WHEN HER BACK ACHES

A Woman Finds All Her Energy and Ambition Slipping Away.

Santa Fe women know how the aches and pains that come when the kidneys fail make life a burden. Backache, hip pains, headaches, dizzy spells, distressing urinary troubles, all tell of sick kidneys and warn you of the stealthy approach of diabetes, dropsy and Bright's disease. Doan's Kidney Pills permanently cure all these disorders. Here's proof of it in a Santa Fe woman's words:

Miss Adela Arias, living at 106 Griffin St., Santa Fe, N. M., says: "The use of Doan's Kidney Pills in my case brought quick and thorough relief from a disordered condition of the kidneys that has troubled me for some time. I suffered from a dull heavy aching in the small of my back, the attacks always being aggravated by colds, and in addition to this trouble, I was often aggravated by colds. I was often distressed with headaches and dizziness. My attention was first called to Doan's Kidney Pills about three years ago and procured a box at the Ireland Pharmacy, their use proved the claims made for them genuine. Off and on since that time whenever occasion has required, I have used Doan's Kidney Pills and the quick and positive relief always obtained is what warrants my high appreciation of this medicine."

PRESERVING THE WHITE PINE FORESTS

This Species of Timber So Scarce Now That It Is as Costly as Finest Hardwoods.

The position which the United States has held as a lumber-producing nation has, perhaps, been due more to white pine than to any other wood. The timber of this valuable tree which has played a most important part in the material development of the nation is fast disappearing and now it is as costly as the finest American hardwoods.

Rev. Edward Everett Hale, the chaplain of the Senate, who has always taken an interest in forestry, deprecates the passing of white pine as our foremost wood, and tells how in his own lifetime he has seen the day when "the masts of every vessel that sailed the Seven Seas were made from New England grown pine; while today very little white pine is cut in New England big enough to furnish a good-sized spar." He tells also, to illustrate the interest cost of the wood that he ordered a set of book shelves on which the cabinet-maker made a price, and then asked whether they should be of mahogany or white pine.

The white pine has shifted from New England to the lake states, and Michigan was the leading lumber-producing state for twenty years, from 1870 to 1890, with a supremacy based on white pine. In these two decades the cut was 160 billions of board feet, valued, at the point of production, at not less than two billion dollars, or nearly half as much again as the value derived from all the gold fields of California from their discovery in the late forties until the present. The rich forests of Michigan were once thought inexhaustible and lumbering continued in a most reckless manner for years. Suddenly the people awoke to the fact that the thoughtless destruction of the trees had thrown 6,000,000 of acres on the delinquent tax list. These white pine barrens point to the terrible penalty of wasting the forest resources which should have been the heritage of all future generations.

An idea of the increasing scarcity of white pine timber is given by the New York F. O. B. quotations, on a basis of carload lots. "Uppers" of the best grade, cost \$97 to \$114 a thousand board feet and the "selects" or next lower grade cost \$79.50 to \$99.50. Men who are not yet middle-aged remember the time when these grades could be purchased at \$15 to \$25 a thousand feet. The present quotations on quartered white oak, which are \$75 to \$80 offer another basis of comparison which indicates the condition of the market for white pine.

The best stands of this timber now in this country are in scattered sections in Minnesota, New England, and parts of Idaho. The species in Idaho is sometimes called silver pine. Some of the country's best white pine is found on the Indian reservations in Minnesota and Wisconsin and scattered stands are found in the states of Wyoming, Montana, Colorado, and one or two other states. At the present rate of cutting the tree will soon be practically a thing of the past. The small stands in the National forests are inconsiderable, but they will be managed with the greatest conservatism by the government through the Forest Service, and through this method and practice of reforestation it may be hoped that the fine old tree will furnish timber for other generations.

A prospecting party composed of Roscoe Broyles, Ira Jones and J. F. Nugent, have been in Old Mexico for some weeks. They have returned

with fine reports of opportunities, both mining and otherwise in that country. H. Collings has vacated the position of yardmaster in the local railroad yards and E. G. Jacobs has succeeded him.

Orogrande has had a large number of prospectors and home-seekers the past few weeks. The impression of the town and community must be favorable as many are settling here and going into business. A number of mining claims have also changed hands.

This place is the postoffice and business headquarters of the men who are pushing the town of Sacramento City. This new place will be the logical metropolis of the irrigated section of the Sacramento Valley. The promoters of Sacramento have sold a good many lots in the past few weeks.
