

YUMA COUNTY.

Her Rich Mines-The La Fortuna and King of Arizona-Great Mineral Wealth Vet Undeveloped - Castle Dome Lead Mines.

The County Lies Directly in the Main Gold Belt that Begins in Alaska and Ends in Mexico.

The following article is extracted from Governor Murphy's annual report to the Secretary of the Interior and is an interesting presentation of facts re-parding some of the mineral resources of Yuma county, and a description of two of the richest gold mines; also something of the Castle Lome lead

KING OF ARIZONA.

The gold-bearing property known for a time as the Gleason, has been transferred to the King f Arizona Mining and Mining Company, a cor-poration organized under the laws of the Terri-tory of Arizona, with a cupitalization of a 000,00-

TArizona Mining and Mining Company, a corporation organized under the laws of the Territory of Arizona, with a cupitalization of a 000,000 shares of a par varue of \$1 each. This company cowns four full calms—the Homestalic the kink of Arizona, the Last Hope, and the Much of the Colorado River. It is north of the Gills River and about 40 miles from Mohawk Summit, on the Southern Pacific Railroad This is the nearest station on the railway. There are several other locations besides those conveyed to the King of Arizona.

The Homestake location covers the chief workings up to this date. There is on this islain a strong vein of gold-bearing quarte. This lode or vein has three well-marked divisions or layers. On the hanging wait there is a soft layer from 1 to 35 inches wide, which averages about \$2.800 per ton in value. Next below this there is a middle layer or body of quartz about 25 inches thick, which will average about \$20 inches thick are to be shall average about \$20 inches thick will are in ore. The shaft by which the exposure of the view age about \$20 inches the centre of the shaft at the shaft. The hill rises rapidly both east and west of the shaft the vein has been crossout from wall to wall, showing it 18 feet wile at that point. The ore in the orossout is of

ton. The tunnel then passes through 30 feet of vein matter running about \$1 per ton, thence through 7 feet of oct carrying \$25 per ton to the foot wall. The text, discarrie from hanging wall to foot wall along this tunnel is \$6 feet. A drift has been run along the root want to the home-scake shaft at a distance of 30 feet, and the average value of the ore exposed is \$14 per ton.

DA FORTUNA MINE.

In the early days of gold discovery of California, 1848, when the news reached the gold miner

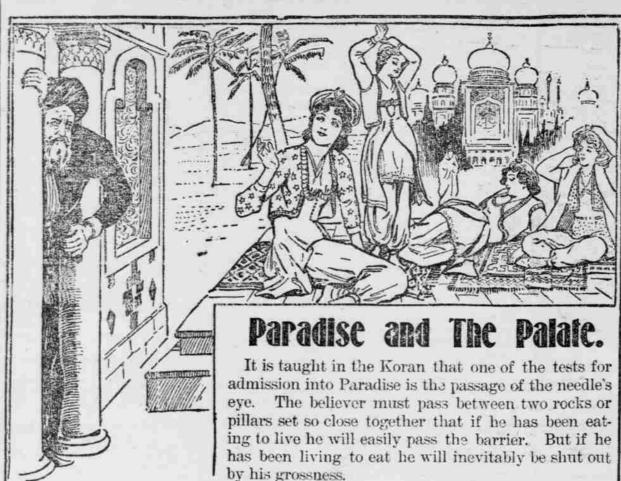

In the early days of gold discovery of California, 1848, when the news reached the gold miners of Sonora, there was a general exodus of the able-bodied men who were able to get away merthwest to the new El Dorado in California, and the state of Sonora contributed many need to the mining population. They took the old road, which was known as the camino road, from Estancia and Altar aorthwestward nearly parallel to the gunt, following the mountain ridge known as the Gills range, just north of our present boundary. The road led to Yunia, and in passing the Gills range they went within a few feet or yards of a very med ast outcrop of quarts which no one seemed to consider of sufficient value to merit any attention. That humble and insignificant quarts outcrop is today the outcrop of the great Fortuna mine.

14. It is situated on the westward slope and nearly at the base of they mange of mountains called on some of the old maps the Gills range. This trends northwesterly and reaches nearly to the Gills river at the point now known as Blaisdell. The rallway in its course to Yunia passes around the northwest point of this range. Where the rocks are exposed at that point they are mostly of homogeneous granite, of gray color and weathered out at the surfaces, which however, are much pitted as if by decomposition of some soft substance. But beyond these low-lying hills of grantic there are big outcrops of rock which to the experienced cre indicate stratified, for the bulk of the range southward and southeastward is composed of regular stratified, laminated, hard gueissle rock. I use the word "genesisle" in a very general and comprehensive sense, for you can describe these rocks with much more accuracy if you localize them as mica slates and hornblendic slates, with interpolations of quartrite beds, especially in the upper part of the series, with green stains, supposed to be stains of copper and decomposition of copper ore, which they probably are, although there are peembarities of color, and some yellow colors, which he

The Best Liniment for Strains.

Mr. F. H. Wells, the merchant at Deer Park Long Island, N. Y., says: "I always recommend Chamberlain's Pain Balm as the best liniment for strains. I used it last winter for a severe lameness in the side, resulting from a strain,

SUCCESS AND THE STOMACH.

The Koran only carries a step beyond the present, the application of a rule of success which is emphasized every day in this life -- success is largely a matter of stomach. From the positive side this would be rather a difficult proposition to prove, because the man whose stomacli is sound hardly knows that he has a stom-But the relation between success and the stomach is easily shown when the negative side of the proposition is considered. There are many men stopped on the highway to success. Some are total failures, some creep along and lead a half life-but still must fail of realizing their largest

ambitions. Why do they fail? Because the stomach has given THE DOCTOR IS RIGHT. out. Food is no longer perfectly digested and assimilated. Inasmuch as the strength and vigor of the body are supported by the nourishment derived from digested and assimilated food, the body becomes weak (for the vital forces are depleted) as soon as the stomaely and allied organs fail in supplying allied organs fail in supplying "They comes". They comes the stomaely and all other narcotics, Carroll Co., Ark. "I felt that there was and all other narcotics, Carroll Co., Ark. In the West the traveler comes on the farm. That's the story of their nourishment is restored.

hundreds on farm and ranch in the wild west.

Every physician knows that the common cause of ill-health is to be found in a deranged or diseased stomach. He knows it and he suffered with pains in stomach, headacts on his knowledge. Whether the disease present is of heart, liver, lungs, kidneys or any other organ, the first organ examined and treated is the stomach.

But the physician does not tell times a physician of experience will frankly recommend "Doctor Pierce's Golden Medical Discovery," saying that the cause of disease is in the stomach and the best medicine for the cure of diseases of the stomach and other is "Golden Medical Discovery."

"Golden Medical Discovery"

is the best medicine for the cure of diseases of the stomach and other organs of digestion and nutrition. "I suffered for six years with con-stipation and indigestion, during which no help for me, could not retain food on my stomach; had vertigo and would fall helpless to the floor. Two years If there is any one fact which more than another needs to be 'Pellets,' and improved from the start. impressed on the rising genera-tion, it is the relation of success covery' I was able to do light work, and have been improving ever since. I am now in good health for one of my I owe it all to Dr.
