PERCENT TRACT that you are being sorely tempted to purchase. We lay stress on the last sentence and ask that you preserve this ad; reading it twelve months hence.

(For our Single Lot Sales see Want Column in this paper).

NOTICE TO BIDDERS.

Sealed proposals will be received until 11 o'clock a. m., on December 29, 1899, by the board of control of Arizona at their office in Phoenix, at which time and place bids will be opened in the presence of bidders for furnishing supplies to the insane asylum, in such quantities (more or less) as may be required for the three months commencing January 1 and ending March 31, 1900.

All supplies must be furnished at such times and in such quantities as may be required by the superintendent of the asylum.

COMPRESSED AIR.

The introduction of compressed air in foundry work is a new departure at the shops of the Pennsylvania railroad. The sprayer, in fashion like a paint sprayer, is of convenient size for handling with the air supply passing through a pipe in the handle of the sprayer and then through the operating valve and a pipe connection and the nozzles, the latter adjustable to obtain the proper relative positions necessary for the successful discharge of the spray. A vacuum is produced in the three-ninths inch copper pipe passing down into the can, and to obtain the full benefit of the atmospheric pressure in discharging the contents, a hole of one-eighth of an inch in diameter is made in the can screw top. The air valve is easily operated by a thumb lever just above the handle; and a strainer, about three inches in diameter and four inches long, of ten meshes per inch brass wire, is provided for straining the material to be used.—New York Sun.

THE BOER'S RELIGIOUS FERVOR.

A Volkrust telegram states that the Boer camp resembles the camps of Cromwell's Ironsides. Every day psalms and hymns are sung by the camp fires, and on every side a spirit of earnest religious fervor and enthusiasm is displayed.—St. James's Gazette.

MARKET REPORTS.

LOCAL PRODUCE MARKET.

Wholesale Selling Prices Current.
EGGS—Ranch, \$7.50@8; eastern, \$7.25@7.50.
BUTTER—Ranch, per lb. 20c; Maricopa creamery, 20c; Tempe-Mesa Produce Co., 25c.

CHEESE—Eastern, full cream, per 16lb; home, 14c.

BEANS.

BEANS—Per lb. small white, \$3.40; pinks per cwt., \$3.50; Lima \$5.50@5.75.

FRESH FRUITS AND BERRIES

Bananas, \$3.75@4 per bunch.

LEMONS—Fancy, per case, \$3.75; blackberries, 15c per basket; strawberries, 20c@25c; peaches, 8c@10 per box; pomegranates, 2 1/2@3 1/4 per lb; Bartlett pears, \$1.00@1.15 per box; Winter Navel oranges, per case, \$2.75@3.25; jaffas, \$2.25; Arizona pomelos, \$1@1.50 per dozen; persimmons, 12c per lb.

DRYED FRUITS, NUTS, RAISINS

DRYED FRUITS—Apples, evaporated, fancy, per lb. 12c; peaches, fancy, 8c; choice, 7c@8c; plums, pitted, choice, 8c; prunes, choice, 7 1/2c; fancy, 9c@10c; apricots, fancy, 12c; choice, 11c.

NUTS—Walnuts, fancy soft shells, 14c; almonds, paper shell, 15c; soft shell, 16c; hard shells, 3c per lb; pecans, 10c@12c; California, 12c; filberts, 15c; Brazilia, 14c; pineapples, 10c; peanuts, eastern, roasted, 12c@12 1/2c; raw, 8c@10c; hot raw, 7c@8c; roasted, 12c@12 1/2c; chestnuts, 12 1/2@20c per pound.

RAISINS—London layers, per box, \$2.25@2.50; loose, per lb. 4c@6c; Thompson Seedless, 6c@7c; Sultan, 5c.

ONIONS AND VEGETABLES.

VEGETABLES—Cucumbers per cwt., \$1.65; evaporated chilis per lb. 15c; green onions, per dozen bunches, 25c; radishes, per dozen bunches, 25c; spinach per doz., 25c; tomatoes, per box, \$1.10@1.15; string beans, 12c@13c; cabbage, \$2.00 per cwt.; green chilis, 6c per lb; potatoes, \$1.60@1.75; carrots, \$1.50 per cwt.; green peas, 11c; wax and lima beans, 10c; sweet potatoes, \$1.25@2 per cwt.

ONIONS—Valley, Silver Skins, \$2.25@2.50.

FLOUR AND FEEDSTUFFS.

FLOUR—Per bbl. local extra roller process, \$4.50; Graham, \$2.50 per cwt.; whole wheat flour, \$2.50 per cwt.

CORN MEAL—White, \$2.25 per cwt.; yellow, \$2.50 per cwt.

FEEDSTUFFS—Bran, per ton, \$15; rolled barley, \$12 per cwt.

DRY SALT PORK—Per lb. 8c@9c.

LARD—Kettle rendered leaf, 3c; 5c; 5c; 5c; 10c; 10c; 10c; 10c.

HONEY AND BEESWAX.

HONEY—Strained, per case, \$7.50.

BEESWAX—Per lb. 22c@24c.

FRESH MEATS.

BEEF—Per lb. 8c@9c; veal per lb. 8c@9c; mutton, per lb. 9c; fresh pork, 9c.

BACON—Medium, 12c.

HAMS—Breakfast, per lb. 10c.

HIDES, WOOL AND TALLOW.

HIDES—Dry, 16c@17c per lb; kip, 15c; calf, 16c@17c; bull, 11c; green, 5 1/2@6c per lb.

WOOL—Firm, from No. 1.

TALLOW—Per lb. 10c.

Wool pelts from 9c per lb up; goat skins, from 12c up.

POULTRY AND GAME.

POULTRY—Hens, good heavy, per doz., \$4.75@5.50; Pekin ducks, live, per doz., \$5.50; spring chickens, live, \$3.75@4.50.

FRESH FISH.

Southern California varieties, 12c per lb; Columbia River salmon, 17c per lb.

COFFEES AND SUGARS.

COFFEES—Rio 13c@15c; Central American, 18c@20c; Peaberry, 20c@22c; Mocha and Java, 26c@30c; Arabica's, \$12 per case; Lion coffee, \$11.50.

SUGARS—Granulated cane, per cwt. 6c@6 1/2c; cube, \$5.50@6.75; powdered, 7c; C., 8 1/2c per lb.

GRAIN AND HAY.

WHEAT—Per cental, for shipping, \$1.10@1.30.

HAY—Per ton, loose alfalfa, \$8; baled alfalfa per ton, \$9.

BARLEY—\$1.05 per cwt.

William R. Orr & Co., 4 West Adams street, merchandise brokers. Correspondence solicited. Quotations by wire daily. Hello 65.
