## Resources of Yuma County.

YUMA COUNTY.

A white man first set fout on what is now Yuana County in 1771. It is the peet the Missouri river water. A chemical analysi southwest division of the Territory, and one of the four original counties of the Ter- exhibits a conderful similarity in the constitue sitery. Many great reclamation projects are parts of each. That of the Colorado exhibiting however on foot, and in a few years expect to see Yama Courty rated as the rada passes, inother respects the sediment of the

nichost in the Territory. blorado is almost identical with that of the Nile. The first glimpse the travelor from Cali. It will be noticed, therefore, that when this water is ornia catches of Arizona is that of the used for frigation it is superior to artesian warms picturesque town of Yuma, which is snugly situated in the embrace of gentle rolling is extremely rich is dedomposed vegetable matter hills, upon whose creats and sides the and mechanism carbon, readily absorbing the tion and interest abroad among homemodern homes of our superior civilization actial gases, such especially, as oxygen, which en- seekers and capitalists, are crowding the ninde dwellings into the problem of the problem o Arissina, the new empire of the West, upon festility. It also readily takes up and retains is a scrambile for franchises. Nothing more whose undercloped riches the eyes of the meisture, while the firmness of its particles affords surely indicates a great industrial awaken country are at present turned, and as such, every tacility for percelation and the activity of falling to moderate figures. Nothing more she is bound to grow and prosper with a particles are in a state of very fine division, which capidity that at present can hardly be re-slized. But coupled with her geographi-acquiries heat readily in the daytime, and the loss renders it more productive than coarser soils. It cal position we find that she is the center of the heat at night is very gradual, so that it reof a country whose agricultural possibilimains always warm and is not subject to sudden changes of heat and cold, Besides its owenful con ties are practically unlimited, being surstituents of water, organic or vegetable matter und and clay, a chemical analysis shows that line counded by a soil the fertility of which sounded by a soil the leftinity of which said and clay, a chemical analysis shows that line, have suddenly rolled away, and a suntured state of the Nile, and sods, magnesis, iron, ammonia and available forms of energizing hope has thrilled the droop or nitrogen, phosphoric and and perash enter into ing spirits of the people to greater and bloom. Billions of gallens of that precious finid have annually gone to waste at add to its fertility, though, of course, as is always Yuma's very doors, but already a reaction different localities and is not always constant is taking place and many enterprises are is taking place and many enterprises are in the solution of the suplands, or mess, lighter and railroad across her territor;—Arizona has more gravelly and in some places of a rea, loany, rather dropped out of public attention, the yellow Colorade to the thirstly earth.

The sol of the uplands, or mess, lighter and railroad across her territor;—Arizona has calculated across her territor;—Arizona has the yellow Colorade to the thirstly earth.

The sol of the uplands, or mess, lighter and railroad across her territor;—Arizona has calculated across he is taking place and many enterprises are generous. They seem especially adapted for the

#### RIVERS OF YUMA COUNTY,

In regard to climate, healthfulness, fertility and productiveness of soil, facilities will produce a wise that will keep good for fifty or for cultivation, irrigation and abundance of a hundred years, and improve annually, not help water supply, variety of resources and liable to sour, or on exposure to the alc, after one water supply, variety of resources and part old, to become turbid and change color in the cheap transportation by rail and by water, bottle or glass. no part of Arizona can surpass Yuma county, which is destined to become one of can nowhere be surpassed, containing as it does all richest and most prosperous counties in the essential elements of richness and fertility.

It lies between 32° 00' and 34° 20' north latitude and 113° 20' and 114° 40' west longitude. It contains 6,488,520 acres. It is about as large as the States of Rhode doubt, be the principal industry in Yuma County. Island, Connecticut and Delaware com- The remarkable results that have spring from bixed, or as large as either New Hampshire, very superficial and imperfect culture has de-Vermont or Massachusetts.

The western boundary of Yuma County agricultural enterprise. The development of these is formed by the Colorado river, which resources is of the utmost importance and is at separates Arizona from California, The tracting careful attention, Experiments have been county is bounded on the north by Williams made, with eare, and facts in regard to the culture Fork and the Santa Maria river, whose waters flow into the Colorado; on the cast | ical, of the wonderful superiority of Young County by the counties of Pina. Mariecpa and over Southern Chitomia in truly crowing, a Vaveral, and on the worth by Schora, which must lead to a large and varied production Mexico. Its county seat is the town of of the most renumerative character.

The Colorado river drains the entire tercitory of Arizona, and overy drop of water which falls on its mountains and plains on the continent. It is formed of the detritus andaits way to this mighty river. It is which the streams for ages have brought down ormed by the union of the Green and sea. By constact overflows and change of channel, Grand rivers, fed by the streams which the deposit of this rich vegetable matter has form rise in the Rocky Mountains, and the melt- of a soil of extreme fertility. Near the streams it a greater depth of water is a dark alluvial mold, well adapted to small to the wall. in this river in summer than in winter, thus grains and grasse. Further back there is a rich furnishing the most water at the season (avorable for fruit culture. It has been alread) when it is most required for the purposes of irrigation and agriculture.

It will be seen that for the entire distance along its western boundary, Yuma County that the labor of the cultivator is reduced to the possesses the great advantage of cheap minimum. In nearly all of that, two crops a year water transportation.

The Gila river rises in the western part supling before his door, and within the year he has of New Mexico and is fed by numerous a shade tree twenty five feet high. Alighta can be which are the San Pedro, Agua Fria, Hassayampa and Salt rivers. It flows west such a showing? The climate, it must be remem through Yama County and empties into the bored, is nearly perpetual summer. Snow never Colorado at the town of Yuma.

Yuma county, traversed by these great and from its eastern to its western boundaries, possesses a far greater water supply are covered with snow and ice. than any other county in the Territory, and far more than can be found in all Cali-

This water is now being diverted from its give a yield of from twenty-five to fifty bushels to matural channels by means of numerous the acre. Alfalfa, clover, timothy, Bermuda and sarge irrigating canals, and utilized for the all the cultivated grasses grow luxuriantly, the purpose of reclaiming and irrigating the former giving from eight to ten tons to the acre purpose of reclaiming and irrigating the each year. Every variety of vegetable raised in immense tracts of lands which lie in this she United States can be grown in Arizona, and favored country, and which are as fertile nowhere are they found of better quality.

The Southern Pacific Railroad crosses the Colorado river at the town of Yuma and bacco, hemp and rice. With the exception of the runs through the county, following the vation of other staples; but it has been demonstrate generol course, and at an average distance of that the sell and climate are specially adapted gation and cultivation, can find an easy they found the Pinus Indians wearing fabrice satist in this way and can be transported made of cotton grown in the Gila valley. to all the markets and centers of population in the East or West.

that assures to these valley lands a dense popula Another competing railroad is projected from San Diego, California, to the town apple, pear, plum, peach, apricot, quince and necessary of Yama, and thence along the north side tarine, are of delicious flavor, and give a gen of the Gila river. Thus Yuma County will erous yield. The grape of all varieties i a home in these sunny vales. No place in the grape-grow have exceptional railroad advantages.

#### THE CLIMATE OF YUMA.

The climate of Yuma for nine months of and the wine, although its manufacture is yet ex The climate of Yuma for nine months of perimental, is of a fine flavor, difficious bouque the year has no equal, as we believe, in the and unsurpassed by any native product as a table world, and during the remaining three beverage. Experiments with the ratingraps menths of the year, comprising June, July have shown that this climate and soil poand August, the heat is not oppressive. Even though the thermometer in mid-summer may at times rise above 100°, and oc-ossionally even reach 110°, yet, owing to others of the situal family, can be grown success. the absence of moisture to the air, it is not fully in the valleys of Southern Arbons. Oracge ppressive. The almosphere is pure, light trees are now in bearing in the Salt River valley any other region of the West. ppressive. The almosphere is pure, light and at Yuma; while the handless is also being cultivated at the latter place. The Arizona orange in sighest extreme of heat, a person does not quality and flavor will commune favorably with the best California. fest in the Eastern States when the mer-cary is ranging from 80° to 90°. The air is Gils tivers, there is room for thousands. It is not so dry that perspiration is absorbed as soon this broad Union can be found a more desirable as it reaches the surface of the body, and region for the making of a home. No islander at no time in the summer does the best clearing of the land is required; it lies almost produce any stacomfort.

Arisona stands at the threshold of an era of wonderful social and industrial de-velopment. There can't be a doubt about the fact. The dawn for which she has waiten so long is breaking at hast. There is every promise of a day of great prosperity and permanent uphuilding just before her. The impulse of a new and energiated the statement of the second control of gizing hope is wistble everywhere among her people, while the cumulative effect of since it is constantly supplying the land with the richest fertilizing elements. The soil of the valleys pression as they transpired singly, is now as extremely rich in dedomposed vegetable matter commanding for her a full charm of alten-

among the money lenders than this

Arizona has reached that climacticer period which every western state has experiod which every western state has ex-perienced sometime in its history when, after long and weary struggle and doubt, with each side of the balance first up and then down, the clouds of despondency sition in the proportions best adapted to braver endeavor than before,

For the last twelve years the subsidence of the great Tombstone boom and the com-pletion of two transcontinental lines of grape, olive and citrus truits generally. Their soil and a force of moral character which qualify her now to rise up and take her lestiny in her own hands.

The population of Arizona is Mexican.
This is a mistake of great importance from
the moral point of view. There is but one
considerable center of Mexican population in the territory, the city of Tucson, an even there it is not by any means at present the predominating element. It think it is certain that Arizona has not to-day nearly so large a Mexican population as Colorado and not above one-tenth as much as New Mexico .- "Fitz-Mac," in Denver

WHY EMMIGRANTS SHOULD COME TO YUMA COUNTY.

Hecause the climate is perfect. Because the soil is fertile and prolific. Because land is abundant and cheap. Because a home can be made with little !

Because so great a variety of products an be grown. Because the yield is large and the prices always remunerative Because life is a luxury in a land where

the sun shines every day, Because there are chances for a poor a which he can never hope to find in older

Pecause the country is advancing and property values are increasing. Becattse, unlike Southern California is

does not require a small fortune to secure a Because capital does not block all the avences to wealth, nor crowd the poor mar

Because Uncle Sam has yet many farms Yuma county waiting for occupants.

Bacause churches, schools, newspapers valleys is not surpassed by inness of equal area in any part of the United States. So rapid and prolific and railroads are fast developing the moral and material elements of the Territory. Because good land is becoming scarce, and if you don't catch on now, your last chance

of California, The farmers plants a cottonwood Because the country is one of the few gions of the United States that yields the

streams, among the most prominent of cut six these during the season, and it is an actual products of the temperate and semi-tropic Because the worker receives a fair com pensation for his labor, and the 'rustler' has

falls in these southern valleys. The farmer begins to plant in November, and by the middle of that Because there are neither blizzards or his harvest is ready. Roses are in bloom, fruit rivers from its northern, to its southern, trees are blossoming, and the grain fields are a sea tormadoes, earthquakes nor inundations

of green, when the fields of the Eastern farmer snow-storms nor cyclones. Because the vast and varied resources of

the country are yet to be developed. Because the wealth of its mines, its farm ing valleys, and grazing lands, will yet build up a great and prosperous county.

Because a man can make a livelihood her, with less labor than in any other part of the United States.

and strength and vigor under its cloudless tropical valleys produce cotton, sugar case, to-Because the settler need not spend a life-

Because there is health in every breeze,

time in felling trees and grubbing out

Because vegetation is so rapid that in two of about four miles south, of the Gila river, to their successful growth. Cotton-growing is no years the home is surrounded by a growth rendering all the lands susceptible of irri- experiment in Arizona, for it is on record that of trees and alrubs which would require five years to develop in a colder clime.

Because fortunes here await the venture ome, and health welcomes the afflicted Because the country has a brilliant future and you want to be in the "swim."

Because in its pure, dry invigorating air, iety known can be raised in their truitful sells. The cuidemic diseases cannot live or germinate apple, pear, plum, peach, apricot, quince and neehospitable and progressive.

WHY CAPITAL SHOULD SEEK YUMA COUNTY. Pecause its mines are the richest. Because its grazing lands are the best.

Because its farming lands are valuable and L'ecanse it gives assurance of the largest Because its grand resources are yet to be

Pecause it is a young, growing county with an assured future. Pecause the opportunities for engaging is manufacturing enterprises are better than in
