Some of the stones were so placed that the wheels might run up their shelving surfaces and the car be ditched. The company has a clew to the perpetrator.

Strike at Bennington.

The dissatisfaction that existed among a part of the help in the matter of wages at the big dress goods mill of Holden, Leonard & Co., at Bennington has culminated in a strike among the carders. Eighteen of the men went out, and only enough remained to operate eight of the seventeen sets of cards in the mill. The employees asked for an advance of 10 cents a day in their pay, which request was denied. The spinners, who were getting \$1 37 a day, asked on Friday afternoon that their wages be raised to \$1.50. The request was granted.

Always Doing Something Good.

Not content with monopolizing the intellect of New England with its editorial page, the great variety and reliability of its news and the unusual excellence of its illustrations, The Boston Sunday Herald has just introduced a section which must appeal to the younger por-tion of the household. It is devoted to a collection of original pictures by The Herald's own staff artists. These pictures are not uproariously funny, but are intended to interest children, cause a smile among the middle-aged, and prove a mine of suggestive good humor to those who have seen funny pictures all their lives. Even those who enjoy the golden fancies of that age when we know it all will find a smile. You don't have to read or use a magnifying glass to find the point, for the pictures tell the stories. Place your orders for The Sunday Herald early, and thus make certain of securing it. Oh, yes; let us remind you that The Boston Herald fashions continue to lead the country. There were lots of politics at the Van Ness House at Burlington on the occasion of the Fish and Game League meeting. It is a good while ahead but if the people of the state want a real Vermonter, a real man, whose whole life has been devoted to the welfare of his state, one who is by long experience and successful business training preeminently fitted to make the state one of the best governors she ever had, they will not nominate any of the active candidates, for that office in 1902, but will choose Hon. The most notable thing at the meeting of the members of the Fish and Game league at Burlington was the absence of the candidates for state and other offices, and of allusions of a political character. There were present of course a number of ex governors, congressmen and others who had held or were still holding office, but having had honors heaped upon them time and again until satisfied, they wore that look of contentment that is worn by all who can say, "I have had enough, please put me upon the retired list." -[Fair Haven Era.

Dairy Education.

Special schools are quite common nowa-days. Drawing, nurse training, cook-ing, sloyd work, and a host of other lines of industry, are taught entirely apart from other branches.

This well recognized order of the dayspecialization-has for some years entered into farming operations and several of the agricultural colleges of the country have conducted dairy schools. The main function of these schools is to teach to young men and women the science and art of butter making, the use of various kinds of dairy apparatus, the care and handling of milk, including pasteurization, the testing of milk, cream, etc., for total solids, fat, acidity, taints, etc.

A school of this kind has been in operation every winter for eight years at the Agricultural College of this state at Burlington. Its uinth session will open on January 2 next. The course is free to Vermonters of both sexes. Not only the professional creamery worker, but any one who may wish to learn the

newer methods in dairying, is welcome. The outfit of the school includes a dozen separators, several churns, butter worker, milk testing apparatus of all kinds, etc.

Three sets of lectures are given, text-

procured, the students themselves handle the milk through the entire process from weigh can to butter tub, including separ-

ating, cream ripening, churning, washing, packing and testing.
No entrance examinations are held or tuition charges made. The entire expense of the four weeks over and above travel to and from Burlington need not exceed \$20. The class is limited to fifty in number. Every year for eight years the class has been full, and often appli-

lack of room. Such of our readers as may be interested in dairy matters and desire to learn more are urged to send for the school circulars. Address Dairy School, Burlington, Vermont.
