Lyon County Times.

VOL. XLIX.

YERINGTON, NEVADA, SATURDAY, JUNE 29, 1907.

NUMBER 25.

NEW FIND AT MOUNTAIN VIEW

On the Red Crow Group of six claims in the Mountain View mining district, 14 miles east of this city, the greatest gold strike of this region has been recently made. The property is owned by Attorney N. W. Willis of this place in conjunction with his nephew, F. G. Willis, of Mountain View, and others.

A representative of this paper lately visited the ground and was shown the unusual sight of a ledge more than 100 feet wide, opened in a dozen places across its trend, at the foot of a steep hill it traverses, and giving panhings of free gold, running from \$5 to \$150 per ton. This gigantic ledge is opened in a number of places along its trend up the hill for a distance of about 600 feet, and pans well along, until the top is reached, where a careful test of the rock taken from holes dug every two feet across the

trend for a distance of about 30 feet, shows a value in every pan of \$20 per ton or better. The owners are doing all in their power to develop and properly open this wonderful prospect, and expect in a few weeks to make it into a mining property for sure. The formation is a porphyry contact with granite, trending easterly and westerly, paralleling the Mountain View and Big Twenty ledge, which lies about 3,000 feet to the south.

This tremendous surface showing, taken in connection with the rich ores already opened in the Mountain View and Big Twenty mines, augurs as great a future gold production for the Yerington section as for any other in this State, and marks the future Yerington as a gold as well as copper ore producing center of magnitude and richness unrivaled.

BRIEF MENTION

If you do not read the advertisements in the TIMES you do not get all the news.

C. H. Miller, of the firm of Baker & Miller, paid Dayton and Reno a visit this week on legal business.

Fred Flindt, of the Mason Valley Copper Co., returned last Monday from a visit to New York and Salt Lake.

Celebrate the Fourth and get your fireworks at the Yerington Drug Co.'s store, where you will find a good assortment.

The Yerington Drug Co., being local dealers, can and will guarantee their goods and will stand back of their guarantee.

If you haven't seen the new line of Jewelry at the Yerington Drug Co.'s store it would pay you to do so before buying elsewhere.

The Economic Drug Co. has just received a fresh supply of candies, gum and cigars. Give them a call. Bridge and Virginia streets.

On June 1 Mrs. Vaillencour will begin her shirt waist sale. All shirt waists and millinery at greatly reduced prices. Call and secure bargains.

W. C. Gruber has been in town for several days on business connected with property in which he is interested in Yerington and the district.

Watches, Chains, Charms, Pins, Rings, Back and Side Combs, etc., just received at the Yerington Drug Co.'s store. Certainly are beauties.

Ike Miller was an arrival from San Francisco the first of this week. He has been in Idaho for some time but could not stay away from the old camp any longer. Ike is looking well and hearty.

BIG STRIKE IN WHEELER NINE

A phenomenally rich strike of gold ore was made last week in the Wheeler mine, in the East Walker district some twelve miles east of the Charlebois ranch and within a mile and a half of the Reservation line. Considerable work has been done on this property in the past year, since it was taken in hand by C. D. Rooklidge, J. E. Caine and other Salt Lake people, and there is now every evidence that the property is going to prove a mine, not only of much merit, but of vast wealth.

There are two nice ledges on the property running parallel with each other. One of these ledges has been followed with a tunnel into the hill for a distance of 500 feet and all of the ore is of a milling quality, while some of it is very high grade. A tunnel has also been run in on the other ledge which parallels this one to a distance of 250 feet, and at this point a chute of ore was encountered which ran up into the thousands. The ledge is about three feet wide and is clear and well defined.

In the long tunnel, in a distance of 500 feet, a crosscut was started for the other ledge and when about 27 feet had

been run the ledge was struck and three feet of ore that will run better than \$200 to the ton has been opened up. Some of this ore will assay better than \$1600 per ton. About 50 tons of this ore, which will run between the two figures, has been extracted and is on the dump.

The formation in the mine seems to be changing from a granite to a porphyry and the ledges are coming closer together as they are followed into the hill. While they are about 50 feet apart at their portals, in a distance of 500 feet they are separated by only 27 feet of barren ground. In all probability they will close up within the next 50 or 75 feet and the ledge will become a larger and richer one.

C. D. Rooklidge, President of the company, and Clarence Rooklidge, who is superintending the work at the mine, were arrivals at the mine from Salt Lake last Sunday. They now have four men at work on the property and the little 5-stamp mill being erected is nearing completion. Keep your eye on the Wheeler mine, it is going to be a producer in a very short time and will prove to be a very valuable piece of property.

RESERVOIR ABANDONED

Great Project in Antelope Valley Ruined by Government.

From what seems to be an absolute reliable source we learn that further work on the Alkali Lake reservoir in Antelope Valley is to be stopped, and the projected improvements given up, says the Gardnerville Courier. T. B. Rickey is the chief owner and promoter of the scheme to make an immense reservoir of the lake, and to use the waters so stored to irrigate thousands of acres of land in both Smith and Mason Valleys. He had installed valuable machinery, including a pumping plant, had also made considerable progress in digging a tunnel through the hills separating the lake from the lands to be irrigated. He also was the owner of all the lands, with the exception of three forties in the bed of the lake which the government owned. The government claiming this a natural reservoir site, served an injunction on Mr. Rickey, thus blocking the further prosecution of the work. Realizing the long delay that would naturally result before any progress could be made, if at all, Mr. Rickey has had his big teams there this week hauling away the machinery and materials--indicating the complete abandonment of the plan as commenced.

GET IN THE DIRECTORY

The TIMES is constantly receiving inquiries about different mines and companies in this district. Some of them we have never heard of and some of them probably do not exist except on paper. The mining companies which are in the camp to do legitimate mining can, for a small sum per month, have a notice placed in the mining directory in the TIMES, and whenever an inquiry is made regarding that certain company a copy of the paper would be all that is necessary to send to the inquirer. It is just possible that a few of the companies that are getting into the camp are doing so on the strength of the reputation made by the big ones. We have a district that is truly meritorious here and it will not do to have it spoilt by the wildcat boomers.

TO WHOM IT MAY CONCERN

You are hereby notified that approved plat of the survey of the following section has been received from the United States Surveyor General of Nevada, to-wit: Section 7, township 16 north, range 23, east, M. D. M. The aforesaid plat will be filed in the U. S. Land Office at Carson City July 29, 1907, and thereafter that office will be prepared to receive entries for said land. All settlers or persons claiming a preferred right to any portion thereof must file their claims of entry to said land within three months after July 29, 1907.

LOUIS J. COHN, Register.
EARL W. TREMONT, Receiver.

Dr. F. M. Vanatta, of Chicago, was an arrival in Yerington the first of the week and will take the practice of Dr. Smith while the latter is in San Francisco and Los Angeles with Mrs. Smith for her health.

CHAMBER OF COMMERCE MEETING

Monday Night, July 1, 1907,

For the purpose of considering the High License law proposed by the City Council.

TURNER WINS

The Supreme Court has decided that C. C. Turner is entitled to the office of County Commissioner of this county instead of L. A. Strosnider, who received the most votes and was declared elected by Judge Langan, of the District Court of this county. The Supreme Court threw the election returns from Churchill precinct out because they were sent in by mail instead of a special messenger. The counting of the Churchill returns would have elected Strosnider by seven or eight votes. Under this ruling it will, hereafter, be easy to fix an election most any old way by simply throwing out a precinct or two where the vote will alter the result and thwart the will of the people on technicalities.

VISITORS FROM THE SOUTH

Col. O. P. Posey, John Manon and John Searles, of Goldfield and other southern camps, came in from there the first of the week in a large desert touring car. They paid the Nevada-Douglas mine a visit and also looked at some other properties here during their stay but were called back to Goldfield Wednesday by telegram. What they saw of our big copper district, however, impressed them very favorably and they will probably be back here in the near future to take another look.

Finning's ice plant steamed up Thursday to test the machinery and with a little adjustment things will be ready to turn out the frozen liquid in a very few days.

If you want a fine line of stationery at low prices call at the Economic Drug Co.'s store, corner Bridge and Virginia streets.

F. A. Budd was an arrival from California the first of the week to look over mining property in which he is interested in the East Walker section.

Considerable news matter is crowded out this week to make room for a big batch of ordinances promulgated by the City Council. Probably they will be more interesting than the news left out.

W. C. Orem, one of the principal owners of the Nevada-Douglas mine, was an arrival from Salt Lake Thursday and proceeded up to the mine next day. He will probably remain here until the electric power is installed at the mine.

The ball game last Sunday resulted in the defeat of the Guggenheimer team by a score of 24 to 15 or something like that. The Yerington boys expect to go to Buckskin today to try conclusions with the Buckskin mine.

S. J. Swetman, the stone mason, began laying the foundation for the new Lyon County Bank on Thursday of this week. It will be a two-story structure built of stone, and the bank people are in hopes of having it completed in ninety days.

There is still much trouble in getting lumber into the camp, and as a consequence those who contemplate building are placed at a great disadvantage. The cement block business and a brick yard ought to be paying institutions in the camp.

Jay O'Loane and Alex Requa are preparing to establish an ice plant and bottling works at Wabaska, from which point they expect to ship Wunder Beer and all kinds of soft drinks. Mr. O'Loane was an arrival in Yerington on this business Wednesday.

The TIMES received its 4-horse motor last week and as soon as the power line gets into camp we will be hitched on to our big press and ready to do business in a manner which will save a lot of time and allow of much more work being turned out, and in shorter time.

Fourteen gasoline hoists and a couple of pumping plants have been ordered by that many different mining companies of Buckskin and they will all be in operation before the summer is over. Some of them are already in operation and a couple more will be doing duty next week.

Don't forget that next Thursday will be the Fourth of July. We are going to have a celebration in the old camp that will be a hummer so it will not be necessary for you to go away from home to spend your money. The next best place to go for a good time on the Fourth is Carson City. The Eagles are going to fly high in the capital city on that day.

The new front for the building being reconstructed for Mrs. Mary Barton on Main street arrived the first of the week and the carpenters are busily engaged in putting it in and finishing up the building. Louis Menke will open a grocery and fruit store in the building as soon as it is completed.

Alex Requa, of this city, and Miss Rosie Neilson, of Carson, were married in Carson this week by the Methodist minister, Rev. D. O. Colgrove. The groom and his bride are now visiting in Salt Lake, but when they return to Yerington, which place they will make their home, there will be a charivari band to meet them that will make any other band ashamed of itself.

George Barrett has some nice home-grown strawberries which he is distributing to his good customers. George did not forget the hungry printer in his calls. The berries are of the variety that George grafted onto the milkweed vines so that he could procure a combination of strawberries and cream from the same vines. And the berries show their raising.

Governor Sparks paid this camp a visit the first of the week. He was out here mainly for the purpose of looking after some cattle he has feeding in the valley. The Governor says he notices many changes in the town every time he visits it, and is not backward in declaring that Yerington is destined to be one of the principal cities in the State in the next few years.

Dr. Nichter's team made a swift run last Saturday morning on the street west of Main. The animals were hitched to Doc's little wagon and they ran square through a tent that was in their course. The tent was about ruined, being carried along on the wagon pole for some distance. Fortunately there was no one in the tent and the horses were not injured to speak of in their mad run.

J. I. WILSON, Pres. G. W. WEBSTER, Vice Pres. F. O. STICKNEY, Cashier.

LYON COUNTY BANK.

YERINGTON, NEVADA

Capital, \$100,000. DIRECTORS: C. E. Mack, Richard Korman, J. I. Wilson, G. W. Webster, G. H. Plummer.

A General Banking and Exchange Business Transacted
