

Chance for an Ideal Vacation Is Offered by National Guard

You school boys 8 years and older—have you a job? Do you know how scarce jobs are in Phoenix? What are you going to do after school is out to make some necessary spending money? Do you know that there are only 11 days more of school and that it is high time you found something to do for the summer vacation? These are very important questions, school boys.

A chance is being offered to all boys over 18 years of age to make from \$5 to \$25 per day from May 23 to June 13. Say, school boys, what about it? Can you beat it? Here is your chance. Join the guard today. Report to the sergeant at the armory and go to the border. You will certainly enjoy it. Only eight hours work a day with athletics and good times and eats and all that. Mass athletics and competitive athletics will be big features of the encampment. And those eats! Yes, boy, you just ought to see those eats! Ask any of the men who just returned from the state shoot and they will surely tell you they had the time of their lives. And as to the food, oh boy, none such at home! Sergeant Mickey and Sergeant Wieberg actually ate so much at the state shoot that they were unable to hit the bull's eye.

Now, you lad without a job, what

do you say? Why not join and take a good vacation on full pay, free grub and free clothes? Isn't that better than "sticking around" Phoenix without a job and none in sight? No money and no place to go. Saturday, from 11 o'clock on, you will be given a chance to meet the recruiting officer at Mason's pharmacy. Be there early and avoid the rush. Erskine Mason is a good sport and a patriotic citizen and he has gladly given permission to recruit at his drug store on Washington street. Remember the place, East Washington street, and remember the date, Saturday, after 11 a.m.

You business man, don't you think it would be nice to take a little vacation on full pay? Well, here is your chance. And that overworked assistant of yours, don't he look haggard and distressed from business worries and worldly troubles? Send him down to Mason's pharmacy on Saturday and have him join the guard and get that badly needed vacation. Eh, what? Yes, boy, don't forget the place and the date, Mason's pharmacy on Saturday, Lieutenant Holsinger of the 158th infantry will be there and will gladly inform you of this wonderful opportunity. Think, old boy, of being a member of the old 158th! The old regiment of which all are proud. Some

WAR CHIEFS AT FUNERAL—Not since the early part of the war have photographs like this of the famous "Big Three" of Germany come to the United States. The group was snapped in full imperial regalia at the funeral of the former Kaiserin at Potsdam. Left to right, Admiral von Tirpitz, General von Hindenburg, General Ludendorff. Hundreds of officers were in the line of march.

WEAR WASH NECKTIES

Our stock of wash neckties this year is very large and elaborate, includes all colors and combinations as well as the fabrics specially designed for washable ties. See our washable tie window.

Oldest Diplomat In World Dies At Age Of 102 Years

(Republican A. P. Leased Wire)
MILAN, May 12.—Count Giuseppe Grillo, Italy's centenary statesman, died yesterday. He was taken ill while attending the races yesterday. The count long had been one of the most picturesque characters among Italy's distinguished men. Born 102 years ago, he maintained his active life up to the very last, due to his remarkable physique.

The count, who for a number of years had been known as the world's oldest diplomat, began his diplomatic career in Vienna under Metternich, and in 1846 was appointed diplomatic adviser to Marie Louise, empress of France. He was Italian ambassador to Paris under Napoleon III and served at London, Stockholm,

REPORT PAYMENTS OF CITY TAXES MORE PROMPT THAN USUAL

City tax returns this year were beyond the average. Payments were made very promptly, the greater part of the taxes being paid before the time extensions were made, according to City Assessor Trevillian. May 31 marked the close of the last extension of time limit for city taxes. Assessor Trevillian estimates that about 80 per cent of the taxes have been paid. Although exact figures were not available, it is possible to obtain an idea of the taxes paid into the city from the fact that the total city assessment for 1920 was \$42,849,531.

George Kirkland, an official in the office of the city tax collector, expressed the opinion that more back taxes were paid into the city this year than ever before in the history of the office.

"For some unknown reason people of Phoenix seemed willing and even anxious to pay their taxes as promptly as possible this year," he said, "and the very satisfactory results were obtained without any extra effort being put forth by this office to collect."

Even those who suffered temporary financial setbacks from closing of banks in the valley found an immediate way to meet their taxes, as all checks on suspended banks were taken up within a few days.

Failure to make payment of taxes when due carries a 15 per cent penalty on the first installment. If the first installment is paid when the second becomes delinquent, the penalty is five per cent on the second installment, but if the first installment is not paid when the second installment falls due an extra 5 per cent is added to the first installment, making a total of 20 per cent in addition to the 5 per cent against the second installment.

No property has been sold by the city for taxes since 1907.

Child Employees In U. S. Show Increase

(Republican A. P. Leased Wire)
WASHINGTON, May 12.—Increase in the number of child employees in the United States has been almost exactly proportionate to the increase in total population in the last eight years, according to the United States department of labor. Statistics compiled by the children's bureau show that 74,194 minors took out permits in twelve representative cities in the country to go to work in 1920. This compares with 67,169 in 1913, an increase of 13 per cent.

Naval officers are now permitted to wear civilian garments when not on duty.

SMALL EARTHQUAKE STAGED IN CUTTING HIGHWAY PAVEMENT

People living along the newly paved Henshaw road yesterday thought an earthquake had shaken that vicinity. Men of the engineering department of the county highway commission were cutting the road at that point to relieve the buckling which had thrown up one edge at an expansion joint about two inches. The cutting was done about 20 feet back of the joint.

The cutting, accomplished by boring a row of holes through the pavement across its width. These holes are made to touch each other. The boring was done from each side. The row had been completed except for a width of 22 inches in the middle when suddenly there was a movement so violent that men who were standing on the pavement were nearly thrown from their feet. That 22-inch space was crushed, or rather the top of it was sheared off, over a space 18 inches wide. There was an accompanying noise like a cannon shot.

When the movement subsided, it was found that the inch-and-a-half space made by the cutting had been filled by the joining of the two ends. Just before the movement one of the workmen had brushed out with his hand pieces of rock and concrete that had fallen into the crevice.

It was found that the pavement had moved for 100 feet away from the cutting. This incident has shown the advisability of finishing these cuttings in the early morning hours before the expansion is at its height. It has been demonstrated that the concrete work is a great deal better than it had been supposed to be. It does not crush under the stress which cut clean straight holes regardless of what they encounter, either cement or those hard, small, black river boulders. At one point three holes were bored through a boulder which was broken in two, each part adhering to the cement in which it had been embedded.

\$5,000,000 In Gold Arrives From London

(Republican A. P. Leased Wire)
NEW YORK, May 12.—A \$5,000,000 gold shipment said to be the first of a series to be made by the government of Great Britain to aid in the retirement of its 3½ per cent bonds maturing here, arrived yesterday aboard the steamship Mauretania. In addition to the Morgan consignment, the Mauretania brought a \$3,000,000 gold shipment to another banking house.

The flow of gold into the United States during the last month approximated \$50,000,000, making the total since the first of the year in excess of \$231,000,000.

(National Crop Improvement Service)
"THE methods of farming generally practiced do not maintain the fertility of the soil and the practices which have been largely responsible for the decreased productivity are:

(1) Erosion or the washing away of the surface soil; (2) the depletion of organic matter of the soil; (3) lack of a rotation or growing the same crop continuously; (4) the failure to grow a sufficient acreage of leguminous crops, to maintain the nitrogen content; (5) the depletion of the supply of mineral elements of plant food." says Prof. L. E. Call in Kansas bulletin (No. 229), prepared by himself and Prof. Throckmorton.

A great deal of valuable information is given on how to overcome these difficulties by the use of proper rotations, the restoring of the straw to the land,

green manuring, barnyard manure and the use of commercial fertilizers. Professor Call is of the opinion that commercial fertilizer should be used only when necessary to supply an element of plant food that is deficient in the soil. Potassium is present in Kansas soils in liberal quantities, he says, and may be seldom supplied in commercial form with profit. Nitrogen may be secured from air by the use of leguminous plants. Phosphorus is the one element which is deficient in the soil and for which there is no ready source of supply. Phosphorus in the form of steamed bone-meal or acid phosphate will generally repay the expense in a materially increased crop. Any powdered fertilizer may be applied to the surface by the use of a perforated drum, as shown in the illustration. Lime, where the soil is sour, can be probably added in a like manner.

Additional News of the Korrick's Department Managers' Sale!

"I've Beat Chaplin's Antics a Mile With Boys' Clothing and Furnishings"

Mrs. Hunt, Manager Boys' Clothing and Furnishing Goods Dept.

and Mrs. Hunt strutted back and forth a la Charlie, holding up suit after suit.

"I want their mothers to know this has the last big Chaplin picture beaten. 'The Kid' is good—but when I sell Boys' Clothing, Hats and Furnishing Goods at these little prices, it's a thriller!" Mrs. Hunt declared.
