

THE KITCHEN CABINET

HERE is an ugly kind of forgiveness in this world—a kind of hedgehog forgiveness shot out like quills. Men take one who has offended and set him down before the blowpipe of their indignation and scorch him and burn his fault into him, and when they have kneaded him sufficiently with their fists, then—they forgive him.

—Henry Ward Beecher.

MEATS.

The German sour meat is not well known among other nationalities, and is so altogether good that it should be better known.

German Sour Meat.—Add to a half cup of vinegar a cupful of water, one onion and a teaspoonful of whole allspice, one tablespoonful of sugar and salt to taste. Put a piece of meat for roasting in this, turning it often; let stand three days, when it is ready to brown in fat and roast, using the pickle to baste it when roasting.

Sour Batten.—Take a nice piece from the round, lay in vinegar, with an onion, salt, allspice and pepper, with one bay leaf; let stand three to five days, depending on the amount of the meat. Brown the meat in a deep frying pan, pour in the vinegar and sufficient water to cover the meat; simmer until the meat is tender. Strain the gravy from the spices, and thicken with flour before serving.

Mutton With Peas.—Cut mutton in serving sized pieces, brown and put to cook in a small amount of water; when nearly done add a can of peas and season well. Serve with the peas poured over the mutton.

Brown Stew.—So few people know how good a brown stew may be. Cut the meat, which may be the tougher portions of the round or a piece for stewing. Cut up in small pieces and brown in a little hot suet which has been tried out. Add a small chopped onion, and let it brown with the meat. Dredge with flour, which will give the gravy thickening, and cook with boiling water, just kept at the simmering point until the meat is tender. Serve with boiled potatoes. The seasoning may be given before the flour is added to the meat.

Hamburg Steak.—Season hamburger steak with a chopped onion, allspice, cloves, paprika and salt. When ready to serve pour over a cup of well seasoned tomato sauce.

One chicken will serve a small family for several meals. Fry the bits liked best, stew and have biscuits and gravy with the larger portions.

Nellie Maxwell.

THE KITCHEN CABINET

THE reason that cooking so fails of its purpose, is that its practice is far below the rank of other human industries, and therefore oftener more of a hindrance than a help.

—Ellen Richards.

BROTHS FOR THE SICK.

Broth is a liquid containing the juices of soluble parts of meat and bone which have been extracted by long, slow cooking. When cold, it is more or less solid, according to the gelatinous nature of the ingredients.

The chief object in making broth is to obtain the largest possible amount of nutriment from the meat, so we cut it in small pieces and soak it in cold water, using the water as well as the meat in the slow cooking which follows. A tightly-covered kettle which will retain the steam is desirable, otherwise much of the flavor is lost by evaporation.

Mutton Broth.—Mutton broth is the accepted kind for the convalescent. Wipe a piece of the neck weighing two pounds, cut off all skin and fat and cut the meat in small pieces. Put the bones into the kettle with the meat, add cold water and let them stand an hour to extract the juices. Heat gradually to the boiling point, season with salt and pepper and simmer for two hours, but do not allow to boil. Remove fat and strain through a coarse sieve. Serve hot. In re-heating, use a double boiler.

Three tablespoonfuls of rice or barley may be added; soak the barley over night, add to the broth and cook until the grains are tender. If the broth is made the day before and cold, the fat may be easily removed.

Nutritious Beef Broth.—Cut three pounds of solid meat from the shoulder or shin in small pieces, put the cracked bone into an earthen jar, cover with cold water and cook slowly with the meat ten or twelve hours in a slow oven. A fireless cooker is an ideal place to prepare this broth. Strain through a colander, add salt and cool quickly. When cold, remove the fat. Serve cold as a jelly or heat to 170 degrees; not higher, as boiling injures its value.

Egg Broth.—Beat the white and yolk of an egg separately and add the yolk gradually to a cup of hot beef broth, stirring constantly. Add salt and fold in the white of egg, reheat carefully and serve hot.

Nellie Maxwell.

WOULD NOT LEAVE THE RAILS

Apparently Fatally Damaged Locomotive Went on Its Way and Finally Stopped of Own Accord.

That a locomotive running 50 miles an hour can lose a main driving wheel, break her side rods and a connecting

Enine Damaged When Wheel Came Off.

rod, strip off her outside fittings, dash down grade and around curves for a quarter of a mile, and finally abandoned by her crew, bring the train to a stop in a hazardous spot without injuring a passenger or derailing a single pair of wheels.

was demonstrated recently near Waterbury, Vt. This extraordinary accident was the result of a broken axle which snapped off at the journal box. Escaping steam and broken rods, flailing the cab, forced the engineer to jump after setting the brakes; and the fireman followed. The train comprised four cars and few passengers knew an accident had occurred until the train stopped. Apparently the broken axle was due to a flaw in the steel, and the illustration shows the crystalline structure as a light spot.—Popular Mechanics.

ALL FOR ECONOMY OF TIME

Thousands of Inventions Designed to Assure Increased Speed on the Railroads.

Time is the very essence of life, and the saving of time is the very essence of Americanism. The patent office, with its million patents, is the great irrefutable evidence of that—the great monument to the inventive genius of men who have bent their mental energies to the creation of devices that meant economy of time and made American life the great, thrilling whirl it is today.

It would have been a long leap of the imagination from the beginning of American invention down to the present, and it will be a long leap from the present to the end of the chapter—the future of more wonderful wonders than we have today.

We who take interest in the progress of railroading have perhaps narrowed our vision. Invention has given no greater impulse to progress than in our field. But to all men in all industries the perspective must readjust itself to their viewpoint, and their industry strides foremost. Ever, though, to the great railroad army the fascination of remarkable development lies along the paths of steel that unite the limits of the land.

THE YARD ENGINEER

Ain't no girls a wavin' at the hoghead on the goot; But there's lots o' stick coal dust in his throat.

Ain't no lovely landscape stretchin' far into the sunset glow; But it's bustle when the head shack signals "Go!"

Ain't no field o' wavin' grain; "Get them empties off the main!" Ain't no pretty posies bloomin'; Shove that box car into clear! Forty-three will soon be comin'; So you better keep things lummint' If you want to stay an' draw your pay as switchin' engineer!

Never-changin' scenery; some old criss-cross bunch o' tracks; Same old section hands a-drivin' carpet tracks.

Same old signals showin' red when you want to see 'em white; Same old headlights loomin' big an' bright.

"Romance is dead." I guess that's true. "An hour's time on Number Two!" But I haven't gone in mourning, an' the reason's very clear: For in this existence dizzy I am kept too bloomin' busy A-tryin' to stay an' draw my pay as switchin' engineer.

Engine Fatalities Reduced.

The result of federal inspection of locomotive boilers has reduced by 60 per cent. fatalities during the past year over the year 1912, and over ten per cent. in the number of injured, according to the annual report of Frank McManamy, chief inspector of locomotive boilers of the interstate commerce commission.

Five hundred and ninety-two locomotive accidents occurred during the year; 54,522 locomotives were ordered repaired because of defective parts, and over 3,000 engines with defective wheels likely to cause serious accidents, were not permitted to be used until repaired.

Obliging Conductor.

When a train side-tracked at Pickering the other day one of the passengers got off to stroll around and view the scenery. The train pulled out and left him strolling and viewing. When it arrived at Hopkins the conductor found that one of his passengers was missing, so he obligingly waited until the lost sheep had arrived on a hand-car, which he propelled himself. That is what we call a real courteous conductor.—Kansas City Times.

Home-Raised Colt.

Still the wonder grows that a greater number of farmers do not raise more horses and mules. Several days ago Mr. W. E. Winn sold a home-raised colt to his brother, Mr. J. E. Winn, for \$200. Those who saw the fine young mare say she was a great bargain at that price. The Winn brothers can afford to keep broodmares, because they always grow an abundance of corn at home to supply the farm.

"Cured"

Mrs. Jay McGee, of Stephenville, Texas, writes: "For nine (9) years, I suffered with womanly trouble. I had terrible headaches, and pains in my back, etc. It seemed as if I would die, I suffered so. At last, I decided to try Cardui, the woman's tonic, and it helped me right away. The full treatment not only helped me, but it cured me."

TAKE

Cardui
The Woman's Tonic

Cardui helps women in time of greatest need, because it contains ingredients which act specifically, yet gently, on the weakened womanly organs. So, if you feel discouraged, blue, out-of-sorts, unable to do your household work, on account of your condition, stop worrying and give Cardui a trial. It has helped thousands of women,—why not you? Try Cardui. E-71

Executor's Notice.

Notice is hereby given that on Saturday the 23rd day of May, Prox., I will make a final settlement on the estate of Mrs. Mary A. Holley, in the office of the Probate Court, in and for said County, and then and there I will apply to the Probate Court for a final order discharging me from the office and duties of Executor of her estate.

R. N. Broadwater,
Executor.

Cure for Stomach Disorders.

Disorders of the stomach may be avoided by the use of Chamberlain's tablets. Many very remarkable cures have been effected by these tablets. Sold by all dealers.

AN ALL 'ROUND FERTILIZER

WE HAVE SPENT YEARS IN STUDY, MIXING AND DEMONSTRATING THE FORMULAE WHICH GO TO MAKE UP THE S. S. FERTILIZERS. AS A RESULT WE OFFER IN S. S. BRANDS AN ALL 'ROUND FERTILIZER. ALL FERTILIZERS LOOK ABOUT ALIKE IN THE SACK, BUT THE DIFFERENCE COMES OUT IN THE FIELD TEST. THAT IS WHERE S. S. BRANDS WIN OUT. WE SEE TO IT THE PLANT FOOD IS THERE AND PROPERLY BALANCED TO INSURE RESULTS.

WE DO NOT USE NITRATE OF SODA

As a source of ammonia (nitrogen) for our cotton and corn fertilizer. It leaches out with the first rain. It should only be used as a top dresser and for truck. We employ

FISH, BLOOD AND OTHER ANIMAL AMMONIATES

As the chief source of ammonia for our S. S. brands, knowing these ammoniates to be the best plant food. We also furnish cotton seed meal mixtures, when ordered. If your dealer does not handle S. S. goods write us, direct. Free money-purse and fertilizer booklet sent upon request. All S. S. fertilizers guaranteed to drill freely and to be in A-1 mechanical condition. **Order Early and Avoid Car Shortage.**

Cotton Requires Fish-Scrap—

ROYSTERS

TRADE MARK

REGISTERED

Are the original fish fertilizers

Fertilizer ammoniated with Fish-Scrap is universally admitted to be the plant food best suited to the cotton crop.

This is not a theory, but a fact proven by the experience of many. The popularity of Royster's, the original and genuine fish-scrap fertilizer has caused a host of brands to appear with fish in the name: if you want to be sure of getting fish in the goods as well, be sure to buy the brand that made fish-scrap famous; F. S. R.

If you are not already acquainted with the splendid results from ROYSTER'S fish-scrap fertilizer, we simply ask that you test it alongside any other brand and abide by the proven results.
