Horse Notes

Col. Percival W. Clement, of Retland, bought, at the recent sale of the thoroughored stock of the late John Shedden, at his farm on the Lower Lachine road, nine miles from Montreal, the brown colt "Hailstorm," (thoroughbred), three years old, by "Thunder," dam, "Julia Adams." "Hailstorm" took, as a one year old colt, the first prize at Kingston, and also at Toronto, in 1871, and the first prize at Hamilton, as a two-year old, in 1872. "Hailstorm" is entered, and in training for the Canadian Derby, but his new owner will probably withdraw him.

This speaks well for the pluck and enterprise of Mr. Clement. We hope he will permit this stallion to be used in improving the stock of horses hereabouts.

Messrs, Solace & Huntley, of Bridport, have lately sold a four year old horse of Ethan Allen stock to Colonel Phyfe, of New York, for \$3,000. He has made a full mile in 2:43.

This horse died seven days after his purchase and removal to New York. The disease was lung fever, from a cold caught on the passage.

Col. Phyfe passed through Rutland vesterday on his why home, having purchased this morning Col. Stowell's bay mare for five thousand dollars. Both of these horses are of Ethan Allen stock, having been sired by the Delong horse, a colt of Ethan Allen's. This horse of Mr. Delong is gaining great laurels as a sire. Will some one give us his pedigree in full?

We hope the horse breeders of the State will keep us informed of transactions in their line. We desire to do all in our power to make prominent the excellence of our native stock of horses, believing as we do that Vermont will retain her olden excellence in this particular.

The fastest running time for one mile is 1 437, by Alarm.

MISSIONARY ANSIVERSARY.

At 10 o'clock the anniversary of the Domestic Missionary Society took place. Rev. Rev. C. S. Smith, of Montpeller, the corresponding secretary, presented the annual report which was mainly retrospective and historical, and included the financial condition of the society.

The society had done its accustomed work among destitute churches. The year had been one of marked spiritual barreness among the churches under the care of the society; the net loss by death had been five over the additions by profession of faith. There were 40 churches supplied and 24 partly supplied. The receipts for the year were \$14,223; expenditures 10,867; donated to the New York Home Missionary Association, \$350.

After the address of Mr. Smith, the flicers of last year were re-elected. The convention then organized under the charter granted by the Legislature at its last

AN ABSTRACT OF MR. THOMPSON'S ESSAY. The Essayist said the subject at first hought seems mathematical, and in this light an answer would be that the ratio of ethical to doctrinal preaching should be six of one and half a dozen of the other. All sermons are either doctrinal or ethical, both of these classes must be preached to the end of redeeming man from sin, and of feeding the soul with the bread of life. Man is sanctified by the truth as well as by the spirit. If man is fed upon the sentimentalities of the gospel they become a bundle of sentimentalities. There are limitations to doctrinal preaching. The battle now is with the materialists; the time is past when the minister should preach simply to enlighten the mind. There should also be ethical preaching, to bring men up to the common moralities of life. Principles should be inculcated, almost every sin in the catalogue has at one time or another been committed and defended by the christian church. Preaching should aim at the production of a righteous life—that is true

preaching which makes the best life. Doc-

torinal preaching should effect the will. ethical improve the morals. They cannot be separated, both must be doctrinal and ethical when taken in relation to the christian religion. One is the roots, the other the branches of the tree; there should be many of both, but what the exact ratio should be, the essavist could not determine. It was voted that the essay should be published in the proceedings of the conven-
