Larger Yields Shown In All Alexandria Acting Mayor the Southern States.

That the Southern States are responsible for practically one-half of crop-359,005,000 bushels, making the total 3,121,381,000-was stated today by Bradford Knapp, of the farmers' co-operative demonstration work, in the Agricultural Department's bureau

the Agricultural Department's bureau of plant industry.

Crop statistics prepared by Mr. Knapp show that the Southern States, exclusive of Maryland, Kentucky and Oklahoma, increased their crop of corn from 581,004,000 in 1909 to 757,044,000 in 1910. Mr. Knapp, whose work in combatting the cotton boilweevil has placed him in close touch with Southern agricultural conditions, declares that the most gratifying part of the increase is the fact that it is due in a large measure to improved methods of culture.

Every one of the States shows an increased yield of corn by the acre, Virginia's yield having increased this year to 25.5 bushels an acre and Tennessee's to nearly 30, while Mississippi and Texas, with smaller increases of percentage, vastly increased their totals.

that Clagett was released from the Washington asylum because physicians there reported he was not insane, and was then allowed to go free under bond, as was usual in such cases.

When asked whether he would explain why Clagett was released after his arrest on October 12, Mr. Wilson replied emphatically, "I will not."

"That was all published once," the district attorney said, "and I don't intend to go into it again."

The release of Clagett, which has aroused the Maus family and has aroused wide comment, was made on the order of the district attorney on the night after his arrest at the request of Mr. Maus. I went to Miss Maus' place of business in order to explain to her that I was drunk when I threatened to do her injury."
