

DAY, GIDDY AND NICE.

WHITE gloves have returned to favor for morning as well as evening wear. REAL lace veils, of the large and fashionable size which delighted our grandmothers, are coming into style again.

The "round table shirt," which is cut out of goods five yards wide, and has no seam, is at present the most popular one. Nothing surpasses this in fit.

The waist trimming of a recently imported dress exactly resembles the wings of butterflies, as though one of these creatures was perched on each shoulder.

WHITE kid and suede sailor hats are now this season, but straw takes the lead, with quills for trimming, while a more fancy sailor has roses around the crown and under the brim.

A PRETTY idea for a bridesmaid's costume is a gown of soft white silk with pale green sash and shoulder cape of white lace; large white leghorn hat trimmed with yellow tea roses and green foliage.

CLEAR white muslin is used for dresses which are worn over colored silk. The skirt is of three deep flounces with wide hems and colored ribbon run in the hems. Waist of silk, draped over with muslin, and a broad soft sash of the color at the waist.

LADIES OF EUROPE.

LADY SOMERSET has been re-elected president of the British Women's Christian Temperance union.

The emperor of Russia has purchased for \$500 through agents in Copenhagen two rare antique crosses, one dated 1619, both curiously carved.

MISS FLORENCE BRYAN, an English lady, recently became the wife of the Maharajah of Patiala, in the Punjab, having previous to the nuptial ceremony been received as a member of the Sikh religious order.

On the afternoon of her release from jail, the dowager duchess of Sutherland was waited on by a deputation of friends, who presented, through her secretary, \$250, the amount of her fine, together with a piece of silver plate.

QUEEN VICTORIA has just passed her seventy-fourth birthday. Princess May, who will probably be queen herself some day, has just celebrated her twenty-sixth birthday. Her majesty sent, as a gift, an exquisite Yorkist rose, in white enamel and gold, a piece of romantic sentiment which was quite charming.

PEOPLE ACROSS THE SEAS.

The German emperor alone has a right to have a coach and six in Berlin.

This prince of Wales has presented Mrs. Adeline Fatti with a large portrait of himself, bearing his signature.

LORD LORKE receives six thousand dollars a year as governor and constable of Windsor castle. Absolutely his only duty in this sinecure is to sign a receipt for his salary every quarter.

BARONESS HELENE REDEK, aged seventy-nine years, was sent to the Vienna workhouse as a vagrant last week, upon her avowment that her relations would not support her. She is the widow of a millionaire and mother of the privy councillor, Baron Redek.

THE heir to the throne of Austria, accompanied by a prince and two counts, will be in this country early in the autumn. He is Archduke Francis Ferdinand d'Este. He is a young unmarried man, and one story has it that he is traveling around the earth in search of a wife.

STATED IN FIGURES.

THERE are now about 18,000,000 sheep in New Zealand.

THE Bank of England has reduced the discount rate from 4 per cent. to 3 per cent.

GUTTA serena was first introduced into Europe from Malaga in 1852. The annual consumption now amounts to 4,000,000 pounds.

The largest yield of oranges in Pomona, Cal., this year was from a grove of trees over 17 years old. Six acres yielded 3,500 boxes. Two trees yielded 55 boxes.

The revenue returns of New South Wales for May show a decrease of \$120,000 as compared with May, 1892. Custom returns fell off \$50,000, and railway receipts \$28,000.

PAMPAS GRASS is said to cover an area of 1,500,000 square miles in South America. It was first grown for market in California in 1873, and in 1890 a 28-acre ranch yielded 200,000 plumes.

MEN OF MIGHT AND MEANS.

KATE FIELD says that Edwin Booth cast a vote for Abraham Lincoln for president, but never voted before that occasion or after.

GOV. NORTHUP, of Georgia, is an old school-teacher, and the ruling passion urges him to spend a good part of his time attending school institutions and commencing.

DR. G. C. GRANDSON, a colored man and late president of Bennett college, Greensboro, N. C., is described as one of the foremost orators not only of his race, but of the day. He has a dash of Indian blood in him.

THE newly elected president of the Atchison, Topeka & Santa Fe railroad is but forty-one years of age. The responsibility thus placed upon this young man may be in a measure realized, when it is known that the Santa Fe has a capital of four hundred million dollars and employs twenty-five thousand men.

BRIGHT RAYS OF LIGHT.

PRIDE is hard to master.

The lazier a man is, the more he claims to be sick.

A LIE can run fast, but the feet of truth never slip.

WHENEVER love talks to us, it speaks our mother tongue.

GIVE some people money enough, and they will vex themselves to death.

It is hard for a fool to understand why he is seldom overtaken by anyone going his way.—Ran's Horn.

R. E. L. Robinson, he of the sloop Examiner notoriety, now reported as meeting with death at the hands of "murderous and cannibalistic savages" on the island of Tyburon, must furnish us with positive proofs of his death before we shall turn our column rules in mourning for his untimely end. This may sound heartless, but then you see, we doubt the woful tale.—Gila Bend Leader.

ARIZONA.

Arizona stands at the threshold of an era of wonderful social and industrial development. There can't be a doubt about the fact. The dawn for which she has waited so long is breaking at last. There is every promise of a day of great prosperity and permanent upbuilding just before her. The impulse of a new and energizing hope is visible everywhere among her people, while the cumulative effect of many things, which made but small impression as they transpired singly, is now commanding for her a full share of attention and interest abroad among home-seekers and capitalists.

A lively competition has sprung up for the possession of things which have heretofore gone begging for ownership. There is a scramble for franchises. Nothing more surely indicates a great industrial awakening than this. The rates of interest are falling to moderate figures. Nothing more surely indicates confidence and competition among the money lenders than this.

Arizona has reached that climacteric period which every western state has experienced sometime in its history when, after long and weary struggle and doubt, with each side of the balance first up and then down, the clouds of despondency have suddenly rolled away, and a sunburst of energizing hope has thrilled the drooping spirits of the people to greater and braver endeavor than before.

For the last twelve years the subsidence of the great Tombstone boom and the completion of two transcontinental lines of railroad across her territory—Arizona has rather dropped out of public attention, but in that time she has been quietly accumulating a fund of substantial wealth and a force of moral character which qualify her now to rise up and take her destiny in her own hands.

The population of Arizona is Mexican. This is a mistake of great importance from the moral point of view. There is but one considerable center of Mexican population in the territory, the city of Tucson, and even there it is not by any means at present the predominating element. It think it is certain that Arizona has not to-day nearly so large a Mexican population as Colorado and not above one-tenth as much as New Mexico.—"Fitz-Mac," in Denver News.

PRODUCTIONS.

Being in the latitude of Persia, with similar climate, it is not unreasonable to infer that there should be a close relation in productions. Of the cereals, all do equally well. On the alluvium along the river, from 40 to 60 bushels of wheat per acre can be raised, and proportionately of oats and barley. Corn can be grown if planted very early or very late. Sorghum and the true cane grow very luxuriantly. Cotton becomes a perennial plant in Yuma having grown from one seedling twelve years in succession. The lint may be gathered continually from June to January. The cedar bean grows into miniature trees, and are as long lived as many of the ornamental trees of more northern latitudes. Hemp is indigenous along the Colorado river, its fiber being of good quality. Ramie will do equally well as hemp, and the time will come when its cultivation will become an important industry. The same may be said of flax and tobacco.

It is in the realm of the golden Pomegranate where the infinite riches of this country will be found. All the citrus fruits are at home in Yuma. The orange, the lemon and the lime make fragrant with blossoms and fruit all the days of the year, and such oranges, lemons and limes as grow nowhere else in the United States. Mexico and the islands of the sea do not produce finer oranges in size, flavor and color, they are simply perfect. The lemon is equal to Sicily, than which none finer grow. The lime is as large, juicy and purely acid as those of Acapulco, Mexico, from whence those for the California market largely come.

They Want Names.

The Russell Art Publishing Co., of 925 Arch Street, Philadelphia, desire the names and address of a few people in every town who are interested in works of art, and to secure them they offer to send free, "Cupid Guides the Boat," a superbly executed water color picture, size 10x13 inches, suitable for framing, and sixteen other pictures about same size, in colors, to any one sending them at once the names and address of ten persons (admirers of fine pictures) together with six two-cent stamps to cover expense of mailing, etc. The regular price of these pictures is \$1.00, but they can all be secured free by any person forwarding the names and stamps promptly.

Notz—The editor of this paper has already received copies of above pictures and considers them really "Gems of Art."

After you get angry and stop your paper, says an exchange, just poke your finger into water, pull it out and look for the hole. Then you will know how sadly you are missed. A man who thinks a paper cannot thrive without his support ought to go off and stay a while. When he comes back half his friends will not know he has gone and the other half will not care a cent, while the world at large kept no account of his movements. You will find things you cannot endorse in every paper. Even the Bible is rather plain and hits some hard raps. If you were to get mad and burn your Bible the hundreds of presses will still go on printing it, and when you stop your paper and call the editor names, the paper will still be published, and what is more you will read it on the fly.

Summons.
IN THE DISTRICT COURT OF THE Third Judicial District of the Territory of Arizona, in and for the County of Yuma.
John Gandolfo and Eugene F. Sanginetti, partners under the firm name of Gandolfo and Sanginetti, plaintiffs, vs. Samuel Purdy, E. R. Waggy and Francisco Avila, defendants.
Action brought in the District Court of the Third Judicial District of the Territory of Arizona, in and for Yuma County, and the complaint filed in said Yuma County, in the office of the Clerk of said District Court.
In the name of the Territory of Arizona, to Samuel Purdy, E. R. Waggy and Francisco Avila, defendants, Greeting:
You are hereby summoned and required to appear in an action brought against you by the above named plaintiffs, in the District Court of the Third Judicial District of the Territory of Arizona, in and for Yuma County, and answer the complaint therein filed with the Clerk of this said Court, at Yuma, in said County, within ten days after the service upon you of this Summons, or if served in this said County, or if served out of this said County and within thirty days thereafter, the times above mentioned being exclusive of the day of service, or judgment by default will be taken against you.
Given under my hand and seal of the District Court of the Third Judicial District of the Territory of Arizona, in and for Yuma County, this 1st day of March, A. D. 1894.
C. H. BRINLEY,
Clerk of said District Court.

NORTON'S **Automatic Water Gate**

TO PREVENT OVERFLOW IN

Irrigating canals, Ditches and Reservoirs.

The above cut illustrates an AUTOMATIC WATER GATE, to regulate and keep in subjection the rise of water in canal, due to an over-abundant flow, or to sudden rises in the canal owing to severe rains or storms.
It is particularly valuable to have such a Water Gate placed in lower bank of canal, at such points along its line where there are dikes, ditches, Arroyos, Foot Hills, Buttes, or Tablelands, as any rains or storms bring down at such points a surplus of water that is very dangerous to the banks of canal. The Water Gate, however, will prevent such damage, as it is
SELF-ACTING AND A PERFECT SAFETY VALVE

Believing the canal, at short intervals, of its surplus water, thus preventing the washing away of banks, and causing great damage generally, no alone to canal, but property owners all along the line, who may suffer more or less damage there after for the want of water owing to the damaged condition of canal, and while such repair are being made. Not only is it valuable to relieve canal of its surplus water, to prevent damage and expense, but by its use the first cost of canal construction will be materially lessened, as the banks need not be made so high or wide.
The device is extremely simple, and comparatively inexpensive. Its plan of operation is this: There is a pipe fastened to an opening in the vertical gate, 1. When the body of water rises to the level of the upper end of pipe, 2, water runs freely into the tank, 3, which is immediately filled, thus overbalancing the weight, 4, which is on the other end of lever, 5, thus forcing open the gate, which suddenly relieves the canal of a large surplus of water. When body of water recedes below a certain level, no more water is admitted to the tank; therefore empties itself by a small faucet opening, 6, at the bottom; this being done, the weight overbalances tank, and brings down the lever, which, being rigid to the swinging gate, closes it. This operation continues at short intervals, so long as the body of water keeps rising over a certain level. The lever, gate, pipe and tank are all rigid, and hinge, or pivot, on a horizontal shaft. The gate, flume or box can be made any height width, or length desired. The gate can be hinged between any bulkhead without box.
The Water Gate is a Perfect Safety Valve, and is a body of water what a safety valve is to steam. They can be made any size, corresponding with body of water and size of canal. It is secured by letters patent, and for sale only by

Yuma's Climate.

Weather Observer A. Ashenberger furnishes us with the following important facts relative to the climate, rainfall and weather at Yuma.

The following data from the records of the U. S. weather Bureau are from observations taken for periods ranging from five to twenty years and are published by request of the Hon. Mayor of Yuma:

Mean actual barometer.—Yuma, 29.76 inches; Denver, Col., 24.73 inches.
Mean annual temperature.—Yuma, 73°; Jupiter, Fla., 73°.
Mean maximum temperature during month of July.—Yuma, 106.6°; Phoenix, 107.3°.
Mean minimum temperature during month of January.—Yuma, 42°; Galveston, Tex., 79°.
Mean minimum temperature during month of January.—Yuma, 42°; Tucson, 35°; Phoenix, 32°.
Highest temperature recorded.—Yuma, 118°; Phoenix, 119°; Fort Lapwai, Idaho, 115°.
Lowest temperature recorded.—Yuma, 22°; Riverside, Cal. (Voluntary observer record), 21°; Jacksonville, Fla., 15°; Galveston, Tex., 11°.
Mean relative humidity.—Yuma, 44%; San Diego, Cal., 75%; Chicago, 74%; Pensacola, Fla., 76%; Port Angeles, Wash., 88%.
Mean annual rainfall.—Yuma, 3 inches; Tucson, 13 inches; Jacksonville, Fla., 55 inches; New Orleans, La., 62 inches; Neah Bay, Wash., 102 inches.
Average annual number of rainy days.—Yuma, 14; Tucson 49; St. Louis, 115; Washington, D. C., 126; New York, 128; Baltimore, 133; Chicago, 136; Cincinnati, 141; Atlanta, Ga., 141; Rochester, N. Y., 171; Tatooch Island, Wash., 186.
Average annual number of cloudy days.—Yuma, 17; Sacramento, Cal., 45; Oswego, N. Y., 173.
Average annual number of partly cloudy days.—Yuma, 69; Sacramento, Cal., 76; Oswego, N. Y., 154.
Average annual number of clear days.—Yuma, 279; Portland, Ore., 92; Oswego, N. Y., 68.
Average hourly wind velocity.—Yuma, 6 miles; Denver, City, Kan., 12 miles; Sandusky, O., 13 miles.
Highest wind velocity recorded.—Yuma, 54 miles; San Francisco, Cal., 60 miles.
