

THE CORNER-STONE.

San Bernardino in the Swim Today.

Imposing Ceremonies Provided for the Occasion.

The Southern California State Hospital For the Insane There.

Appropriations, Cost and Plans For the Institution Briefly Outlined as Suitable for the Day's Doings.

Today the corner-stone of the Southern California state hospital for the insane will be laid at the selected site near San Bernardino. The occasion will be a most noteworthy one, and the following form of invitation has been issued by the trustees:

SAN BERNARDINO, Cal., Dec. 5, 1890.
You are cordially invited to be present at the laying of the corner-stone of the Southern California state hospital for the insane, Monday, December 15th, 1890, at 2 p. m.

H. L. DREW,
E. F. SPENCE,
FRANK K. KELLOGG,
H. A. PALMER,
JOHN ANDERSON,
Trustees.

JOHN MORTON, Secretary.
The citizens of San Bernardino will give a banquet during the evening, in honor of the event, and invitations to that effect are out as follows:

The presence of yourself and lady is requested at a banquet, tendered by the citizens of San Bernardino county, to the governor and governor-elect of the state of California, the members of the state legislature and other distinguished guests, in connection with the ceremony of laying the corner-stone of the state hospital for the insane, Monday evening, December 15th, 1890, at 8 o'clock, at the hotel, San Bernardino.

M. A. Kennison, Seth Marshall, Lewis Jacobs, John M. Davis, Geo. E. Otis, committee on invitation.

The card of admission to the banquet is in this form:

Banquet tendered by the citizens of San Bernardino county, to the governor and governor-elect of the state of California, and other distinguished guests, Monday evening, December 15th, 1890.
Admit Mr. and lady.
There will be a great concourse of people in attendance at both events today, and all San Bernardino will be in gala attire.

A short historical sketch of the concern may not be out of place. The last legislature passed a bill appropriating the sum of \$350,000 for the purpose of establishing the institution. The selection of a site was put in the hands of James Kerr of San Diego, John Brown, Jr., of San Bernardino, Mark Sibley Severance of Los Angeles, and two others, one from Ventura and the other from Santa Barbara. These gentlemen at last selected a site near the city of San Bernardino, comprising 120 acres of fine, well-watered land at a cost of \$15,000. Plans were then invited for the first buildings, and those drawn by Curlett & Eisen of this city were adopted. The contract for the erection of the edifices was finally let to Peter Christion of San Francisco, the man who put up the great Chronicle building in that city.

The plans as adopted, call for a great central building of three stories, basement and attic, with a central tower of great height. This will be the administration building and will be connected with the ward building on either side, and with a rear extension of the main building, in which will be the kitchen and dining rooms of the institution, a large social hall and rooms for other purposes. These will all be interconnected by means of an ambulatory, part of which will be under the grand central tower. These plans cover the general center, or nucleus of all the buildings contemplated for the institution. Some of these will be constructed under the existing contract with Mr. Christion and others will be put up as the demands may arise. This contract calls for the construction of the rear central edifice, part of the ambulatory, the central tower and one ward building. The cost of this will be about \$170,000. There are included in this contract also a work-shop building and a power block. The ward building will have a secondary tower over its central portion, which will be the ward dining-room. Future ward buildings will be placed some distance to the rear, so as to break the line of the main facade. The structures will all be of solid masonry and brick work.

Climatic needs call for certain features not heretofore known in buildings of this sort. From the power block fans will be operated to force air through iron pipes which pass through large troughs filled with ice or cold water, as the temperature may require. From these troughs the air is led into all the corridors of the buildings, where it is allowed to escape at a temperature of, say 60 degrees. This system will supply 32 cubic feet of air per minute for each patient in the ward. In cold weather this system is used to heat the building by means of heated air. Besides this system there is a subsidiary one of drawing vitiated air out of the wards by means of heated draught chambers ascribed through the roof.

Each ward building will accommodate 150 to 175 patients.
Another new feature of this institution is the social hall 100x60 feet, the finishing being of a highly ornamental kind in Mendocino pine, polished to a high degree. The roof will be high and arched.

The stairs will be of natural or patent stone, and semi-detached from adjacent parts of the edifice.

The towers will be used to get a greater water pressure than the general system affords, and the tanks will be connected with fire hose in all parts of the buildings.

These notes are sufficient evidence of the importance of the institution, and proof that San Bernardino is fully justified in the efforts being made in honor of the event.

The ceremonies begin at 2 p. m.

CRAZY AND ON CRUTCHES.

The Adventures of an Italian Who is Mentally Affected.

Shortly after 4 o'clock yesterday afternoon an Italian named F. Biagiatti, was arrested on Pasadena avenue, East Los Angeles, by Sergeant McKeag, who found him hobbling about upon a pair of crutches in a state of almost hopeless insanity. The unfortunate man was taken to the police station and locked up in the city prison. He will, in all probability, be taken before the lunacy commissioners, today, for examination, and committed to an asylum. Biagiatti's malady is one of long standing, but it is only on rare occasions that he becomes dangerous. During one of these periodic attacks, a few months ago, Biagiatti

attempted to commit suicide by jumping from the San Fernando-street viaduct, when he received severe injuries, as the result of which he is still obliged to walk upon crutches.

SAW THE TOWN.
An Advanced State of Inebriety and Its Consequence.

Yesterday morning an elderly man named E. P. Frayne was arrested by Officer Johnson on Aliso street, in an advanced stage of inebriety. He was taken to the station, and from certain incoherent remarks he made, it was gathered that he had been robbed by an acquaintance, and that he had been picked up on Saturday night, and with whom he had made a tour of the city. On returning to his beat Officer Johnson met the man he had seen with Frayne, and placing him under arrest, lodged him in the city jail upon the charge of grand larceny. He gave his name as A. Carpenter, and indignantly denied the charge that he had robbed his friend.

Inherited Scrofula.
Swift's Specific (S. S. S.) cured my little boy of hereditary scrofula, which broke out all over his face. For a year he had suffered, and I had given up all hopes of his recovery, when at length I decided to use S. S. S. After using a few bottles he was entirely cured. Not a symptom remains of the disease. This was three years ago.
