R.

The Valley Mining company has its mills in running order. It is a few weeks behind schedule, but work will go on. The workmen, although busy with underground work, are not losing ground. 

The new mill, which is being built at the mouth of the main workings, will be completed in a few weeks. The proprietors are making every effort to complete the mill in time to meet the demand for ore. 

The new mill is being erected on the same site as the old mill, which was destroyed by fire last year. The new mill is being built of brick and stone, and is expected to be completed in the spring. The proprietors are making every effort to have the mill in operation by the end of the summer.
