-- Special dispatches to the New Orleans Democrat of last Saturday, show the following condition of the cotton crop in the States

Alabama reports show no change in the condition of the crops. The vield is now estimated at 80 per cent. of that of last year. In Louisiana, rain has fallen, but generally no damage has been done, except to interfere with the marketing of the crop in some parishes. Unpicked cotton is seriously damaged in quality, and perhaps in quantity. About nine-tenths of the cotton is picked labor is scarce; the roads are in terrible condition and cotton cannot be moved. Many farmers are holding back for better prices.

In Mississippi, one fifth of the crop remains unpicked; rain has fallen for a week, doing some damage; the yield is now estimated at

85 per cent. of last year's crop.
In Tennessee, the weather has been rainy and very unfavorable for picking. The yield is now estimated at 57 per cent. of last year; about four-ninths of the crop has been marketed, while five ninths remain in the hands of

farmers and producers. In Texas, a heavy rainfall is interfering with picking and damaging the crop remaining in the fields. About 90 per cent. of the cotton is picked and about three-quarters has

- We take the following from the Winnsboro News in connection with the name of Gen. Bratton as the choice of many people for the next Governor of the State:

A paragraph has appeared in some of our exchanges to the effect that "General Bratton has resigned his chances for the governorship in favor of General Kennedy." We are not able to trace it to its source and do not know how it got into circulation. We have had no opportunity of interviewing either of the genthem, we feel justified in saying that neither is responsible for this squib. It is early in the canvass, very early indeed, to put any such report in circulation. No possible good can come of it, whether propagated in good faith or not. Without having had any communication with General Bratton on the subject, our knowledge of him and his high appreciation of public duty, justifies us in saying that the report in question is without foundation. Gen. Bratton has always held that public office is not a personal perquisite, to be claimed for one's self or declined in favor of anyone else. Although prominent in the councils of the State since the war, and an earnest worker in every movement undertaken for the good of the people, he has ever shrunk from claimit is for the people and them alone to make the selection. He has long been the choice of a large portion of the State for governor, and we believe still is; and his friends are determined that he shall not be crowded off the track by newspaper squibs in advance of the opening of the canvass.

Blaine's Southern Tour. - The Washington Post has the following in reference to Secretary Blaine's project-

ed visit to the Southern States:

Many influential Southern newspapers are pleased at the announcement that Secretary Blaine intends to make a Southern tour this Winter, and express the hope that it will open his eyes to the true state of affairs in that section and be the occasion of an acquirement of information regarding it, which he does not now possess. This will not be exactly the result. Southern people will find out more of Mr. Blaine than he is likely make bids this week. The understanding is to learn of the Southern people. They will discover that the Secretary is a very pleasant gentleman and a most agreeable companion, and that he has no more enmity toward the South than any other section of the country. They will make up their minds that he has never believed any of the outrageous charges and bloody shirt slanders which for many years have formed so large a part of his political speeches, and that his use of campaign be called for consideration at the approaching thunder of that sort is intended solely to influence Northern voters and not to work at all to the detriment of Southern people. There is a question as to whether a man of the mental stature of the Secretary be justified in wholesale denunciation of a people for political purposes, but there can be none as to is disbelief in all of it. On the other hand, Mr. Blaine has very little to learn. As a student, a politician and a close observer of men and events, he is as thoroughly acquainted with the political, social and material condition of the South as if he had been a yearly visitant within her borders. He knows exactly why the intelligence, respectability and wealth of that section has not, cannot and will not, aid and comfort the organization of which he is an eminent leader. No, it is not Blaine, who is yet to know the Southern people, but the Southern people who do not know Blaine, that should take advantage of an opportunity for a better acquaintance likely to be offer-

ed before many months. The Blue and the Gray. - During the meeting in Cincinnati, on Tuesday evening, of the recently formed ex-Confederate organization, a remarkable scene occurred. While the the association was still occupied with business, a visit from Gens. Dickinson and Stanhope and Capt. Fitzpatrick of the Union army was announced. They had come to pay their respects and cultivate a friendly feeling between the associations representing the two contending arpart of the Confederate body was dropped and a scene of the wildest confusion occurred. The whole body rushed toward the representatives of the Union army and fairly bore one year free of charge, and a copy, one year, of any weekly newspaper or monthly magazine published in the United States, the publication Shouts of welcome filled the hall, and the to be selected by the person entitled to receive it visitors were nearly torn to pieces by the precipitate efforts to shake with them. Speeches were required of them as soon as order could be restored, and happy responses were made by Confederates. Theodore Hallam, an ex-Confederate officer, arose to say that for once the Yankees were outnumbered and

would submit to their captors unconditionally. This was the signal for the bringing in of refreshments, and the giving of the greeting in a still more cordial manner. Previous that the number returned by any person can to the entrance of the Union officers the Confederates had under consideration the presenting of a memorial to Mrs. Garfield. It was decided that the resolutions which were adopted by the association at the time of the late President's death, and really led to the formation of a permanent organization, should date, as after the expiration of that time, it will be previously framed and conveyed to Mrs. Garfield by a committee in person. These resolutions were widely published at the time of their adoption, and their spirit drew out most favorable comments in all parts of the country. The association is largely made up of ex-Confederate officers, who are now prominently connected with industries in Cincin-

The exhibition of horses is spoken of as having been very fine, and that of cattle better than heretofore, particularly those of fine breeds. There were also many fine hogs, and a considerable number and creditable display of sheep and goats. Guiteau says he does not object to this, although men who call themselves surgeons poke him about the ribs and arms to see if he is sound. One of these experts, Guiteau says, called himself Dr. Smith, and professed to be a surgeon, anxious to know if the prisoner's ribs were sound. Mr. Scoville, attornev for the accused, says he has no objection whatever to experts making examinations in behalf of the government. He wishes them to have a free course in their examination, as this will only help to establish the fact of the prisoner's insanity. The question for the court to consider is whether Guiteau was insane when he shot President Garfield. He says he can discern a decided difference in whiskers, and weighs 150 pounds.
