All contracts and bills for advertising payable monthly.  
All communication intended for publication must be accompanied by the writer's name and address—not for publication—but evidence of good faith, and should be addressed to The Editor. Letters pertaining to business should be addressed to New Mexican Printing Co., Santa Fe, New Mexico.

The New Mexican is the oldest newspaper in New Mexico. It is sent to every Post Office in the Territory and has a large and growing circulation among the intelligent and progressive people of the south-west.

SATURDAY, JULY 6.

KATE FIELD announces in thunder tones that she never wore bloomers or mounted a bicycle! There, now!

New Mexico is well represented at the national educational convention which opened in Denver yesterday. Good.

The municipal school boards of New Mexico can do nothing better than put a part of their funds into kindergarten work. Try it one year.

Young Emperor William took care not to hint that the idea of the Baltic and North Sea canal originated in the massive brain of Prince Bismarck, but nevertheless such is the fact.

SURELY the heaven of real reform is working in Kansas. Mrs. Mary Elizabeth Lense is reported to have quit politics and gone to baking bread. Let the band strike up some lively air.

A few days ago an enterprising Newport newspaper made the momentous announcement, "Mrs. Willie K. Vanderbilt's hair-dresser has arrived!" Since then that fashionable and attractive summer resort has been rapidly filling up with society snobs and loafers.

The year 1896 promises to be a good one for railroad building in New Mexico. Even the innocent little pionon nut is to contribute its share toward the general prosperity. As a factor in business throughout the rural districts the pionon is not to be sneezed at. The crop is heavy this year and it will be a very poor country merchant who doesn't find his home trade materially increased thereby.

It is sincerely hoped the report current in the Mesilla valley that Chicago capital has been induced to take hold of the Seljen dam project is well founded. From what it knows of the situation the New Mexican is inclined to give credence to the report. Such an undertaking must prove of immense benefit to the valley and of profit to the promoters some day, and the first company in the field will have the pick of the several good sites to be had along the Rio Grande south of Socorro.

It is alleged that ex-Speaker Tom Reed is hunting assassins for his blood in the woods of northern Maine, but no one seems to know just what has become of Vice President Adlai Stevenson. Doubtless both of these gentlemen will disclose themselves in the course of human events and much stranger things have happened than would be their nomination as opposing candidates for presidential honors in 1896. Unquestionably Reed could carry Maine and Stevenson Illinois.

WHEN it comes to clenching at straw, taking advantage of every petty legal quibble and delaying in every manner possible the attainment of the ends of justice, the attorneys for the self-confessed assassins of poor Francisco Chavez may be relied on. If they stopped there the law abiding public might still be patient, but when there is added to this an attempt to bribe witnesses and intimidate jurors their conduct verges very closely on the code of ethics as recognized by most jurists, and supposed to be part and parcel of the creed of the New Mexico bar association.

## RECOGNITION OF MERIT.

Observer Hersey received a telegram from Prof. W. L. Moore, the newly appointed chief of the weather bureau, formally assuming charge of the bureau. The appointment of Prof. Moore to the position of chief of one of the most important bureaus under the United States government is a fitting recognition of the working force of the weather service. Prof. Moore was connected with the weather bureau under the signal corps for more than fifteen years and remained with same at the time of transfer to the department of agriculture in 1891. He has worked his way from the position of assistant observer through all the grades of the service to the honorable station he has now been called to fill by pure merit, and the news of his appointment will be received with enthusiasm by the employees of the weather bureau. Secretary Morton has contended from the first that important positions in the weather bureau should be filled as vacancies occurred by the appointments from the working force of the bureau whenever practicable.

## BUREAU OF INFORMATION.

The enterprising and vigilant St. Louis Republic has established a novel bureau of information for the public, by means

of which it is now prepared to answer all queries that may be asked respecting summer and health resorts, vacation tours and educational institutions, free of charge, whether on sea, lake, river or mountain. Particular attention will be paid to the subjects of attractiveness, healthfulness, accommodations, expenses and routes of travel, without advertising one to the disadvantage of another or discriminating between rival transportation companies or hotels. The competent corps of clerks employed at this intelligence office has already gathered and systematized a vast amount of information for the purposes indicated, and desires to add to their accumulation every scrap of information that can be obtained of any resort in the United States. This information will be promptly furnished to the public when solicited, but the clerks will not be permitted to suggest a resort unless asked, and then a number of places that seem to meet the requirements of the questioner will be mentioned. The enterprise merits praise, encouragement and support. The cordial invitation for information to place in the indexed files of the bureau should meet with a prompt response from the Board of Trade and Masonic Sanitarium association, of Santa Fe. The facts regarding the peerless climate, beautiful scenery, splendid fishing, and other attractions of this city and vicinity, should at once be set forth in concise form and forwarded to the St. Louis Republic.

## PRESS COMMENT.

### Diversity of Crops.

It is noteworthy that Pecos valley farmers do not adhere to the single crop plan. True, they all raise alfalfa, but they will use it for feed and pasture for hogs, cattle and sheep when the hay market is not profitable. They all raise some Egyptian corn for feed, but almost everyone is also growing an orchard and producing various things to convert into ready money. They are all advocates of diversified farming, and can raise the food they consume except coffee, tea and sugar, while even the latter commodity will be made from home grown beets as soon as a factory can be established. The era is starting right.—Eddy Argus.

### Assessment of Property.

The necessity of having a more comprehensive law in this territory in reference to the assessment of property is apparent every time an assessment is made, but our legislators have never yet been able to agree upon a just and simple law in relation to the assessment of taxes. Under the present law the assessor is little more than a figurehead. Property owners make their returns and the assessor is powerless to do more than to record a raise to the county commissioners. As it is impossible for the county commissioners to know the value of all of the property of a county the members of the board are many times unable to decide as to whether the property owner or the assessor is at fault. In some of the counties in the territory it is notorious that the property is not assessed at anything like its true value, in the other counties fair returns are made of the property. Of course these counties pay more than they ought to pay into the territorial treasury. Grant county belongs to this latter class. The matter should be brought before the next legislature and a bill should be passed to remedy the evil.—Silver City Eagle.

### The Potato Problem.

The Eddy Argus reports that the potato question is settled in the Pecos valley and that hereafter the valley will produce large crops of that Irish luxury. Mr. A. E. Goetz has been experimenting and has found that it is simply a matter of getting the right kind of seed. He tried many varieties, most of which produced plenty of tops but few potatoes. He finally found a variety which produced a good crop of tubers, and what is better, will produce two crops a year. The first crop, if planted the latter part of February, will mature in June, while the second crop can be planted in July and dug in November. There is before the report bulletin No. 119 of the Michigan experiment station, which shows that there is a great many varieties of potatoes, some of which produce valuable crops and some of which are worthless in the vicinity. It reports experiments with 115 varieties of potatoes, eighteen of which are declared worthless, thirty-eight are good, and the rest will be subjected to further experiment. During the past three years the station has experimented with 400 different varieties and pronounced sixty of them worthless in that section, although these rejected ones may be of value in a different soil and climate. In the same period of time Professor Blount of the New Mexico experiment station has experimented and discovered that George Crook's wild potatoes will not produce a crop when planted in the peach orchard, nor when planted in the field, and consequently they are worthless. The matter is referred to the new professor of agriculture at the experiment station, with authority to experiment and report.—Lordsburg Liberator.

## THE NEW MEXICAN

# The PECOS VALLEY of NEW MEXICO

**OFFERS** unequalled advantages to the farmer, fruit grower, live stock raiser, dairyman, bee-keeper, and to the home-seeker generally. The soil of the Pecos Valley is of high average fertility, and under irrigation produces bountiful crops of most of the grasses, grains, vegetables, berries and fruits of the temperate and some of those of the semi-tropical zone. In such fruit as the peach, pear, plum, grape, prune, apricot, nectarine, cherry, quince, etc., the Valley will dispute for the pre-eminence with California; while competent authority pronounces its upper portions in particular the finest apple country in the world.

Enormous yields of such forage crops as alfalfa, sorghum and Egyptian corn make the feeding of cattle and sheep and the raising and fattening of hogs a very profitable occupation. The cultivation of canebrake—a tanning material of great value—is becoming an important industry in the Pecos Valley, a home market having been afforded for all that can be raised, at a price yielding a handsome profit.

The climate of the Pecos Valley has no superior in the United States, being pre-eminently healthful and health restoring. Lands with perpetual water-rights are for sale at low prices and on easy terms. The water supply of the Pecos Valley has no equal in all the arid region for constancy and reliability; and this with the superb climate, productive soil and the facilities afforded by the railway which extends through the Valley's entire length, will cause these lands to enjoy a constant, and at times rapid, increase in value.

The recent completion of the Pecos Valley Railway to Roswell will cause the more rapid settlement and development of the upper portions of the Valley, including the rich Feliz section. The company has recently purchased many of the older improved farms about Roswell, and has now for sale lands to meet the wants of all—raw lands, partially improved lands, as well as farms with houses, orchards and fields of alfalfa and other crops. In the vicinity of Roswell several pieces of land have been divided into five and ten acre tracts, suitable for orchards and truck farms in connection with suburban homes. Certain of these tracts are being planted to orchards, and will be cultivated and cared for by the company for three years at the end of which period they will be handed over to the purchasers. Write for pamphlet fully describing the terms and conditions on which these several classes of tracts are sold.

FOR FULL INFORMATION REGARDING THE PECOS VALLEY WITH COPIES OF ILLUSTRATED PUBLICATIONS ADDRESS

The Pecos Irrigation and Improvement Company,  
Eddy, N. M., or Colorado Springs, Colo.

## VIGOR OF MEN

Easily, Quickly, Permanently Restored.

Weakness, Nervousness, Debility, and all the train of evils from early errors of later excesses, the results of overwork, sickness, worry, etc. Full strength, development and tone given to every organ and portion of the body. Simple, natural methods. Immediate improvement seen. 2500 references. Book, explanation and proofs mailed (sealed) free.

ERIE MEDICAL CO., Buffalo, N. Y.

## FLAT-OPENING BLANK BOOKS

Being satisfied that if you have once used a flat-opening book, you will always use them, and in order to get you to try one of the New Mexican Printing Co. of Santa Fe, will sell you HAND-MADE BLANK BOOKS, bound in full leather, with patent FLAT-OPENING STUBS, with your name and the number, or letter, of the book on the back in gilt letters, at the following low prices:  
54 p. (400 pages) Cash Book - \$5.50  
64 p. (480 " ) Journal - 6.00  
74 p. (560 " ) Ledger - 7.50  
They are made with pages 10 1/2 x 16 inches, of a good ledger paper with round cornered covers. The books are made in our bindery and we guarantee every one of them.
