

LOVE MISSIVES FLOOD GIRL AWAITING MURDER TRIAL

NEW METHOD TO IDENTIFY ALL CROOKS FOUND

Will Demonstrate Long Distance System of Identification to Police

NEW YORK, Sept. 23. — Three Dances, one a young woman, have come to New York to tell the National Police Conference how the world can be shrunk into a smaller space for professional crooks. They are here at Police Commissioner Enright's special invitation to demonstrate a newly invented "long distance identification system," and to urge its international adoption.

"The greatest aid to police identification since the Bertillon system," says Mrs. Mary Hamilton, noted New York policewoman and student of finger-printing.

After eight years, Haken Jorgensen, assistant commissioner of the Copenhagen police, has perfected a method of translating the loops and whorls of finger-prints, as well as the facial and physical characteristics, into umerals.

How Method Works

You don't have to be an identification expert to see what that means. Suppose you were convicted of a crime. Your finger-prints and Bertillon measurements would be taken in the regulation way. Then, by the Jorgensen system, the results could be reduced to a series of about 20 umerals. You would be the only person in the world who would exactly match those figures; and, inversely, the figures would be the only ones which would exactly match you.

Your name and numbers could be listed in a crook's directory, copies of which could be kept in every police station on earth. No alias, no change in appearance, no passing of the years, would enable you to conceal your identity from any police department which found it necessary to check your finger-prints and measurements against your numerical rating, or vice versa. A telegram from the interested

Fossil Remains of Huge Dinosaurs to Be Given Museum

CHICAGO, Sept. 23.—Fossil remains of several dinosaurs found in Alberta, Canada, are to be turned over to the Field Museum of natural history, Professor E. S. Riggs, associate curator of geology, who returned today from Alberta announced. The party of dinosaur hunters was made up of six paleontologists who worked in the canyon of the Red Deer river, about 125 miles west of Calgary.

An almost complete skeleton of a duck-billed dinosaur was discovered. Other finds included the scattered bones of a crested dinosaur and a flesh eating reptile about as large as a crocodile.

"These animals lived at a period before the Rocky Mountains were formed," Riggs said. "It was a time when there was a tropical climate in Alberta, when there was heavy vegetation and red wood trees. At that time an arm of the sea extended from the gulf of Mexico north and connected with the Arctic ocean".

HELIUM PLANT TO RESCUE

FORT WORTH, Sept. 23.—The government helium plant, which has been closed since January 1 because of a lack of congressional appropriation will resume on full time October 1, it was announced here Thursday.

Gas for army and navy aircraft will be produced.

Tests Successful

Miss Ingeborn Charlotte Hellner-Nielsen is the young woman who made the journey across the Atlantic with Commissioner Jorgensen and Military Judge Erick Schaffer. Her work is to classify finger-prints and Bertillon measurements into the "long distance system." Both at the Hotel Pennsylvania, where the party is stopping, and at police headquarters Miss Hellner-Nielsen has successfully met every rigorous test that internationally celebrated identification experts could devise. It takes her but a few moments literally "to get a criminal's number."

"This is an auxiliary to the identification systems used by the police in various countries," said she. "It would not replace present methods, but supplement them and enlarge their uses. Every professional criminal in the world could be listed in a book no larger than a dictionary. And instead of making it necessary to mail actual finger-prints or wire long descriptions, a few umerals would tell the whole story."

Voice of God Speaks in Scenic Beauties of Arizona's Spaces

To the man who has breathed the free air of Arizona, to him who has prospected for gold in the gulches, to him who has followed the mountain trails by night, and has slept on a blanket under the stars, who has heard the calls of the wild creatures to their mates and their young, to him who has climbed to the mountain top and sung "Teulah Land," and from such a vantage point has watched the sun go down in the clear atmosphere of a desert sky, and has seen the flashes of purple and gold, of blue and scarlet, to him who has shouted his joy against a rocky cliff and heard the multiplied echoes come back to him who has seen the Painted Desert, and the Petrified Forest, and at last has stood upon the very rim of the Grand Canyon of the Colorado, or journeyed down the Bright Angel Trail just as the greatest gorge in all the world is filling with a purple haze to that man has spoken the mighty voice of God.

Oh Wonderland, My Wonderland, If I were a pagan man I'd worship thee; Upon thy highest mountain spires By night I'd build my altar fires, And worship thee 'neath lurid skies; Oh Wonderland, My Wonderland.

Oh Wonderland, My Wonderland, But I am not a pagan man; I look from thee, the made, primeval dust, And worship God who made thee thus; Oh Wonderland, My Wonderland. —Harry A. Reese, M. D.

TO FEED REFUGEES

WASHINGTON, Sept. 23.—Secretary Hoover, in discussing the relief situation in the Near East Thursday said about 1,500 tons of American relief administration food supplies were afloat in the Mediterranean and efforts were being made to divert some of these stores for use in feeding refugees.

SIGNS JOINT RESOLUTION

WASHINGTON, Sept. 23.—President Harding signed Thursday the joint resolution adopted by the senate and house expressing American approval of the restoration of Palestine as a Jewish homeland. The resolution is said by Zionists to be practically identical in phraseology with the declaration of the British government of November 2, 1917.

It is estimated that 14,448,000 lives have been lost in battle in all the wars of the world waged between 1790 and 1918.

POLA'S FIRST INTERVIEW IN ENGLISH GIVEN

Interviewing Polish Star, Using Only Three English Words, Is Tough

NEW YORK, Sept. 23.—This is the first interview Pola Negri ever gave—in English.

Waving the interpreter from the room, and leaning over German-English dictionary—open at the page, "Sample Conversation Between Strangers"—up against a jewel case on top of one of the 17 trunks the Polish movie star had just brought off the steamer, we began.

"Good morning, Miss Negri," we said, speaking in German in order to gain her confidence.

She smiled and showed her beautiful teeth, which a battalion of photographers had just been photographing.

(Even though she seemed fatigued from too much interviewing, she is awfully easy to look at; magnificent grayish blue eyes, with depth and twinkle in them; soft pale face, with just a line of color at the lips; simple black hat, and a dress of—orwell, a beautiful dress.)

"You have just arrived—is it not?" we said, speaking with a foreign twist (This was an idiotic question, for we knew very well she had just arrived. But she was smiling at us, and we felt sort of dizzy, and the dictionary swam before our eyes.)

"Ja," she said. Recollecting instantly, she interpreted herself, and said "Ye-es."

Problem in Etiquette

Miss Negri sat down on a divan and since her dress was very wide, like a hoop-skirt, and there wasn't any other place to sit down, and we didn't know whether it would have been proper to sit down on the divan with her even if there had been room, which there wasn't, we folded ourself onto a footstool.

"How do you like America?" This seemed an inane question, but the rules and regulations of interviewing foreigners prescribes it.

"Ye-es," she said, "aber—" (Off she went, out of bounds—talking German. We were too much of a gentleman to interrupt, and we didn't understand it anyway, so it really doesn't count in this English interview.)

Just then a maid relieved the situation by bringing Miss Negri a thin glass—deminicent of highball days. In it was two fingers of a rich red liquid.

We perked up. But there was only one glass.

Miss Negri understood. "Teat!" she said, speaking perfect English.

As Regards Matrimony

We changed the subject by looking at the forefinger of her left hand, on which sparkled a diamond solitaire as big as a two-bit piece. From a thin chain around her neck hung a diamond plaque the size of a saucer.

"Not married—is it not?" was asked shaking our head and talking with our hands.

"Ye-es," she said—meaning yes, she isn't married.

(She isn't, you know, though she used to be, and her name used to be Countess Dombaki.)

"Will you marry?" we asked, hoping.

PEGGY BEAL

Submarines of U. S. Soon to Be Equipped With Better Radio

WASHINGTON, Sept. 23.—Submarines of the United States Navy will soon be equipped with the latest improvements in radio.

These improvements are such, say naval engineers, that they will be capable of sending messages up to a radius of 300 miles in the daytime and much farther at night. This is three times the distance spanned by the radio sets now installed in the submarines.

An order for 59 new sets of the latest type has been issued by the Navy Department. These sets, however, will be formed from old apparatus along a design set up after careful experimentation by the naval radio experts. It will mean a saving of nearly \$300,000 in the cost of the sets.

Although detailed specifications of these new radio sets are withheld, it is learned that they are of the latest type of vacuum tube apparatus. Their efficiency will vie with those of the German submarines which succeeded in sending messages at night as far as 800 or 1000 miles to their bases.

The new apparatus on the American submarines will be able to receive long-wave signals while the craft is submerged to a depth of about 20 feet.

Holy Trinity monastery in Thessaly, built in the fourteenth century, is accessible only by ropes and ladders.

300 OFFERS OF MARRIAGE MADE TO PEGGY BEAL

Girl Slayer of Her 'Perfect Lover' Recovers From Self Inflicted Wounds

KANSAS CITY, Mo., Sept. 20.—Three hundred men have written Peggy Beal, slayer of Frank Warren Anderson, "the perfect lover," asking her to marry them. Among the suitors for the hand of the fair slayer are ministers. Also many men who claim to have great riches.

Peggy Beal who shot and killed Anderson, scion of an old Philadelphia family, in a hotel room in Kansas City, June 3, has just left the hospital, where she recovered from wounds inflicted upon herself after shooting Anderson.

She is charged with murder and will face a jury in Kansas City in the near future. She herself is the moving spirit back of plans for an early trial.

"I want to stand before the world vindicated," she said. "I want other women to know what I suffered. I want them to know that I killed Frank Anderson to save other women from his clutches."

Minister Proposes

Meantime the proposals of marriage comes flooding in. In one of them a man calling himself a Detroit minister, says in part:

"I am sure you are not all bad. No woman could have written the wonderful love thoughts that you have written and be bad at heart. I would like to make you my wife and lift you up from the depths of despair."

"As a minister, it is my duty to offer you a haven in my heart and home."

Peggy Beal, before revealing the letter, clipped the writer's name from it. She said she would not give out the names of any of those who have written love letters to her.

A man describing himself as a Galveston, Tex., sea captain wrote that he was sure he could make her forget the dreary days that have followed the killing of Anderson.

"If you will marry me, I will see that you forget the past," he wrote. "I am not so terribly handsome or so terribly good, but I would be willing to give every hour in the day to trying to make you happy."

"If you will say the word, I will get a year's leave from my work and will

Cook With Gas

Rightly used gas is the perfect fuel for cooking and heating, the only one that is one hundred per cent fuel. You do not have to store or handle it. It is ignited in a second, burns only when you want it, contains no smoke or soot, and leaves no ashes.

The gas industry is performing an important service to the people of this country. If you are not making use of this service, we will gladly tell you how you can do so to your advantage.
