It has been in contemplation for some time to erect in this village a steam grist mill to do custom work, and to manufacture flour from Western wheat, to supply the surrounding country. But it has not yet been undertaken; steam power being supposed to be too expensive to compete with water power, which is abundant in Swanton, Highgate, Sheldon and Georgia. It is highly probable that the experiment will be ere long tried. It will become an object of necessity as the village and vicinity around increases in population.
