MERCUR A POOR CRUTCH.

Experience is a dear teacher, as those who pin their faith to Mercury find out sooner or later. This power. ful poison combined with Potasa, is the treatment generally prescribed for Contagious Blood Poison, but failure and disappointment is the invariable result. These minerals drive in the sores and eruptions, and apparently the disease is gone and the patient believes the cure permanent, but soon learns better when the old symptoms return almost as soon as the treatment is left off. You

must either keep the system saturated with mercury or endure the tortures of sore mouth, ulcerated throat and the mortification that one naturally feels when the body is covered with disgusting sores, rashes, copper-colored splotches and other aggravating symptoms of this vile disease

Mercury and Potash are poor crutches, and their use eventually breaks down the constitution, ruins the digestion and cause the bones to decay. S. S. S., a guaranteed purely vegetable remedy, is the only antidote for Contagious Blood Poison. It destroys every atom of the deadly virus, overcomes the bad effects of the mercury and cleanses the blood and system so thoroughly that system so thoroughly that never after are any signs of the disease seen. Nor is the taint ever transmitted to others,

We will send free our book on Contagious Blood Pelson, which is interesting and contains full directions for treating yourself at home. Medical advice or any special information desired given without charge.

THE HAIR BRUSH.

Breeds Dandruff, Which Causes Falling Hair and Finally Baldness.

Prof. Unna, Hamburg, Germany, European authority on skin diseases, says that dandruff is as contagious as any other malevolent disease, and that one common source of the spread of dandruff is the use of the same hair brush by different persons. The way to avoid catching dandruff or any other disease from another's brush is to insist on the use of Newbro's Herpicide. It not only kills the dandruff germ, but it is also an antiseptic that will prevent the catching of any disease whatever through contagion of an other's brush.
