

ORTUNATELY, nearly everybody in the United States will eat turkey next Thursday, for Thursday is Thanksgiving Day, and the words turkey and Thanksgiving are, in America, almost synonyms.

To tell a good turkey, D. E. Thomas. who is one of the poultry experts of Philadelphia, says:

"Examine the end of the breast bone -the end that is near the tail. If this is a piece of soft, movable gristle the bird is young. If it is solid, hard bone the bird is old.

"Examine the neck, and open and look into the eyes. Staleness shows itself first in a darkening of the neck. The eyes should be bright and full: dull, sunken, faded, they indicate that the bird has been killed too long. Select a plump turkey, because such a turkey is juicier, tenderer, sweeter. THE ESSENTIAL QUALITIES.

"Those are the three qualities necessary in a turkey-that it be fat, that it be young, that it be fresh-and there is no reason why any one should be fooled. For it is just as easy to tell a good turkey as to tell a good apple or a good peach."

A turkey is hard to raise. That farmer is a lucky man who, hatching out 100, is able to bring thirty-three for chickens. In May they are born. to market. For young turkeys are The Thanksgiving turkey of the first

while the Germans with the same Inaccuracy call it "kalekuter," or bird from Calcutta.

As a matter of fact the turkey is indigenous to America, and Europe knew nothing of it until the Jesuits transported it from Mexico to France. They raised it on one of their farms near Bourges, and on this account there are certain French provinces where to this day in honor of its sponsors the turkey is called a "Jesuit."

The English do not know precisely when the turkey came amongst them. They approximate its arrival in the following antique couplet:

Turkeys, carps, hops, pickerel and beer Came into England all in one year. COOKING THE BIRD.

An old English magazine, the Perfect Gentlewoman's Delight, gives a quaint recipe for cooking turkey. Take and clean your birde on the back," it says, "and bruise all his bones; then season with salt and pepper, grosse beaten, and put into him good store of butter; he must have five

hours' baking." But the best way to cook a turkey is to roast it, stuffing it with truffles. The trufile is a subterranean edible fungus, black and warted outside, and pale and veined within. Hogs are trained to root the truffle up. It is at its best in Perigord, and Perigord truffles are the ones that the American cooks use, for there are no native truffles of any sort in this country.

A statistician estimates that on Thanksgiving Day 7,000,000 turkeys will be eaten in the United States. These birds will weigh 63,000,000 pounds, and they will cost \$9,000,000.

great birds to get sick. They are great | quality is, therefore, from six to seven months old. At that age it is pretty are great birds to be slain by other well matured. The big turkeys-the thirty-pound gobblers, the twenty-fivepound hens-that are to be found upon had last year a fine flock of forty the market are old birds. Prepared turkeys. These birds, like all of their properly, however (parboiled first, then kind, would start out on their rounds roasted slowly, with assidnous bast-

ing), they make excellent eating. The turkey belongs to Thanksgiving because on the original Thanksgiving Day, at Plymouth in 1621, turkey was the feature of the repast. The records of Edwin Winslow describe that oldtime feast as follows:

"Our Governor sent four men fowling so that we might, after a special manner, rejoice together. They four in one day killed as much turkey fowl as, with a little help besides, served the company nearly a week. At which time, among other recreations, we exercised our arms, many Indians coming among us, among the rest their greatest king, Massasoyt, with some ninety men, whom for three days we intertained and feasted."

ORIGIN OF THE NAME. The name turkey is believed to come from the cluck of the bird-"turk. in the early morning, and all day long turk, turk." Dr. Samuel Johnson, in they would move in a great circle. his dictionary, thought the name came through this cornfield, that potato from the country, and made his definipatch-by a regular path that they had tion "Turkey-A large domestic fowl marked out-and, late in the after- brought from Turkey." The French noon, they would get back home. But also have a singular error about this sometimes they would be delayed on bird, which they call "poule d' Inde,"

When gran'ma bastes the turkey We children watch to see
The way she pours the basting on,
As slick as slick can be.

We hear the turkey "fizzle," An' know it's getting browned; But when she puts the basting on, Why then we jus' stan' 'round.

I like the Christmas stocking The frosted New Year's cake; I like the birthday presents My aunties buy or make;

But jus' the bestest time of all Thanksgiving brings to me— When gran'ma bastes the turkey, An' we all stan' 'round to see.

A Selfish Suggestion. The Gobbler-"In this age of the horseless carriage, let me suggest a

### THE NEWEST **AMERICAN**

DUCHESS

This fine and interesting photograph of Miss May Goelet, the new Duchess of Roxburghe, shows the greatest heiress in the world wearing most of her jewels and those of her mother.

Miss Goelet is here in fancy dress 1 Cleopatra, in which character she attended Mrs. Adair's famous ball in London last spring. It was the most splendid fancy dress ball ever given, and especially so in the matter of jewels. The Countess of Warwick was there as Queen Semiramis. Lady Randolph Churchill as a Byzantine Empress, and the Princess Hatzfeldt as Queen Esther with stockingless feet and fewels on her toes.

But among all these society leaders none wore such valuable jewels as Miss Goelet. Her headdress was a mass of pearls, diamonds and rubies blazing with colored light. Ropes of pearls hung down on each side of her face. Her neck was encircled with many necklaces, and her arms were laden with bracelets. The Oriental headdress was admirably suited to her dark type of beauty. The value of her jewels was not less than \$300,-000, but that is a trifle, for she is the possessor of \$30,000,000 worth of New York real estate.

Miss Goelet has been brought up in the British aristocracy. Her aunt, Lady Herbert, is married to the brother of the Earl of Pembroke, head of one of the most ancient families in stituted by himself and the Iowa Corn England. Her marriage to the Duke of Roxburghe, the only eligible Duke in the United Kingdom, will place her fessor Holden wants; it is better re-

# HOT OR COLD.

Device Which Answers For Two Purposes.

The blow hot, blow cold paradox of the "First Reader" finds its parallel In the ventilated food cover illustrated herewith. This is designed to keep butter, cream, milk, meat, jellies, etc., in cool and perfect condition throughout the warmest weather, or, on the contrary, is equally valuable for keep-

KEEPS FOOD HOT OR CCLD.

ing foods warm until served. In the first case the cover is filled with iced water, and in the second it is filled with hot water. Where a refrigerator is available, and even in refrigerators, the food cover can be used to assist in keeping jellies and pastry cold and firm. Where meals have to be kept waiting for irregular diners, as in a boarding-house, etc., the heat-retaining features of the cover are also val-

"Furthest North."

The most northerly railroad in the world was opened recently. For its whole length it lles within the Arctic regions. The greater part of it is in Swedish territory, and only a small part cuts through the narrowest portion of Norway until it reaches the Norwegian port of Narvik. The chief object of the line, which now connects the northern Baltic with the Atlantic, is to open up the rich mineral resources of North Sweden and to carry them cheaply to Narvik. The new railway, which will be known as the Ototen line, is about 140 miles long, and cost about \$7,500,000.-Golden Penny.

Advice to Street Railways.

Deal fairly with the public. Give every man the worth of his money in service and in politeness, and the public will support the corporation in its efforts to please. But attempt to defy the public, show a mean and niggard spirit, and the public will meet the corporation half way in aggressiveness. -Baltimore Herald.

It is estimated that a half a million New Yorkers are awake and busy. legitimately or otherwise, all night.

One-third of the college graduates now are women.

Results in Increasing Crop.

"Let every farmer in the seven great corn States give a few winter evenings and 480,000,000 bushels will be added to the annual crop of the corn belt." In

ting a hundred live kernels in every thirty hills. His plan requires only the sorting by hand of seed corn into lots of uniform size and the filing of the plates in corn planters in such a way as to drop the required number of grains

in each hill. The Iowa Corn Growers' Association has been formed by farmers who be lieve in Professor Holden's theory. W. C. Whiting, of Whiting, Iowa, in charge of the Agricultural Division of the Iowa Commission for the Louisiana Purchase Exposition, has personally presented to Ames College and the Corn Growers' Association a trophy valued at \$450, which will be awarded annually for seventy-five years for the best results in corn growing according to Professor Holden's theory. trophy is entirely unique, representing an ear of corn eighteen inches long, the husks of silver and ear of gold, standing on an ebony case. Upon the base are four scrolls in silver, decorated by tiny golden ears of corn, up-

on which will be inscriptions of the names of the winners of the object for which the cup was given.

# NEW ELECTRIC ENGINE.

The most powerful locomotive in the world has just been built by the General Electric Company, at Schenectady for the Baltimore and Ohio Railroad for use in its tunnel underneath the city of Baltimore. This locomotive marks a very distinctive advance in

electric locomotive design. It will han dle all the freight traffic of the Balti more and Ohio Railroad which passes through Baltimore and will operate over the same section as the present electric locomotive design. It will haneral Electric Company and which have been in successful operation for the past eight years. The picture shows one-half of the locomotive. The complete outfit consists of another section like the one shown, but the two parts are designed to be worked coupled together to a great extent, and the builders regard the double equipment as a single engine. The complete engine is equipped with eight motors, having a capacity of 225 norse power each, making a total capacity of 1800 horse power. It will be capable of pulling the heaviest trains which can be sent out over the road.

MONTANA MINES OPENED THE RELIGIOUS LIFE

20,000 Men.

Passage of Fair Trial Law Expected to Unravel Copper Mine Tangle-Amaigamated Company to Resume Work,

Butte, Mont.-In accordance with a statement made by William Scallon, President of the Anaconda Mining Company and the representative of the Amalgamated Mining Company in Montana to the Butte Miners' Union, that if Governor J. K. Toole would summon the Legislature in special session with a view of the enactment of a "fair trial" bill, which provides for the removal of any case from any Judge where bias and prejudice is shown, the Amalgamated would at once resume operations in Montana, the order was given for all the mines to open upon the receipt of news from Helena that the Governor had ordered an extra session to convene Decem

The Governor has issued the call at Helena, following the presentation of petitions to him from practically every organization of labor and business men in the State of Montana, asking that an extra session be called, that legislation remedial to the present state of affairs be enacted.

The resumption of the Amalgamated properties means the return to work of approximately 20,000 men and the averting of an unusual crisis in Montana, as the Amalgamated Company operates in at least six different counties. In Butte alone it restores a pay roll of about \$25,000 a day. The Legislature is called especially to

pass laws to relieve the industrial condition in Montana, caused by the shutting down of Amalgamated Company's properties. The aim of the session is to pass a

law whereby mining cases may be taken from one Court to another when the Judge in the initial Court is shown to be prejudiced. Other legislation of like character has also been promised. A so-called fair trial bill, of the char-

ncter now proposed, was passed by the last Legislature, but was decided by the Supreme Court to be unconstitu-tional on technical grounds. Recently at Butte Judge William Clancy, of the District Court, gave a decision, in which he said that he

might appoint a receiver at any time for the Boston and Montana Company, one of the largest constituent companies of the Amalgamated. The decision was made on the application of John MacGinnis, a prominent holder of stock in the properties controlled by F. Augustus Heinze, of the Montana Ore Purchasing Company, which has been at war with the Amalgamated for years.

Upon this announcement by Judge Clancy, President William Scallon, of the Anaconda Copper Mining Company and general manager of the Amalgamated, issued orders to shut down all the Amalgamated properties in Montana and elsewhere, declaring that the company, unable to secure judicial fairness in the Courts, could not con-

tinue in business. The works of the Amalgamated Company will at once resume in various parts of the State. This includes the greater mines in Butte, the smelters of the Washoe Company, in Anaconda, the largest in the world; the smelters of the Boston and Montana Company, in Great Falls, also vast in their copacity; the coal mines at Storrs, Belt, Oakdale and in Wyoming; the great quarry in Northern Montana, and the immense umber industries in Western and Northwestern Montana.

age as Duchess of Roxburghe. New York City.-Miss May Goelet was married to the Duke of Roxburghe in St. Thomas' Church, New York City, at Fifty-third street and Fifth avenue. Bishop Doane, of Albany, performed the ceremony, assisted by the Rev. Dr. Ernest M. Stires, rector of the church. Robert Goelet, the broth-

er of the bride, gave her away. The wedding, though a quiet and simple affair, was the most brilliant international marriage since Consuelo-

Vanderbilt became the Duchess of Marlborough. The value of the splendid wedding gifts was estimated at \$1,500,000. The Roxburghe family jewels, which include one of the finest collection of emeralds in Europe, were given by the bridegroom. The Duchess of Roxburghe's gifts include a head ornament of diamonds, a beautiful emerald ring and an old French fan, set with jew-Robert Goelet's gift to his sister is a tiara of diamonds.

Fatal Riots in Spain. Disorders of a serious nature broke out at Santander, Spain. Armed rioters attacked the shops, built barricades in the streets, and set fire to the Passionist Church. During the riots one man and a child were killed and several persons were injured. At Cabolla, in the Province of Toledo, the Mayor of the town was assassinated.

Bryan Agrees to \$7500 Allowance. William J. Bryan, with his counsel, appeared in the Probate Court at New Haven, Conn., for a hearing on the amount of Mrs. Bennett' allowance, pending the adjustment of the Bennett estate. Judge Stoddard's suggestion for \$7500 a year was agreed to by Bryan as executor, and that amount was ordered by the court.

WHEN THE SOUL INVITES ITSELF:

Poem: Divine Presence - True Contentment is Not to Be Found by Those Who Seek It by a Lowering of Their Moral

Lord of earth! Thy forming hand Well this beauteous frame hath planned; Woods that wave and hills that tower, Your that wave and his that tower Ocean rolling in His power; Yet, amid this scene so fair, Should I cease Thy smile to share, What were all its joys to me? Whom have I on on earth but Thee?

Lord of heaven! beyond our sight Shines a world of purer light;
There in love's unclouded reign Parted hands shall meet again.
Oh, that world is passing fair!
Yet, if Thou wert absent there.
What were all its joys to me?
Whom have I in heaven but Thee?
—R. G.

#### Happiness.

-R. Grant.

If we judge men by their actions and the objects which they pursue, their chief desire seems to be that they may attain happiness. A man is called blessed who can invent a new joy, or show his fellow men the way to further pleasures. The chief question asked, in a change of position or occupation, often is: "Will I like the new place better than the old?"

Men will toil hard, early and late, and do it willingly if you can only show them a recompense of happiness at the end of it all.

a recompense of happiness at the end of it all.

But this world is, after all, a sad one. It is full of disappointment, sick, sorrowing, baffled and defeated men. The cynic is everywhere in evidence. Bright hopes are blasted. Riches take unto themselves wings and fly away. Position, talent, and hopeful worldly influence are no protection against the plague of black care.

We have then, says the Chicago Advance, the anomaly of man fitted for happiness, and desiring it above all things, yet having it flee from him. Some philosophers have declared that the whole world is an illusion, and that there is no such thing as reality. It is impossible, we are told, for a man to attain the things which he desires, and that it is useless for him to fret himself about them. The Greeks expressed this idea in the fable of Tantalus in Tartarus. He was immersed in water up to his chin and a tree loaded with luscious fruits hung its branches just over his head. He was thirsty and hungry, but when he attempted to drink, the water fled from him, and when he tried to pick the fruit, just above his head, it vanished away.

But why should happiness flee from any when he so ardently desires it? The

But why should happiness flee from a man when he so ardently desires it? The trouble is that men for the most part seek it through relaxation, and the lowering of the standards. It is the old history of Adam and Eve over again. There was attline down or word interrity on their of Adam and Eve over again. There was a settling down of moral integrity on their part for the grasping of what they considered a greater happiness. Men ask to-day: "Why should we obey this or that law of God, man, or of our moral nature, when it bars the way to our enjoyment?" This is part of the revolt against what men call "Puritanism." The Chinemen smokes his only many regard. chinaman smokes his opium pipe regard-less of the consequences, because it, for the time being, brings to him dreams of surprising bliss. Men seem to care little for the consequences in their pleasures, and nence come their wanderings in bleak wildernesses

wildernesses.

Jesus Christ showed that if a man would Jesus Christ showed that if a man would or truly happy he must attain to this happiness through a mastery of the situation. There is no joy like that of the victor. It is the man who has gone down into the tumult and uproar of life and fought and conquered in some good cause who tastes of the nectar of supreme joy. The master words with Christ were: Fight watch and pray;" here is the entrance to the real Utopia for which men seek. The man who has no mastery over his appetites, passions and temper can

his appetites, passions and temper can never know what genuine joy is.

The conditions of happiness which pro-duce no illusions and brighten more and more unto perfect day are not difficult to name. There must be some supreme object of love and hope upon which the heart is fixed. There must be a harmony with the will of God. There must be endurance in the cause of Jesus Christ. There must be an inner peace which no outer tumult can disturb

Did Not Care For His Soul.

William A. Sunday, the well-knowner evangelist and ex-baseball player, who was recently ordained as a minister by the Presbyterians in Chicago, and who was largely instrumental this spring in making Marengo, Ill., a no-saloon town, tells this striking personal experience:

"I will never forget a scene I witnessed as long as I live. I left the tent where we were holding meetings down in Paris, Ill., one night, and among the number who left last was a young man that I was especially attracted to by his fine looks. I walked down the street with him, and recially attracted to by his fine looks. I walked down the street with him, and put to him the invariable question, 'Are you a Christian?' He said, 'No, sir, I am not.' Then I used every Scripture and every argument to get him to promise me to give his heart to God, but could not succeed. When about to separate I said to him, 'Are your father and mother alive?' 'Both alive,' said he. 'Is your rather a Christian?' 'Don't know; he has been a steward in the church for several years.' 'Is your mother a Christian?' 'Don't know; has been superintendent of a Sunday school of the same church for some time.' 'Have you a sister?' 'Yes, sir.' 'Is she a Christian?' 'Don't know; she has the primary department in the Sunday school.' 'Do your father and mother ever ask the blessing at the table?' 'No, sir.' 'Did your father, mother mother ever ask the blessing at the ta-ble? 'No, sir.' Did your father, mother or sister ever ask you to be a Christian?' 'Mr. Sunday, as long as I can remember my father or mother or sister never said a word to me about my soul.' He said. 'Do you believe they think I am lost?' I could not answer such arguments. It is six years ago this coming October since I heard this. I can hear his words ringing in my ears, 'Do you believe they think I am lost?'

# God's Promises Sure.

God is ever better than we think. We are not so ready to realize that God is sure to make good His promises, as He is ready to remember His every assurance and to give good sifts according to His children's needs. One of God's loved and loving needs. One of God's loved and loving children, expressing gratitude for the coming of a longed-for blessing, said: "God told me long ago that some day this should come to me, and I could not doubt His word. When it came I was not surprised, only in a way as the coming of the inevitable surprises us. Sometimes, you know, we are surprised to see the sun rise or the tide come in." Oh, that all of us were as ready to be as sure of God's word as of the rising of the sun or the coming in of the tide!—Sunday School Times.

# Recompense of Suffering.

Have you ever thought that some day Have you ever thought that some day you will never have anything to try you or anybody to vex you again? There will be no opportunity in that happy realm to learn or to show the soirit of patience, forbearance and long suffering. If you are ever to learn these things you must learn them now, and oh, when you shall see those glorious jewels shining in some one else's crown which were formed out of tears of sorrow and drops of blood, what would you not give to be able to live your life over again and win the recompense which can only come from trial and sufwhich can only come from trial and suf-fering?—Matthew Simpson.

# Puff For Our Powder.

Naval experts are loud in their oraise of the smokeless nowder which is being man-ufactured at the torpedo stations. New-port, P. I. They say recent experiments with it on the ships of the North Atlantic, South Atlantic and Asiatic squadrons prove it to be the best of its kind ever used by these warships, and to have no could in any foreign navy. equal in any foreign navy.

# Training School For Chauffeurs.

A new feature of the Boston Young Men's Christian Association is an automobile school for the training of expert chauffeurs.
