Fighting Renewed.

According to the "Chronicle's" corre-spondent with General Kuroki's headquarters, fighting has been resumed in the neighborhood of Telissu, seemingly indicating that General Stakelberg is al ready confronted by his interceptors. The correspondent adds that on the result of this engagement depends the movements of the first Japanese army.

A report of this fighting also comes in a brief dispatch from Nuchwang, whence rumors have frequently proved to forestall events accurately.

General Kuropatkin is moving a force to over General Stakelberg's retreat. is said to have sent two divisions south for this purpose, but it is believed vain-ly, as General Nodzu is said to be near-er the retreating Russians than any of their supports.

There is an unconvincing rumor that General Kuropatkin himself left Liao-Yang on Wednesday for the south.

In a Critical Position.

PARIS, June 18 .- Press reports from St. Petersburg represent General Stack-elberg as being in a very critical posi-tion, he being sandwiched between Gen-Nodzu and part of General Kuro-

ki's army. General Kuropatkin is condemned by military men for dispatching General Stackelberg on a hopeless enterprise.

The "Standard" has a dispatch from the same place, which mentions the preparations the Japanese are making to meet a possible incursion of the Russions from the north. These preparations are exceedingly thorough.

The correspondent adds that the country between Feng-wang-cheng and Motienling recalls northern Natal, it being a billowy sea of green mountains and valleys, which renders the movements of troops, especially cavalry, difficult.

The water about the ship was filled with men who had leaped from the sinking vessel. The Russians turned their rapid-fire guns on these swimmers, causing fearful destruction of life.

The last Russian broacside exploded the Hitachi's boliers and she sank, twenty-six miles from the mainland, between Okino and Shimi islands.

It is now said that her survivors number less than a hundred.

Sado Attacked.

The transport Sado was overhauled by the Russians eleven miles south of Okino Island, and an order was given by signals for her to stop. While the signal was flying the Russians fired 150 shots, approaching, meanwhile, within 161 yards.

The crew of the Sado took to the boats and rowed off in different directions. So far as they could see only two shots struck the transport, but these did great damage.

The Sado was reported to be floating high in the water. There are about 209 survivors.

About three feet from the floor, he had fastened his tie securely to the pole with a hard knot.

As his body touched the floor, the necktie had drawn the collar up into his throat had drawn the collar up into his throat and strangulation had soon followed. The puzzling thing is how the hat rack stood the strain without toppling over. Nothing was thought of Duffey's absence last evening from the dinner table.
