Fine Horses.

We refer our readers to the advertisement of Mr. A. F. Gooding, and would cordially recommend our friends, especially those wishing extra fine horses and mules to give him a call. They are as fine as any we have seen in this market since the war.

Crums.

The Columbia Rifles, have at last been commissioned by Governor Scott. The names of the officers are as follows: Richard O'Neale, Jr., Captain; C. J. Iredell, First Lieutenant; W. H. Manning, Second Lieutenant.

During the week ending September 3d, there were twenty six deaths in Charleston—seven whites and nineteen colored.

Radical Row-Row.

The Radicals had a row-row at this place yesterday. A goodly number of the Radical "lights" from Columbia were present on the occasion. Chamberlain and others were expected on Monday, but failed to make their appearance, and the small crowd of the colored population who had assembled at the passenger depot returned, after beating and playing a tune or two, very much disappointed. We think that there will be more than two hundred and fifty persons present at the speakers stand.

Turbine Water Wheels, Engines, &c.

In inviting attention to the card of Messrs. Poole & Hunt, Engineers and Founders, of Baltimore, notice is especially called to their celebrated "Jeffell's American Double Turbine Water Wheel," which has established by its superior qualities a national reputation. Some idea may be had of the favor this Water Wheel has found, from the fact that there are now about five thousand in operation.

Messrs. Poole & Hunt are besides thorough Engineers and Founders, and have unsurpassed facilities for supplying everything in their line, including Steam Engines, Flour, Grist and Saw Mill Machinery, Shafting, Pulleys, &c.

Resolutions of Respect and Condolence.

At a meeting of the Fairfield Agricultural Society, held on Monday last 5th of September, Mr. B. R. Stuart obtained the floor and said:

MR. PRESIDENT:—I rise as the spokesman of many sympathizing friends here present, to discharge the sad duty of announcing to this Society the death, since our last meeting, of Capt. A. S. Gaillard, one of its most earnest and efficient members, one who, in every respect, set us, to the full extent of his ability, an example of pure christian conduct and of sincere devotion to duty. This Court House which, time and again, at every one of our meetings, once knew him, will know him no more forever. My friend (Mr. McKinstry) just now well said, that in the promotion of the objects of this Society consisted our hope and our salvation. Mr. President, I believe it; and I consider the meetings of this Society as of more importance to our material interests than any political meeting whatever. But, sir, there is another salvation of which the death of our friend reminds us, which we are prone to forget; and there is another hope that we are prone too little to remember. For, sir, when we stand as we now do over the grave of one whom we have known and loved, and lost, we can only lift up our feeble hands and streaming eyes to Heaven, and say: "Now, Lord, what is our hope? Truly our hope is even in Thee."

I beg leave to offer the following preamble and resolutions:

Whereas, since our last meeting, in the wise providence of a merciful God, the rod of severe affliction has been laid upon this community by the removal of our esteemed friend and fellow-citizen, Capt. A. S. Gaillard, from our midst:

Resolved, That we mourn his early death and untimely loss as that of a pure christian gentleman, a gallant soldier, a public-spirited citizen, an earnest worker in behalf of the interests of Fairfield, and a valuable member of this Society.

Resolved, That we extend to his afflicted family the assurance of our sincere sympathy with them in their sorrowful bereavement.

Resolved, That these resolutions be recorded among the minutes of this Society, and that they be published, and that the Secretary furnish a copy to the family of the deceased.

The preamble and resolutions were seconded by Mr. G. H. McMaster and unanimously adopted.

The Great Southern Piano Factory.

We refer with special pleasure to the advertisement of the Great South-

ern Piano Manufactory of Messrs. Wm. Knabe & Co. of Baltimore. This factory is now one of the largest in the world, employing three hundred and fifty hands, and turning out over forty instruments per week.

The Knabe Piano has by its superiority not only well nigh driven those of Northern manufacture from the home market, but also enjoys a large sale in New York, Philadelphia and throughout the entire North and West, besides their largely increased Southern trade. They have received no less than 63 first premiums, among which we note those at the fairs at New Orleans, Jackson, Memphis, Wilmington, Richmond, Macon, &c., received this season. For durability we would specially recommend them as being made in a Southern City, with special view to the trying changes of Southern climate.

A CARD.

COUNTY AUDITOR'S OFFICE,
Fairfield County, Sept 5th, 1870.

Having heard that all errors relating to taxes are laid to the charge of John W. Clarke, the County Treasurer, I would in justice to that gentleman and all concerned make the following statement:

The present system is a new one, and the books required to be kept are complicated; and errors must necessarily arise. Often a property holder and his agent make separate returns at different times of the same property: or the property holder makes a return to the Assessor and another to the Auditor. Property changes hands, and the different owners return each the same property. Hence mistakes must arise, and without blame properly attributable to any one.

I am ready at all times, to give the necessary explanations; and in proper cases to correct errors.

J. S. STEWART,
County Auditor.

THE WAR IN EUROPE.

Night Dispatches.

Berlin, September 9.—After a protracted conference, the members of the Northern German Confederation decided that the French provinces of Alsace and Lorraine shall be annexed to Germany and not to Prussia individually.

Paris, September 9.—Washington's address to the crowd which surrounded him last night is as follows: "I thank you on the part of my government, and shall have great pleasure in transmitting the thanks you express for its recognition of your new republic. In my communication, to which you make such kind reference, I have but made known the sentiments of the President and people of the United States, who take a profound interest in the great movement just inaugurated and will desire most fervently its success and the happiness and prosperity of the French people. Existing themselves under a republican government, they know how to appreciate its benefits. With warm hearts and language, they felicitate their former allies on the accomplishment of a pacific revolution, free from blood and claiming the sympathy of all lovers of true liberty."

France, September 10.—Ricotti has been appointed Minister of War. A great number of citizens of the Papal States have petitioned Victor Emmanuel to occupy Rome.

Paris, September 10.—Bismarck has resigned the ambassadorship to Rome.

The Journal Officiel publishes letters from Italy and Switzerland recognizing the republic, and Favre's responses thereto.

New York, September 10.—The Herald's special from Sedan, yesterday says that five corps d'armee are marching on Paris. They will take assigned positions ten leagues from Paris on the 14th.

Paris, September 10.—The Guide Mobiler have all the gates closed. Protestations by the radical journals against violence have had the best effect upon the people. They have been made aware that revolution does not mean anarchy.

The journals approve of the project for a convocation of the Constituent Assembly as depriving the Prussians of any chance to make a claim for indemnity, there being no general government.

There is an immense crowd of strangers at Havre, and the train-hence are incapable of carrying the crowds from the city.

The forests of Clamart and Meudon are being destroyed.

The publication of La Marseillaise has been suspended. All of the editors have abandoned the concern.

Berlin, September 10.—The following from the Prussian headquarters at Rheims, dated last night, was received to-day: "More than 25,000 prisoners were captured in front of Sedan before the surrender, and 83,000 capitulated with Sedan; of these 14,000 are wounded. Four hundred fields pieces, including seven; mitrailleuses and 150 siege guns, with 10,000 horses and an immense amount of war material, were also captured."

London, September 10.—Bismarck is negotiating for admission to the North German Confederation.

Stragglers are still pillaging on the Belgian frontier.

Brussels, September 10.—At the present pace, of the army, the Prince Royal and the Bavarian corps should be in their designated positions around Paris on Wednesday. From these points they will slowly close in around the French fortifications.

The Prussians force was at Compiegne this morning.

London, September 10.—It is said that the Prussians hold Chateau-Thierry and Epervier. A force of 100,000 has passed Vitry-la-Francaise, nineteen miles southeast of Chalons.

Paris, September 10.—The suburban residents have been ordered to evacuate the territory reached by the guns of the fortifications.

Excesses are reported to have been committed by the Red Republicans at Toulon and Lyons.

All the tunnels on the railroads of the Seine and Marne are blown up.

News Items.

Washington, September 9.—The Cabinet to-day considered the proposition of joining the European powers in order to produce peace between France and Prussia, but came to the conclusion to send a telegram to our Minister at Berlin, which has been done, to the effect that this government cannot act in connection with other nations, but, if its good offices shall be required, it will be happy to lend them to bring peace to the two great powers with whom we have a traditional friendship.

New York, September 10.—The Executive Committee of New York Democracy, at a partial meeting, resolved to heartily thank Washburne for the prompt recognition of the French republic.

Philadelphia, September 10.—The carpet factory of James Bronley & Bros. was burned to-day. Loss \$105,000. Fifteen hundred out of employment. Ten thousand unfinished carpets were burned.

The following is a succinct but spirited account of the Kilkenny cats:

There once was two cats in Kilkenny, And aith thought there was one too many:

So they quarrelled and fit, And they gougged, and they bit, Till, excepting their tails And the tips of their tails, Instead of two cats, there wasn't any.

The gaitless are usually without suspicion but the dishonest man always suspects others.

What Does Reason Say?

The little mongoose when bitten by a deadly serpent resorts to a certain plant, eats of it, and escapes the effect of the poison. That is instinct. Human beings on the other hand, must depend on reason and experience in selecting the means of procuring health, and reason and experience influence? Now, what does reason say on this vital subject? I do not tell you that to invigorate and purify the system is the best way to prevent the invisible poison which germs disease? Surely it does. The next question is, what guide shall we follow in choosing a medicinal agent? Reason replies let your monitor be experience. Well, the experience of eight years comprised in one unbroken series of satisfactory testimonials assures us that Lippman's Stomach Bitters possess strengthening, regulating and antiseptic properties which are not combined in the same happy proportions in any other preparation extant. This therefore is the antidote to which reason bids us resort when our health is imperilled either by the malarious which produces epidemic disorders, or by any other cause, whether inherent and constitutional or connected with our habits, occupations and pursuits.

The removal of a noxious reptile is scarcely more subtle and dangerous than that which lurks in foul air and impure water. To escape the fevers, bilious disorders, disturbances of the bowels, and other serious maladies produced by these insalubrious elements, it is absolutely necessary that the stomach and all the secretory organs should be so quick, in a constant condition. Upon the amount of resistance which the system can oppose to the deleterious that assail it, the safety of the health depends, and it is because the GREAT VEGETABLE INVIGORANT imparts energy and regularity to the most important functions of the body, that it can be recommended and guaranteed as an inviolable preventive medicine.
