REMEMBER THE WHITE HORSE IN FRONT.

### STEWART SENTENCED

The Swindler Could Only Plead Two Weeks of Unconsciousness.

Charles E. Stewart, who was brought back from Florence on Sunday night to answer a charge of obtaining money by false pretenses in having a worthless check cashed at the Tivoli garden, was before Justice Burnett yesterday morning. He pleaded guilty or rather he said he had no knowledge of his innocence for he remembered nothing that had happened to him in the last two weeks. He had been drunk all that time.

His story of his unconsciousness was partly borne out by residents of Florence but that was not taken as a mitigation of his crime. It is a wonder that Stewart ever lived to be arrested. If a sane man had tried to do what he did he would have perished on the desert.

When he left Mesa after having distributed worthless checks there he set out on foot for Florence. He did not even follow any travelled road but struck out across the desert. He travelled part of the way along the right of way of the Phoenix & Eastern and when he was picked up he was well on towards death of thirst. His tongue was hanging out. It is a marvel that he was picked up at all for he was in a part of the country that is not frequented.

When he reached Florence he fell out of the wagon in which he had been riding and injured his knee. While he was sitting on the bank of a canal nursing his wound an officer who had been instructed to look out for him came upon him and arrested him.

Stewart made no special plea for mercy. He was sentenced to the county jail for a period of four months and to pay a fine of \$50. Not very much is known of him here but what is known is not to his advantage. Once while he was drunk he said he had been "sent over the road" twice. It is also known that he did not always go by the name of Stewart. In other parts of the country where he has been he was called Kyle and when he first came here he said that was his name. He went so far as to try to scrape up a relationship between himself and Constable Kyle.

Stewart is about fifty years of age and looks as if he might at one time have been a business man. When he first came to Phoenix he applied to the New York Life insurance company for an agency. He was not given one but was sent out to see what he could do in the way of writing insurance. He sent in a couple of applications and then drew upon the company for his commission. It was upon the strength of his alleged relationship to the company that he was enabled to negotiate his worthless checks.

### PHOENIX WELL ADVERTISED

By Eastern Press Notices of the Poker Rubaiyat.

Within the last two weeks Phoenix has been brought to the notice of many people in the United States who had never heard of the town before. It has come about in the eastern press notices of the Poker Rubaiyat, lately brought out here by Mr. Frank Holme, the artist. As has been stated in the Republican's notice of the Rubaiyat it had been intended to bring it out in New York but before anything had been done on it Mr. Holme had been ordered to Phoenix by his physicians. The work was therefore done here and even in the making of the suits with which it has been so elaborately illustrated.

It is mentioned in all the notices that Phoenix is the birth place of the book. It is certain that within recent years no other work has received such widespread and favorable notice. The New York Sun, for instance, which does not give up its space on small provocation devoted two columns to it and reproduced two of the cuts, one of which had been printed in The Republican. It reprinted a considerable part of the text which had been furnished by Mr. Kirk L. Shelle, the actor, and highly praised both the work of the artist and the writer.

The New York Herald gave a half page to it. Four of the full page cuts were reproduced together with the whole of the text.

Other papers which have extensively mentioned the work are the New York World, Telegraph and Times; The Philadelphia North American and the

\$100 REWARD \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. CHENEY & CO., Toledo, O. Sold by Druggists, etc. Hall's Family Pills are the best.

Ledger: the San Francisco Chronicle, the Boston Globe, the Denver Post, the St. Louis Mirror; the Chicago Record-Herald, the Tribune, the Inter-Ocean, the Daily News, the Post and Journal, and the morning edition of the American.

The success of the Rubaiyat has gone far beyond the expectations of either the artist or the author and Mr. Holme is filled with confidence now that what ever he undertakes will prove successful. It has been mentioned that on May 12 he will give a talk to the people of Phoenix at Dorris theater. Much local interest is being taken in this event. No outline of the programme has been published but the talk will be copiously illustrated by drawings as the lecturer proceeds. Mr. Holme is an intimate friend of George Ade and has illustrated many of his Modern Fables. He is also a personal friend of Peter Finley Dunne, "Mr. Dooley" and he will tell how Mr. Dooley grew out of James McGarry, a Chicago saloon keeper. He will also show how a newspaper covers a hanging.

He is by the way engaged on a new book by George Ade, a burlesque dime novel, "Cybil" or the Messenger Boy With the Warm Feet." It will contain six cuts.

It may not be generally known, but Mr. Holme has been some time directing a school of illustration in Chicago.

### A FINE ORANGE ORCHARD

The E. W. Young Property Bought by J. W. Dorris.

The orange orchard that belonged to the estate of E. W. Young was sold on Saturday to J. W. Dorris of this city who secured the property at a bargain by reason of the fact that Mrs. Young desired to close out the larger holdings of the estate as quickly as possible.

This is known to be one of the finest pieces of property in the valley, only forty acres of the 120 acre tract being improved. However the improvement on the forty acres is complete and the orchard is in a condition to pay returns at once.

Mr. Young was one of the leading orange growers of the valley and had made orange culture a study. He believed that to get the best results one should study conditions and prepare for them. Thirty acres of the tract were planted to oranges, six acres to almonds and the other four acres of the improved portion are devoted to buildings, mixed fruits, etc. It is said the almond orchard is heavily loaded with young fruit and the oranges could not be in a more satisfactory condition. In order to get the best out of his oranges Mr. Young enclosed eleven acres of his orchard in sheds to protect them from frosts should that be necessary on the theory that it is safer to spend a little money to make absolutely sure immunity from severe temperature.

Another thing Mr. Young looked after was the matter of irrigation. He supplemented his canal flow by the digging of two big wells that will furnish a large amount of water at the time when it is most needed in the event of there being a scarcity in the ditches. Altogether it is one of the finest tracts in the valley and Mr. Dorris has secured a rare bargain in getting hold of it.

### THE RESERVOIR CAMPAIGN

Meetings Yesterday of the Council and Board of Governors.

The board of governors and the council of the Water Users' association both held important meetings yesterday, the result of which it is believed brings into still closer and more harmonious relations the organization through which water storage is to be secured and the landowners whose influence and co-operation at this time is so desirable to the best success.

The regular annual meeting of the council was held at the board of trade room yesterday afternoon, Vernon L. Clark presiding and A. P. Walbridge acting as secretary. The principal business of the meeting was the election of officers to serve for the ensuing year. Mr. Clark was chosen to succeed himself, and for the office of secretary A. P. Walbridge was suggested. In fact, the members were rather insistent, but he declined positively, and Emory Kays was elected unanimously.

The council then took up in discussion the matter of the acquiring of the north side canals, the issue that resulted from the meeting of landowners held on Saturday. Judge Kibbey was present and gave a very instructive talk on the subject. He read the resolution that was yesterday presented to the board of governors, and then explained that at the present time there is nothing for the council to do. When the landowners or the committees appointed by them shall have progressed with their

work to the point of ascertaining on what terms and conditions the canal or canals may be acquired, and when they shall have petitioned the association to take action, there will then be something for the council to consider. Till then all that can be done is to work along harmoniously with that object ultimately in view.

The rest of the committee's deliberation was devoted to the consideration of by-laws of which five sections were adopted. These by-laws relate to the collection of assessments, delinquencies and penalties to be enforced. The council adjourned to meet again the first Monday in June.

The meeting of the board of governors at the association rooms was well attended. The matter of electing a secretary was further deferred and reports were listened to from committees appointed to look after various matters. It was announced that a previous meeting of landowners under the Utah canal had been postponed till next Saturday, and it was also decided that a committee should begin soliciting in the vicinity of Tempe at once for signatures to the articles of incorporation.

The greater part of the afternoon though was devoted to the discussion of the resolution to which reference was made above, designed to outline positively the attitude of the members of the board of governors on the question of the acquiring of present canal systems.

The articles of the association give the board the power to acquire canal systems, a very necessary provision in view of things that may happen in the future. Many landowners who would otherwise sign the articles have been afraid to do so for fear the governors might tax their lands for the purchase of canal systems under which they were not situated. The resolution, which after long discussion was almost unanimously adopted, is as follows:

Resolved, by the board of governors of the Salt River Valley Users' association that the water users under the various canals, within the reservoir district, be requested to organize for the purpose of perfecting means for the acquisition of the canals by them.

That it is the sense of the board that the water users should organize, under such form as they may find most adapted to that purpose, to act concertedly and effectively in the matter of acquiring the distributing canals. That those under each canal should effect a separate organization and such organizations proceed separately, or where conditions make it desirable by uniting two or more of them together.

The board is outlining the plans of the organizers of the association in these suggestions. It is the intention that the water users shall do the work of acquisition of the necessary canals upon such terms and in such manner as they shall deem best. It is further suggested that the various users under the several canals should adjust among themselves their respective rights to the carriage of water and the apportionment of the cost of the canal, so that as the canals shall come under the management of the association the relative rights of carriage of the users will have been determined.

As this work involves much tedious

## Warm Weather

Warm weather is now approaching and the Bear's Cel-Ko-Ko is in demand. We have another refreshing drink, too. Bear's sparkling Ginger Ale. Both are appetizers and wholesome. You get them at

We are careful and prompt.

detail it is urged that it be begun promptly and be prosecuted vigorously and continuously until completed.

The time for the commencement of this work has been greatly hastened by the early and favorable consideration by the secretary of the interior of our plans.

The board wishes to remind the water users that delay in the perfection of our plans may result in an indefinite postponement of the project, or its final defeat. The matter is of too great importance to warrant hesitation or uncertainty.

One phrase of the resolution perhaps needs explanation except to those who are familiar with the situation and well posted. That phrase is: "So that as the canals shall come under the management of the association, the relative rights of carriage of the users will have been determined."

Some landowners under the Maricopa, for instance, hold shares of stock in the canal, others hold water rights, others hold both water rights and shares, and some have neither, making four classes of landowners under the canal whose "relative rights" must be determined.

Green-Jones came to me with a great financial scheme a few months ago and offered to let me in on the ground floor. Brown-And of course you went in. Green-Yes.

Brown-How did you come out?  
Green-Didn't come out at all. There were no exits.-Chicago News.
