About Effecting Insurance on their Lives: 1st. Insurance at Stock Rates, being from 20 to 30 Per Cent. less than the Rates charged by Mutual Companies. 2d. Each Policy-holder is regarded as a Stockholder to the extent of one Annual Premium on his Policy, and will share in the Profits of the Company to the same extent as a Stock-

rolder owning an equal amount of the Capital Stock. 3d. Every Policy issued by the Company is non-forfeitable, and contains a Clause stating its exact Surrender Value. Before Insuring Your Life or Accepting the Agency of any

READ THE FOLLOWING:

A lengthened experience has demonstrated that the rates of Premium ordinarily charged by Life Insurance Companies are from twenty-five to the ty per cent, in excess his Excellency is now arraigned before of what are necessary for a safe and legitimate conduct of the business. In other words, carefully and prudently-managed Companies charging "Mutual" rates have been able to return to their policyholders from 25 to 30 per cent. of the amount charged

When Life Insurance Companies were first organized, the reliability of the data upon which the premiums were constructed had not undergone the test of experience. It was thought, therefore, no nore than common prudence to adopt a scale of premiums which would, in any event, meet all the presumed and unforeseen contingencies of the

As long as the matter was involved in some doubt, it was better to fix the rate too high than to incur the risk of making it too low; because, in the former case, the error ould be easily remedied, at least in part, by returning to the policyholders, at certain ntervals, such portion of the premium charged as was found unnecessary for the urposes of the business and the complete security of the Company. Experience, however, having satisfactorily demonstrated that these rates are exceed, what possible excuse can there be for maintaining them?

Availing themselves of this experience, the Directors and Managers of the Universal Life Insurance Company, at its organization, adopted a scale of premiums in accordance therewith, and which has proved to be fair and adequate, and all that was necessary to meet the requirements of the business. These premiums are about twentyfive per cent. lower than those charged by Mutual Companies.

It also appeared, mash uch as the rates so established were as near as could possibly

be determined fair rates, and not in excess of what Insurance has previously cost the Policyholders in Mutual Companies, that any profits arising from prudent management justly and properly belonged to the stockholders of the Company, for the risk Experience has shown that there are sources of profit in the practice of the business

any owing to the medical selection of good lives, a gain in interest on the investments of the Company over that assumed in the calculation of its premiums, the profits derivable from the lapsing and surrander of Policies by the members, and from other Carolina may lose from the great conspi-

Profits from these sources, in a Company possessed of a capital of \$200,000, and doing a fair amount of business, would give to the 'stockholders dividends largely in excess of what were counted on by the Directors of the Universal at the time of its organization. They have, therefore, determined to divide among the policyholders of the public debt of South Carolina. Is it still that the public debt of South Carolina. Is it still that the public debt of South Carolina. Is it still that the public debt of South Carolina. the Company a large part of the profits accruing from the sources named, all of which have heretofore been divided among the stockholders. The plan adopted for such division is as follows: Every person who may hereafter

insure with the Universal will, for the purposes of division, be treated as a steckholder to the extent of one Annual Premium upon his Policy; and will share in the profits of the Company to precisely the same extent as a Stockholder owing an equal amount are we drifting? Whither sails the ship

By this system of Insurance, original with the Universal, the policyholder secures he following important advantages FIRST. Insurance at the regular "Stock" rates, requiring a primary outlay of about twenty to thirty per cent. less than that charged by Mutual Companies, and which is equivalent to a yearly "divident" paid in advance of that amount on mutual

rates. This low cost of insurance is worthy of attention. Since its organization this Company has received in premiums from its policyholders the sum of \$1,517,000. To company has received in premiums from its poincyholders the sum of \$1,517,000. To effect the same amount of insurance in a Mutual Company would have cost them an initial outlay of \$2,000,000. By allowing its pelicyholders to retain in their own possession this excess of \$483,000, the Universal has virtually paid them a "dividend" of \$483,000, and paid it, too, in advance, instead of at the end of one or more years. It is impossible to find any example of a Mutual Company furnishing insurance at so the remaining in the control of the control low a cost by returning to its policyholders an equal amount upon similar receipts. Second. Participation in the legitimate profits of the Company, upon a plan which

secures to the policyholders the same treatment which Directors and Stockholders award to themselves. This system of participation, in connection with the low "stock" rades of premium, must necessarily secure to the policyholders every possible advantage to be derived from prudent and eareful management.

The low rates of premium compel economy, and, independent of participation, guarantee to the policyhoider his insurance at a rate which is not in excess of the cost in well managed mutual companies; while, by the proposed plan of participation in what may be considered the legitimate profits of the business, the cost will be still

Thus by the combined advantages arising from low stock rate and participation in the profits it is confidently believed that the UNIVERSAL LIFE INSURANCE COMPANY offers insurance at its lowest practicable cost.

Those of the existing Policyholders who desire to participate in the Profits under the new Plan can do so by making application to the Head Office, or to any of the Company.

LINCOLN'S EMANCIPATION PROCLA-MATION .-- A Washington letter-writer hus refers to the burning of the emancipation of Lincoln:

of Lincoln:

It is announced that the original copy of Lincoln's proclamation, by which the people of the South were robbed of four hundred millions of dollars worth of property, was consumed in the Chicago fire. It is further stated that this precious document cost the people of Chicago twenty-five thousand collars. Now can any one tell how the people of Chican any one tell how the people of Chicago got possession of an original document, which belongs to the archives of the Government, and who got the twen ty-five thousand dollars?

The Macon (Ga.) Telegraph, under he heading of "Grand Collapse of South Carolina Carpet-Baggism in Wall street,' says: "It will be seen by the morning dispatches that the carpet-bag plunderers of South Carolina are in New York endeavoring to cover up their tracks and World, who has looked into the matter over twenty millions of State bonds have been printed and fraudulently issued for the negotiation of which the Financial Agent holds claims against the State to the amount of \$4,000,000. Scott issues a manifesto claiming that nine millions what he says? We fear the old State is gone up at last-a victim alike to Radical fraud and tyranny.
