A number of horses have died recently, and many others have been sick this fall and winter. The superabundance of feed is probably the cause of this trouble. During the three years preceding this, the News does not remember of having heard of a sick horse. Feed sparingly, and your stock will do better than if you keep them stuffed all the time. There is no economy in over-feeding, and you may kill a valuable animal.

The Hamilton-Brown shoes are recognized as the best made. We have a full supply. Call and see us. MURRAY & MCCONNELL.

Oats continue to retail at twenty to twenty-five cents per bushel; corn, at thirty-five to forty cents; hay, at \$7.50 to \$10 per ton; sheep and hogs at \$1.50 to \$2.50 per hundred pounds. The man who cannot afford to feed his horse well at such prices as these, must be poor indeed.

L. M. Carter's Cheap Cash Store is the place to buy your groceries. He can sell you goods cheaper than the man who is on the railroad and has a heavy house rent and clerk hire to pay. See some of the following prices: Best Rio coffee, 20 cts per lb; nice Brown Sugar, 15 lbs, for \$1.00; good Louisiana molasses, 40c per gal; Navy tobacco 20c per lb, and upward. I have the goods in stock and am anxious to serve you at any time. I only sell for cash or its equivalent. J. M. CARTER.

Corn planting time will soon be here, and the industrious farmer will lose no time in preparing his ground. The indolent man will wait until the middle or last of March, and then lay off his ground and plant without any previous preparation. When his neighbors crop yields twice as much as his, he will wonder why. Deep plowing, and early plowing, pay better than any part of the year's work.

There may be some railroad racket in the air in the near future, but at the present nothing more than a conjecture could be made.

The Brownwood Appeal, in its map making Brownwood the business hub and railroad centre of western Texas, makes the Fort Worth and Rio Grande railroad run from Granbury to Brownwood, thence to San Saba, Llano, Fredericksburg, San Antonio, and on to the coast. This route would suit the News very well, and possibly something of the kind may yet be done.

There are shoes and shoes, good shoes, poor shoes, fine shoes, coarse shoes, serviceable shoes and worthless shoes. Be careful how you buy. We keep the best, and will sell as cheap as good articles can be purchased. Call and see us when want foot wear.

Rev. Dimmitt's sermon on Sunday morning last, in regard to how to behave when coming to, or staying in and returning from church services, was timely, practical, and if followed, would add much to the enjoyment of people who attend church to worship. His discourse Sunday night was interesting and instructive; a full audience was in attendance. Subject: The church young man's question to the Savior, "What shall I do to inherit eternal life?"—Mark x, v. 17 to 24.

I would like to give you a "recipe for a lady's dress," which was sent me when a child: "Let your ear rings be attention, encircled by the pearls of refinement; the diamonds of your necklace be truth, and the chain of Christianity; your bosom pin be charity, ornamented with pearls of gentleness; your finger rings be affection, set round with diamonds of industry."

A Land of Hidden Wealth. Mr. A. J. Chambers, of the Fort Worth and Rio Grande railroad, has just returned from a trip over the country from this city to Kerrville. A Gazette reporter tried to draw Mr. Chambers out on the mineral resources of the country through which he had passed, but Mr. Chambers said: "No, neither pen nor tongue can describe them; that country must be seen to be appreciated; no man will believe unless he has seen." He tried to describe granite two-story houses on the farms, fences made of iron; croppings, coal washed down the streams, asbestos in mountains, manganese in boundless quantity within a mile of inexhaustible iron beds, granite of all hues and easily slabbled, of silver now being mined by Mexicans, of a climate to which Kerrville is the gate-way that restores to health the lung-diseased, and of fish and game and growing crops, until he ceased in every despair of doing the subject justice. Mr. Chambers brought with him small samples of minerals, and says when Fort Worth is brought into connection with Coleman, Llano, Mason, San Saba, McCulloch and other southern counties of the mineral district, that section will experience a boom beside which that of Alabama will be as a zephyr to a cyclone.

And when the Texas Spring Palace is opened to the world, the people of Llano and surrounding counties must see to it that the strangers gathered by thousands in this city, shall behold the hidden wealth of that section and go back to their homes to tell of the wonderful opportunities offered for investment in the mineral region of Texas. A New Birmingham has already arisen in east Texas, and the Gazette predicts that another will rise close by where the counties of Mason, San Saba and Llano, join their boundaries.—Fort Worth Gazette.

How to Raise Early Tomatoes. The latter part of February is plenty soon to plant the seed. Get a paper of the Acme, Paragon, or whatever kind you prefer, and a shallow box. The best soil is from the choicest part of your garden, where you are quite sure it is free from foreign matter. Cover the seed lightly, and press down with the hand. Water them well, always using clean, warm water. Now place your box in the best sheltered place you have, giving plenty of sun. When they commence to crowd each other they are ready to transplant. Put one one in each as prepared as follows: Get some old fruit cans, (the town is full of them), put them in the fire just hot enough to melt all the solder loose. This will give you a nice piece of tin, which forms an empty cylinder, with no bottom or top. If some of them open too much, you can in a second press them with your hand so the side will clinch sufficient to hold full of soil. Stand these all close together, on a piece of plank, or what is better, a box the right size for the number you have decided on using. Fill them all full of the best garden soil. Pick out the best of your plants. Plant one in each can. I let them grow in this way until Easter is past, but generally risk a few before. If well cared for, they should, by this time, be blooming. I have had them to have tomatoes on as large as marbles. The roots, too, will have netted together, so that when you lift up the can the dirt will not fall out, although the can has no bottom. You need not even wait for a cloudy day to plant them where you want them to stay. Plant them deep enough for the first leaf to be a little bit under the ground. If you are fortunate enough to have a picket fence running east and west that you can plant both sides, and are willing to go to the trouble of training them up, you will be astonished how much better the fruit will ripen. You will also find them fruiting when your vines on the hot ground are a failure. Keep the suckers all out, throwing the strength into the main stem, the same as for corn. For late tomatoes, when it is no longer safe to let them stay on the vines, gather them and pack in bran, and it will be your own fault if you do not have nice, ripe ones on Christmas day.

If you wish early melons, cucumbers and squashes, you must plant the seed in the can, (as above directed), instead of the plant. They need more care. Gardening is an employment for which no man is too high or too low. E. E. RISIEN.

When Colonel Miller returns with the railroad in his pocket, the citizens of Llano should give him a rousing public reception. No one could have worked more earnestly and efficiently than he has for the benefit of this town and county. And even should he fail, he is entitled to the lasting gratitude of those whose prosperity he has so zealously tried to promote. But, then, he will not fail.—Llano Iron News.

"I welcome guest always!" "Peter-son" for March comes to us at its brightest and best. The steel engraving, "A Venetian Flower-Girl," is a charming picture; and the full-page wood illustration, a little maid's "Washing-Day" for her dolls, will delight the children as well as their elders. The mammoth colored fashion-plate presents a tempting array of the latest styles in feminine dress, and the work-table designs are pretty, useful and original. An illustrated article on "The Three Victories" is very appropriate. The portraits of the Queen and the Empress Frederick, are from their latest photographs, and are excellent likenesses, as are those of the Princess Victoria and her betrothed, Alexander of Battenberg. It is always up to the times in every particular, and with each new volume its list of attractions increases in brilliancy and number. Terms: Two Dollars a year. Address: Peterson's Magazine Company, 306 Chestnut street, Philadelphia, Pa.

Raise flowers; if only a pot of mignonette in the window, well attended it will prove a comfort in lonely hours, a solace in sad ones, a source of interest always. Flowers, by their subtle witchery, call one away from earth and its cares; their fragrance seems the very breath of angels, and their growth speaks of God. The care of them is alike a physical, a mental and a spiritual benefit—aye, even means of grace; and, I say again, cultivate flowers.—Vick's Magazine.

There is only one remedy for the door slamming nuisance, and that is a perpetual and unintermitting one concerning the vulgarity of the act, till anxious mothers make their children remember their duty in the premises, and wives keep it on their husbands' minds, and every woman understands its rudeness and unfeeling wickedness, and every servant in stations, cars, inns, and dwellings, is as noiseless as attendance always should be made. Perhaps reform in the affair will be the more easily accomplished when it is taken into consideration that it is not only other people's feelings and nerves and comfort generally that are disturbed by the banging of door, but that it is property which is destroyed, walls loosened, plaster shaken down, and houses made old before they have ceased to be new.—Harper's Bazar.

The good book teaches that "except ye become as a little child, ye cannot enter the Kingdom of Heaven." That little children have an appreciation of the workings of the Divine Spirit, is illustrated in a conversation reported between two little girls, one of whom boastfully remarked: "My ma got religion last night." The other quickly replied, "Then maybe she'll pay my pa for the groceries she got long ago."—Exchange.
