Cheerfully Recommonds it to Anyone Suf-fering from Eright's Discuss.

NEW ROCHELLE, N. Y., June 14, 1880. )

H. H. WARNER & Cor-Two years ago ast Spring I was attacked with swelling of my ankles and feet. My physician pronounced my case albuminaria. At examination by three prominent physians, my case was decided to be Bright's bisease of the Kidneys. My blood turned to water, and, my physician said I could not live nine months. I was recommended by a physician to try your recommended by a physician to try your great remedy [Safe Kidney and Liver Cure]. This was in January, 1879. I went to Florida, taking six bottles with me, and during my stay there I sent for six bottles more. While there my chief occupation consisted in regularly taking your medicine. On my return, in the the latter part of April, my family and friends were overjoyed at the change for the better in my health. When I for the better in my nearth.

eft home they did not expect I would
come back alive. I gained twenty
pounds in flesh. I took no medicine
while in Florida except the medicine named. I am now attending to my business regularly, and taking no medi-cine but an occasional dose of yours. I cheerfully recommend it to anyone suffering from Bright's Disease.

J. E. U., New York, 23 Old Slip.

Will you please pass the milk, Miss Brown?" asked a young man of a fidgety old maid at the supper table. "Do you take me for a waiter, sir?" she answered. "Well," he added, "as no one has taken you thus far, and you've waited so very long, I should think you were one."

#### FRANK BROTHERS. AGRICULTURAL IMPLEMENTS!

Mill and Farm Machinery.

WALTER A. WOOD'S ENCLIDISIEIDHGIEAR MOWER.

4 ft. 3 in. cut, 4 ft. 6 in. cut.

This Mower was brought out in 18/8, and is already in use by more than 10,000-farmers. Its popularity is so great and the demant-for its on either that we have, to she bust two seasons; tallen largely short of filling

to-she past two seasons, fallen largely short of films orders.

Farciose I Gearing, instraing exclusion of all dust and litts, and freedom from soles-and-faving.

No Gearing in Drive-Wheels, the Gearing being perfectly encased in the frame.

With of Tread, 3 feet 7; inches—from three to six inches wider than that of other Mowers.

Height of Driving Wheels, 31. Inches—from two to four inches high orat—it is the lightest-draft Mower in the world. The reduction in weight, the improvements made in the pearing and the cutting apparatus, and the increase in the height of driving wheels have conduced to this result.

Lock Nuts.—All the nuts on this machine, liable to get loose, are look-nuts provided with keys.

Farmers, see this Mower before buying.

#### THE WALTER A. WOOD CHAIN-RAKE REAPER.

This Machine is so well and widely known throughout the entire West as to render annecessary a detailed description of its numerous excellent points. For many years it has stood securely pre-eminent among Sef-Raking Reapers, and remains unrivated as a Table-Rake Reaper in the esteem of the many thousand racturers who have so long and severely tested it. Testimonial letters, attesting its unverving popularity, wonderful durability and splendid excention are so familiar as to have become proverbial.

While we have been careful at all times to restain in it, the perfection of rimelple which has given Walter A. Wood's Chain-Rake Reper its great prominence, we have from time to tune made such changes in construction as practical experience and rivid tests in the field have shown to be desirable; and all these improvements have proved to be all that we chair set for them, and have kept the machine in the front line of the "march of progress."

# WALTER A. WOOD'S

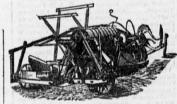

The Only Five-Rake Reaper Manufactured. Experience has demonstrated the superiority of five akes over four for reeling all kinds and conditions of

run. It is the lightest-draft, stillest running, strongest, nost durable and economical Reel-Rake Reaper now

mode urrants and economical make.

Walter A. Wood's Reapers have no equal in saving badly-conditions of crops. They are also very successful in cutting flax and assed clever.

Walter A. Wood's Sweep-Rake Reaper is so constructed that the Rabing and Cutting Apparatus can be instantly lowered to secure tangled and down grain.

WALTER A. WOOD'S

Well Known

### ARVESTER AND SELF-BINDER.

To WALTER A. WOOD is due the credit of having introduced the first successful (elf-finder, and this high none is frankly conceled by competiors as well as by the agricultural community throughout the

introduced the first successful is if-filinder, and this high none is frankly conceled by competitors as well as by the agricultural community throughout the world.

With the Self-Binder, one man, with two or three horses, can cut and bind twelve to eighteen acress per day better and cheaper than when it is done by hand. Those who have used the Wood Self-Binder are absolutely unanimous in the assertion that the grain saved more than pags for the binding material.

SEPARATISO THE GRAIN.—In lodged and tangled grain his is indispensable. The separation of the bound from the hunbound grain, and the delivery of the bounderings, interlacing or hanging together of the bundles, and consequently none of that difficulty in shocking and etacking tangled grain inevitable in the case of Self-Binders of other makes.

Contractings, interlacing or hanging together of the bundles, and consequently mone of that difficulty in shocking and etacking tangled grain inevitable in the case of Self-Binders of other makes.

Contracting the self-a feature not practically carried out arms, which adapt themselves to list size, instead the wire itself-a feature not practically carried out any other manufacture. Other Binders compress the bundles by means of tension on the wire; and with such machines the result is that the operator, to avoid breakage of wire, must loosen the tension, causing loose binding —or he instruct bind small bundles, in order to bind them tightly.

One Spool —UNE Tit.—In forming the band, one Spool and one Tie are better than two, taking loss wire and requiring less mechinery to be look dater.

Over 500 of these Binders in use in Orgon alone. Send for Special Catalogues and Circulars.

#### WALTER A. WOOD'S MOWING ATTACHMENT.

The Mowing Attachment comprises a separate Frame, Gearing and Cutting Apparatus, complete, including two Mowing Scythes, thu rendering is, with the addi-tion of the Resper Wheels, Seat and Yole, a Complete Mower—making the Wood Combined Machines the Most Effective, Most Economical and Chespest in the

Mowing Attachment fits either our Chain or Sweep-Rake Reaper.
