

DANDRUFF MAKES
HAIR FALL OUT

A small bottle of "Danderine" keeps hair thick, strong, beautiful.

Girls! Try this! Doubles beauty of your hair in few moments.

Within ten minutes after an application of Danderine you cannot find a single trace of dandruff or falling hair and your scalp will not itch, but what will please you most will be after a few weeks' use, when you see new hair, fine and downy at first—yes, but really new hair—growing all over the scalp.

A little Danderine immediately doubles the beauty of your hair. No difference how dull, faded, brittle, and scraggy, just moisten a cloth with Danderine and carefully draw it through your hair, taking one small strand at a time. The effect is amazing—your hair will be light, fluffy, and have an appearance of abundance; an incomparable luster, softness and luxuriance.

Get a small bottle of Knowlton's Danderine for a few cents at any drug store or toilet counter and prove that your hair is as pretty and soft as any—that it has been neglected or injured by careless treatment—that's all—you surely can have beautiful hair and lots of it if you will just try a little Danderine.

GAS IN THE STOMACH IS DANGEROUS

Recommends Daily Use of Magnesia To Overcome Trouble, Caused by Fermenting Food and Acid Indigestion.

Gas and wind in the stomach accompanied by that full, bloated feeling after eating are almost certain evidence of the presence of excessive hydrochloric acid in the stomach, creating so-called "acid indigestion."

Acid stomachs are dangerous because too much acid irritates the delicate lining of the stomach, often leading to gastritis accompanied by serious stomach ulcers. Food ferments and sours, creating the distending gas which distends the stomach and hampers the normal functions of the vital internal organs, often affecting the heart.

It is the worst of folly to neglect such a serious condition or to treat with ordinary digestive aids which have no neutralizing effect on the stomach acid. Instead get some of the famous "Bismarck" Magnesia and take a teaspoonful in a quarter glass of water right after eating. This will drive the gas, wind and bloated right out of the body, sweeten the stomach, neutralize the excess acid and prevent its formation and thus there is no sourness or pain. Bismarck Magnesia (in powder or tablet form) never liquid or milder than any other. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

1918 PEAK YEAR
FOR DRESSED MEAT

American dressed meat production, during 1918, reached the highest mark ever approached in one year, by this or any other country in the world, in the history of the live stock trade, the Bureau of Animal Industry declared today.

In their efforts to overcome the serious meat shortage in 1917, American farmers and meat producers so strained their business that by 1918, the shortage had turned into a "pronounced surplus," the bureau stated, which resulted in making 1918 the highest year in the live stock industry.

But still meat prices cannot come down, because of the present high cost to the farmer in feeding his animals and then bringing them to the market, the bureau stated.

"People Can Afford Price."

"Likewise, all other steps, from producer to consumer become more costly hence the high prices," says a statement of the bureau. "But the unprecedented prosperity of the people as a whole enables them to afford the increased cost. In fact, laboring people probably consumed more meat during the past year than in pre-war times."

Figures made public by the bureau show that total dressed meat production, including lard, during 1918, aggregated 20,129,800,000 pounds. As compared with production during 1917 this was an increase of 3,812,800,000 pounds, three-fourths of which was in pork and the remainder in beef.

Meat exports during 1918 almost doubled those of 1917—rising from slightly less than 1,700,000,000 pounds to over 3,000,000,000 pounds. Despite the fact that the figures do not include shipments to American military forces abroad, the surplus was so great that the enormous extra export demands made little impression on it, said the bureau.

Fourteen Billion Pounds Consumed.

The aggregate 1917 consumption of dressed meat and lard in the United States was approximately 14,500,000,000 pounds, but in 1918 it rose to 17,250,000,000 pounds. This means, after allowing for increase in population, an addition of twenty-three pounds for every man, woman, and child in the country.

The total number of cattle slaughtered in 1918, is estimated at 13,717,400, as against 13,723,800 in 1917. Beef produced from them in 1917 totaled 6,686,000,000 pounds and 7,641,000,000 pounds in 1918.

The bureau stated that in the aggregate more meat is eaten in the United States than in any other country in the world, although some sparsely settled countries raising such meat have a larger per capita consumption.

Farmer Saved the Day.

In conclusion, the bureau said: "While the American people as a whole through their abstemiousness averted the immediate crisis of a meat shortage, it was the farmer who was really the big factor in the ultimate situation. The producer, of course, was expected to do his part, but he did it with such powerful effect that in a single year the meat shortage was turned into a pronounced surplus."

Thus, in 1918, there was not only meat enough to supply all foreign demands compatible with the restricted shipping facilities, but a greatly enlarged quantity was available for home consumption.

NEW YORK, May 2.—Ten officers and 144 men of Base Hospital 46, organized by the Grand Lodge of Elks, of Oregon, have arrived here on the steamer Finland, after eleven months service in France.

The unit saw active service at Bazailles-sur-Meuse, and distinguished itself before and since the armistice was signed.

The Finland brought altogether 2,500 troops, including the Twenty-third, Forty-sixth, and Ninety-sixth Base Hospitals, the Second and Tenth convalescent camps, 71 Virginia, 141 New York, 148 Ohio, and 30 Kansas casuals, and 55 officers and 810 men recovering from wounds or illness.

The steamship Henry R. Mallory, which reached here last night, brought 2,452 troops. Among them is Sergeant Frederick C. Graveline, of Cleveland, said to have been the first enlisted airman to receive the distinguished service cross.

URGENT MAY 4 AS VICTORY SUNDAY

RICHMOND, VA., May 2.—All ministers and other church leaders are asked to observe Sunday, May 4, as Victory Liberty loan Sunday and bring to the attention of their congregations not only the urgency of the Victory loan but its sacred opportunity.

It has been the observation of those prominent in former Liberty loan campaigns that the churches have had enormous influence in furthering subscriptions, and there is every reason why this should be so. Lending to one's country is something more than a business investment. It is a patriotic obligation, and surely patriotism—a deep regard for one's homeland—is a form of religion. The Victory loan is also being called a "Thanksgiving Loan."

EUSTIS SLANDER SUIT GOES TO SUPREME COURT

NEWPORT, R. I., May 2.—The celebrated \$100,000 suit brought by Mr. and Mrs. George Peabody Eustis against Ogden Codman for alleged slander, will go to the supreme court before it comes to trial.

Attorneys for Eustis have filed an exception to the ruling of Justice Barrows, who decided that being called a German was not punishable in the courts.
