EVERY PORT GUARDED.

The United States Surrounded by a Quarantine Cordon

against the Cholers-Strict Enforcement of Regulations Laid Down by the Government-Increase of Cases at Hamburg-More Hope. ful at New York.

WASHINGTON, Sept. 3.—The United States is surrounded to-day as if with Chinese wall by a quarantine cordon sgainst the cholera. At every port on the Atlantic coast and all the principal ports on the Pacific coast and ports of entry along the Canadian border and Mexican frontier officials stand sentinel, guarding against the plague. All in-formation received at the treasury department is to the effect that the regulations have been strictly enforced by United States officers and state officials, who are working in hearty conjunction. No case of cholera exists in the United States so far as the treasury department is advised and, if its efforts avail, no case will be introduced. The work of sending out the circular agreed upon at the conference with the president was carried on until every official of the government had been advised of his duty in the premises.

The state department telegraphed the circular to American ministers abroad, who in turn notified the United States consuls. Customs officials, inspectors and medical officers were communicated with direct from the treasury department. The foreign mail office took a hand in the measure for protection and Superintendent Brooks ordered the fumigation of mails from all European and Asiatic ports. Assistant Secretary Spaulding was very busy yesterday an swering innumerable inquiries as to the cholera circular. He said that an ocean steamer arriving now with both immigrants and cabin passengers on board would be detained twenty days at quarantine. The immigrants would be kept on the vessel for twenty days, but the cabin passengers, in the discretion of the health officials, would be permitted to land in a reasonable time.

Among inquiries received by telegraph was the following from the New

York Shipping Company:
"Is the report establishing twenty days' quarantine against all cholera-infected ports correct? And does London come under this order? Will freight boats be quarantined when they have

only cabin passengers?"
Secretary Foster replied to this as follows: "Vessels not carrying immigrants will not necessarily be detained twenty days at Quarantine, but they will be held from all foreign ports long enough to assure officials that there is no danger of their introducing cholera." In answer to another inquiry this reply was sent: "Any port at which cholera has appeared is an infected port."

HAMBURG, Sept. 3.—In the churches services of prayer for the abatement of the plague were held Friday. They were attended by crowds which filled the buildings. Hardly a woman in colors or a man without the black badge of mourning on his arm was to be seen and the prayers were offered amid the sobbing and groaning of the congrega-tions. The desolation of the city is now apparent as at no other time since the introduction of the pest.

The number of fresh cases Friday was 33, an increase of 52 since Thursday; the number of deaths 201, a decrease of 46. The decrease in deaths offers little comfort, however, as the increase in the number of fresh cases will be followed undoubtedly by a longer death list to-day. Nevertheless there is a general feeling that the pest has been at its worst. The panic is not over as the authorities would have the people outside of the city believe. Fewer persons left the city yesterday than on previous days of the week only because most men who could get away had already left with their families. The city in fact has been virtually depopu-

iated of all persons of wealth or leisure. The number of burials Friday was 315, or two more than Thursday. Hundreds of bodies are unburied. The dead wagons are utterly unequal to the work of carrying the bodies of all the vic-tims to decent burial. Unless some improvement be made at once in the system the authorities will find themselves obliged to give up individual interment and bury bodies by the score in trenches. Only immediate action can prevent several hospitals from becoming breed-ing houses of disease.

QUARANTINE, S. I., Sept. 3 .- Health Officer Jenkins was more hopeful yesterday than he has been any time since the steamer Moravia arrived here with her story of postilence and death. The fact that no new cases had developed among the passengers on the vessel gave the quarantine officials reason to hope that they had the plague well in hand. They hope that the scourge has been effectually checked. DETROIT, Mich., Sept. 3.—At the meet-

ing of the common council last night a resolution was adopted giving the board of health and the health officer absolute power in the matter of taking pre-cantions toward keeping out the chol-era. It is feared that the disease may come in over the Canadian border and the greatest care will be taken to pre-

New York, Sept. 3.—The two cases at 96 Orchard street, reported by Dr. Beck as virulent cholerine, have been thoroughly investigated by the health officers, who after a most careful diagnosis report that there is no cholera there.

The Lake Superior Disaster. SAULT STE. MARIE, Mich., Sept. S .- A dispatch from life saving station No. 19 reports the finding of several bodies, washed ashore from the wreck of the steamer Western Reserve. Henry Stew-art, the wheelman, the only man who reached the shore alive, will be detained here for several days to identify
the bodies. The only additional fact
obtained from him yesterday was that
the Western Reserve went down with
her engines using. As the crew pulled
away in the boat they could see her
putting and plunging in the waves until
she sank out of sight.

NEW YORK IN PERIL

From the Chotera Plague - Three More Vessels From Hamburg Arrive at Quar-actine - Deuths From Cholera During

New York, Sept. 5.—The steamship Normannia arrived Saturday morning from Hamburg and reported five deaths as sea from cholera. There are now three cases of cholera in the ship's hos-

Officials of the Hamburg Packet Company say that four deaths occurred among the first class passengers on the steamer Rugia from Hamburg. The passengers were named Bertha and Carl Honig and R. and C. Steer. On the steamship Normannia five deaths were reported from cholera. One of the deceased was a first class passenger named Jacob Heiman and one of them was a second class passenger named Carl

All the convalescent cases are very serious. Further deaths are expected. All three ships will be held indefinitely. All the sick and dead embarked at Ham-

The Rugia has been isolated as much as possible and everything will be done prevent the spread of the disease. Many of the steerage passengers were known to have come from infected districts. All the patien's have been isolated, and such patients as are able to be moved will be taken to the hospital as soon as possible. Meantime disin-fectants have been liberally used. After a thorough inspection the steamship Europe was allowed to proceed to her

QUARANTINE, Sept. 5.—On board the plague-stricken Hamburg-American line of steamships, the Normannia, Rugia and Moravia, there was much excitement yesterday, caused by the spread of the terrible disease—cholera. During the twenty-four hours ending at 3 p. m. there were three deaths on the Normannia: six new cases among the steerage passengers and two among the crew. Two of the Rugia's patients have died and the 3-year-old boy aboard the Moravia, who was stricken on Friday, has also been numbered among the dead. More deaths are expected, and if there ever existed any doubt that the disease aboard these vessels was not cholers, it has been dismissed now.

The foregoing facts show that the outlook is dark and all hands are preparing for a long siege. As to the probabilities of the disease getting into the country there need be no alarm if the present precautions are carried out. Sober thought, a careful observation of the directions to cleanliness and cheerful compliance with health and regulations will produce the result most desired at this critical time.

SHOCKING TRAGEDY.

Jealousy Causes a Man to Brutally Mur-der His Wife—He Shoots His Hired Man, Than Hangs Himself.

BINGHAMTON, N. Y., Sept. 5 .- A shocking tragedy occurred near Center Lisle, a small village in this county, Saturday afternoon. George Willis murdered his wife by shooting her. He is a farmer and with his wife and Wallace Oliver was drawing hay. All were on a loaded wagon in the hayfield, when without a word of warning Willis drew a revolver and shot his wife. He also fired a bul-let into one of the legs of Oliver. Mrs. Willis and Oliver fell from the load. Willis followed and gathering his wife in his arms placed the revolver against her head and sent a bullet crashing into her brain, killing her instantly. He then disappeared. Oliver's injuries are not serious. Willis was of a jealous disposition and the relations between him and his wife have not been of an amiable nature.

Willis' dead body was found yester-day morning hanging by the neck to a tree a short distance from where the shooting occurred. He had evidently committed suicide immediately after murdering his wife.

BURIED TREASURE.

lexican Priests Unearth 83,000,000 in Gold Which is Immediately Gobbled by President Diaz.

CITY OF MEXICO, Sept. 5 .- A few veeks ago a rumor became current here that a sister in Conception convent had discovered an old document which stated that \$3,000,000 in gold was buried at the time of the war with the French by the lady superior of the convent. The location of the treasure was given as house No. 5 of Progresse street, which was formerly a part of the convent. The work of excavating for the money was begun a few days ago by the workmen under the direction of the priests of the convent. The news of the affair reached President Diaz and he immediately or-dered the priests to suspend operations and the work was placed in charge of the government. The treasure was unearthed Friday and it will be turned into the general treasury,

AN ILLICIT STILL

Discovered Running in Full Blast in Clay County, Mo.—The Leader Captured by Government Officers.

KANSAS CITY, Sept. 5 .- After a search for several weeks United States officers have captured the first moonshiners, samp that has been found in this part of the state for twenty years. The camp was discovered Friday, about twenty miles north of this city in Clay county, and was fitted out with a capacity of twenty gallons per day. The camp was well hidden in the dense woods and the leader was captured at work operating the plant. The other members of the gang escaped. Jonas Reynolds, the leader, is a man of about 50 years of age and is a typical moon-

shiner in appearance. Mother and Daughter Held for Murden. VALPARAISO, Ind., Sept. 5.—Near San Pierre, a small town in Stark county, Nicholas Gerarty, an old German far-Nicholas Gerarty, an old German far-mer, had a misunderstanding with his wife. She left him and went to her married daughter, Mrs Charles Kerst-ing, who lives on an adjoining farm. Saturday Gerarty went over and tried to get his wife to go home with him but she refused to do so. Mrs. Kersting knocked the old man down with an ax-and the two women dragged him into and the two women dragged him into the front yard. Mrs. Gerarty then held him while her daughter stabbed him to death with a butcher knife. Both women are now in jail.
