He is on the right track, and is working at a method of advertising which has been adopted in almost every important mining district in the Western States and Territories. Eureka is far behind other camps in telling of her worth, and this project of Mr. Scott's is really the first attempt in this particular line. Consequently he finds the introducing of it rather a tedious job, and needs the aid of every one who has a particle of interest in this portion of the State. Time is short. Subscribe and pay up. Republican Powder Fizzles-Demo eratic Powder Rattles the Crock-

TyBo, June 25, 1880. EDITOR SENTINEL:-The news of the nomination of General Hancock seems to give universal satisfaction to the Democracy of this bailiwick. On reception of the nomination it was resolved to ratify with some Democratic thunder. Note the sequel: The Republicans while awaiting the result of the Convention at Chicago, the result of the Convention at Chicago, had gotten a supply of powder for a grand blow out. but on hearing of Garfield's nomination they hadn't enthusiasm enough left to salute, so they offered us their supply at a discount. With the simplicity characteristic of Democrats in submitting to the Electoral Commission, we took it, and so got sold. The few Republicans not knowing the sell and looking on, gave "vociferous hisses" on the fizzle of Garfield powder until we realized the trouble, bought a new supply of reliable powder, and began to shake up the glass in the windows, when straightway the Republicans, individually and collectively, remembered previous appointments and left. We fired one hundred rounds in honor of the nomination, after getting a good supply of Democratic powder. Moral—Don't rely on Republican pretensions in politics. on Republican pretensions in politics.

DISTRICT COURT.

Judge Rives Presiding. The District Court convened at 10 o'clock yesterday morning and transacted the following business: St. Lawrence Mining Co. vs. Richmond

> Supposed Horrible Death. We learn from parties just in from Jack | Epitaph.

Creek, that Billy Egan, a coal burner in that vicinity, is supposed to have been burnt to death, says Saturday's Times-Review, while atteid his coal pits. It is known that he was working there alone, and that he had burnt in the neighborhood of 600 bushess of coal. On Thursday last some of his neighbors went to his camp, and of his neighbors went to his camp, and found the coal pits destroyed entirely, and nothing could be ascertained as to Egan's whereabouts. The theory is that while arranging one of the almost completed kilns, he broke through and perished in the burning coal-pile. A party left here this morning to make thorough search, and satisfy themselves whether or not he has perished in the horrible manner supposed.

Dr. Chamblin was among the passengers who landed in Eureka last evening via the diagray prospector. dinary prospector.

The Celebration. At the meeting of the committee last

night, it was ascertained that the appointed speaker, reader, poet, etc., had all agreed to stand in, and it only remained for the committeemen, Messrs. Plater and Sabin, to arrange the order of parade and exercises to complete the programme. The committee will have everything in correct running order, however, and meet again to-night to talk over matters.

County Commissioners.

At a meeting of the County Commission ers yesterday. T. J. Read presented his report on the Prospect Mountain road, which was read and ordered on file. Mr. Read was instructed to go on and stake out the line of the road to Snow Point. The bill of George F. Costerisan, \$175, was allowed, not for "extras," as some have supposed, but for constructing and putting in place the Clerk's desk in front of the Judge's

Atkinson & Deming.

Many a suit of clothes manufactured by this firm is worn clothes manufactured by this firm is worn in Eureka, and they have given satisfac-tion. Mr. A. is still moving about, taking orders as rapidly and filling them as cor-rectly as of yore.

In San Juan. Many of our readers well and forcibly remember Mr. J. A. Porter, ex-Superintendent of the K K, and they will be glad to hear that he is now superintending a mine and mill in the San Juan country, Colorado, for a rich company in the East. Porter is a good mine manager and a good man, and we would as readily witness his drawing of \$500 per month as any of 'em.

The Verdict. At 11:45 last night the Court-room was crowded to hear the verdict of the jury in the Mary McLaughlin vs. Woodruff & Ennor case. Within an hour after the jury retired, they were ready to report, standing nine to three, and allowing Miss McLaugh-lin her claim of \$10,000.

Inquisitiveness.

It is not always safe to accost the occupants of a covered wagon, upon the streets of Eureka, as a " Mormon outfit." A local reporter has been digging rotten tomatoes out of his right ear ever since last Saturday.

The Madre tunnet is about 300 feet in length, and with the exception of about 80 feet from the mouth, passes through low grade ore all the way. A cross drift, about 200 feet from the mouth, has been driven 31 feet west in low grade ore, without cutting through. Another drift, near the face of the tunnel and running east, has been driven in 29 feet, through ore of low grade, to the contact. The vein is fully 60 feet wide, as shown by the crosscuts, but how much wider is not known, as its western limits have not been reached.

George A. Trimble, Jr., came in from Osceola on Thursday. We learn from him that the mill started up on Wednesday; that ore had been st uck deeper in the Crescent than ever before, and that George Blair was taking out from \$20 to \$40 a day with a rocker. Some of the members of with a rocker. Some of the members of the water company are large owners in the Horn silver mine at Frisco, and are now Horn silver mine at Frisco, and are now preparing for a big run, in order to show the Eastern men who propose buying, what kind of a mine they have, and in case a sale is effected, will devote their undivided attention to bringing in water to the placers of Osceola. This is like hope deferred, and is calculated to make the people of Osceola terribly sick terribly sick.

Geo. Mezger, just in from Schellbourne, reports but little doing at that place. All work has been stopped on the El Capitan, and but four men are at work on the Woodstock, a mine owned by Wm. Burke, which has been bonded to Eastern men for \$18,000, on which sum \$3,000 has been put up as a forfeit.

The work of taking down five stamps of the old leaching mill property was commenced on Thursday by John L. Robertson. Dr. L. B. Brooks has purchased the stamps from the Martin White Company, and will ship them to Silver Canyon, where he proposes erecting a mill without delay.

Tom Edwards, who left for Rico on the 18th, the day before the fatal accident in the Martin White tunnel, can consider himself the luckiest man alive, for had he continued at work, it is more than probable that he would have been the 'actim as he was engaged in the work of timbering the tunnel. the tunnel.

From Dave Felsenthal, who was over from Osceola a few days ago, we learn that there is not enough water for sluicing, and that the miners have fallen back on the rockers.

The use of for "fishing" railway rails. The screw bolts, which pass through the rails and the fish-plates, are secured in position by the nuts, which are prevented from turning and becoming disengaged in the following manner: A hole is cut through the fish-plate at the side of the nut, and made to communicate with a groove on the side of the opening in the fish-bar. After the nut has been screwed home, a spike is driven into the hole and clinched by means of the slot. Mr. A. D. Rock, of Eureka, s the patentee.
