## **NEW FROCKS ARE** TINT OF SUMMER

Organdies, Voiles, Taffeta and Light Weight Materials at Southern Resorts.

#### DRESSES OF TWO MATERIALS

Combinations Are Holding Their Own; Featured in Sports Clothes of Which the American Woman Is So Fond.

Under southern skies, at the southern resorts, is the place to see the new summer clothes worn, and wherever we go there, in search of fashion's inspiration, writes an authority on styles, we are greeted by organdles and volles, taffetas and summer silks -anything that is light in weight and transparent in texture. From the look

One of the New Sports Suits From Paris Has Cotton Poplin Skirt and Blue Serge Coat.

of the new, thin frocks one imagines that the old-fashioned style books have been combed and everything of a mediocre type discarded without further notice, for we are confronted with only the best, the most exquisite, the simplest and the most picturesque of designs. One sight of the clothes in a shop here and a wild desire seizes one to take the first train for the South in search of an opportunity to wear some of these lovely things.

It is necessary for us here to wear furs and woolen wrappings, but many are the fortunate ones who are migrating to a gentle clime, and they are buslly buying outfits directly the opposite of the heavier coverings. How refreshing it is to enter a shop and see displayed all those fresh and dainty garments while imagination supplies the necessary surrounding. There comes a picture of the southern sea with its beach dotted by colorful clothes all made according to the latest dictates of a fashion decree.

Dimities and organdles and printed muslins are the thin things for dressy occasions that have received the greatest amount of attention. And they are not only for the time being. They are setting a pace for our own summertime later on; any innovation now advanced is one that carries weight. for it may be the thing that will rule the fashions of our coming summertime. They cannot be ignored, these southern fashlons, Even if one is not among those who are to wear the newest things at once, still they hold their interest as an indication for dresses to come. Many are they, too, who take advantage of the chance to be beforehanded and have their summer things made up at this time of the year. Now there is the most varied choice of new cottons and silks. Later they will be picked over in the stores and not nearly so great a variety will be available. Now one can attend to fittings and designings without being prostrated by the heated blasts of late spring and summer days. One's mind works more freely and is more subject to the inspiration supplied by the fresh new things being displayed around every corner.

Materials Are Numerous. The materials allowed for smart summer frocks are as numerous as the days of the summertime. There is no hard and fast rule about what shall be worn and what shall be taboo. Indeed, if ever there was a chance for latitude it is right here and now, and the individual may choose her clothes according to her own likings and desires with never a fear that they will be running far afield.

Organdie is perhaps the favorite of all the thinner materials only because it is so very becoming to almost every type of womanhood and girlhood, and childhood, for that matter. A few years ago it started to rise in popular favor, and its growth in popularity has been a steadily increasing thing. The colors are what make it so extremely attractive, for they have reached the maximum of perfection. The shades are as scinthe fact that the thinness of the fabric helps to catch and reflect the light is something that is charming in itself. Nothing can set up competition with it. It is safe and sound and unassallable, right there on its own platform.

Some of the organdic frocks are made quite elaborately, while others are most simple and unpretentious in construction and workmanship. One of the more intricate models is made of a sort of maize colored organdle, trimmed with inserts of the same color and material made in the pip.

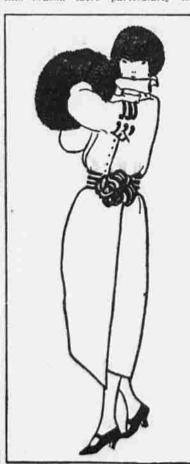

rnese snapes are oval, are inserted at intervals on the full skirt and are outlined in bands of lace insertion shaped to conform with the outlines of the oval motifs. The lace is cream colored and adds the only note of relief from the predominance of the maize color. Another organdie model has a skirt with narrower ruffles extending all the way and in close succession from the hem to the waist. A panel just in front is made of the organdle unadorned by ruffles, and there is a finely tucked vest, with a ort of an apology for an eton jacket. There is a velvet ribbon girdle of dark sage green, while the organdle in the gown is of that light and singing

The Dotted Swisses.

Then there are the dotted swissesdsters to the organdle family. They have dots of color and dots of the same shade as the foundation material, dots that are large and dots that are small, dots that are separated by many inches from each other and dots that are close together. Each new arrangement of the little dots gives a whole new appearance, and character to the fabric, and each new handling by a designer gives a new touch that makes the frock stand out as something quite exquisite and fresh among all the others. On the new summer frocks there are overskirts a-plenty. and there is one of jade dotted organdie made in a sort of princess line with side panels that are full and make an effect like an overskirt. The only trimming on this gown is an edging of maize organdie laid on in a we-inch double fold and outlining the dges of the overskirt, the neckline and the bell-shaped sleeves. It is an attractive color combination and a new idea in the use of a combination of dotted swiss and plain organdie.

A dimity frock is an indispensable part of any of the present summer wardrobes, for this fabric has been perfected in a most remarkable maner both as to dye and weave. It has a distinct character of its own. One of these in a bright pink crossbar is made with a full skirt that has tiny flutings of the frock's material running up either side from the hem to the waistline. It has a wide and rounded sash edged by the same sort of flutings, and the bodice is made quite snugly fitting, with the same little plaitings running about the edges of the neck and sleeves.

There are the sports clothes of which particular notice must be taken, because they do constitute so large a part of our dressing as a whole. They are the foundation of any outdoor outfit, and so great a variety is offered for their choice that it is almost necessary to know just which things are best and which are only nearly best. The sports suit of heavy or light homespun is always good, and this season more particularly than

Design for Navy Blue Coat Dress In Blue, Cleverly Embroidered With Touches of Red.

ever because so many smart women have adopted it as a part of their outfitting, whether for the city or the country.

One of the latest ideas in an informal outdoors suit has a skirt made of a French material that is a red pique weave with a plaid of black stripes making its pattern. It is a most effective piece of material and hangs into the folds of the skirt with the utmost ease and adaptability. Then the loosely fitting very dark blue serge jacket is a proper complement to the vividness of the skirt. This combination promises to be one of the popular ones for spring, for it is one of the most exclusive that has been chosen for exploitation at southern re-

#### **COWPEAS FIRST USED** AS FOOD FOR HUMANS

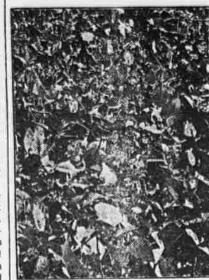

Earliest Published Record America Was in 1798.

Plant at Present Is Best Known and Extensively Grown Leguminous Crop in Southern States-Can Be Grown in North.

(Prepared by the United States Depart-ment of Agriculture)

The cowpea is undoubtedly a native of Central Africa. A wild plant differing little from the cultivated cowpea occurs throughout much of that continent. Hybrids of this wild plant and the cultivated cowpea are readily obtained. The cultivated cowpea consists of three main groups—the asparagus bean, the catjang, and the cowpea, each of which represents a group of varieties having much in common but connected through intermediate varieties. The cowpea is the most important of the three groups.

The large number and great diversity of cultivated varieties throughout Africa and over the southern half of

Asia and the adjacent islands as well the Mediterranean region of Europe indicate that the cowpea is of spelent cultivation for human food. It was early introduced in the Spanish sottlements in the West Indies and was grown in North Carolina in 1714, probably coming from the West Indies. Its culture in Virginia was reported about 1775 and no doubt was quite general in the United States early in the Nineteenth century.

Without doubt, the cowpea is the Phaseolus mentioned by the old Roman writers. In Italy the Blackeye cowpea is still called by the same name as the kidney bean, namely, "fagiolo," which is the Italian equivatent of Phaseolus. In East Africa both the wild and cultivated cowpeas are called "kunde," while in India, where the catjang is more extensively cultivated, the name "lubia," with many others is used. In America the cowpea was first known as "callivance" and later as "Indian pea," "southe: a pea." "southern field pea," and "cornfield pea." The first published record of the name cowpea was in 1798 and applied apparently to a single variety.

The cowpea at present is the best known and most extensively grown eguminous crop in the Southern states, but it can be grown profitably much farther north. Although it succeeds under a greater diversity of climatic, soil, and cultural conditions than most other legumes, the best results are obtained in forage, soil improvement, and seed production by a thorough understanding of the requirements and the best varieties of the crop.

## IN STARTING EARLY PLANTS

Box of Any Convenient Size May Be Used for Cabbage, Lettuce, Tomatoes and Pepper.

A hotbed is not necessary in starting early plants to be transplanted to the garden. Cabbage, lettuce. tomato, pepper and eggplant can be started in my convenient size of box, which may be placed in a warm room. Before being planted in the garden the seedlings should be hardened off by placing the box out in the open during the day and on nights when no frost s expected.

## ESSENTIAL FOR GOOD HEALTH

Fruits and Vegetables Play Important Part in Diet of Human Family-Grow a Variety.

People are coming to realize that fruits and vegetables play a very important part in the health of the human family. Some of the vegetables which do not have much food value are very important for maintaining health. A wide variety of fruits and vegetables should be grown in every home garden this year.

## BREAK BROODY TURKEY HENS

Confine Them in Slat-Bottomed Coop for Two or Three Days-Will Mate Soon Afterward.

Turkey hens can easily be broken of their broodiness by confining them for two or three days to a coop with a siat bottom. They will mate soon after being let out of the coop and begin laying in about a week.

Mail Carriers at Work.

In Japan the rural post-runner still swings his baskets across his shoulders precisely as his ancestors did centuries ago. In Formesa, also, the malls are carried to this day by a man on foot, who jogs along with a paper lantern and an umbrella. The postman of the Landes, in southwestern France, stride across the waste on gigantic stilts, their feet a fathom or more above the ground.

Dull safety resor blades—all makes perfectly sharpened. F. A. Morris' Drug Store.

## Weekly Marketgram U. S. Bureau of Markets

Washington,—The United States Bureau of Markets, for the week ended April 8, gives out the following information:

gives out the following information:

HAY.

Receipts light, little inquiry, prices steady. Chicago buyers show better interest in prairie hay. Receipts Cincinnati liberal: prices easing off; market moderately active at the decline; shipping inquiries few because of excellent pasturage in many sections. Poorer grades in light demand; better quality well taken. Markets generally in good condition to absorb increased offerings. Quoted: No. 1 timothy \$28 Memphis, \$24 Chicago, \$22 Cincinnati; No. 2 timothy \$20.50 Cincinnati, \$20.50 Chicago, \$22 Cincinnati, \$20.50 Chicago, \$24 Memphis; No. 1 alfalfa \$25.50 Memphis, \$30 Cincinnati; No. 1, prairie \$15.50 Minneapolia, \$14 Kansas City.

FEED.

No. 1, prairie \$15.50 Minneapolla, \$14 Kansas City.

All recent low levels for wheat feeds were shattered when bran broks to \$17 Minneapolls with other wheat feeds showing proportionate declines. All markets week and unsattled, demand unimproved. Offerings continue good; difficulty experienced in obtaining shipping instructions for wheat feeds. Transit stuff in liberal supply; seiling slightly lower than shipment offerings. Gluten feed steady; market narrow. Hominy feed declining in harmony with lower corn quotations. Linseed meal fairly firm, cottonseed meal weak. Southeastern markets very quiet, most prices unchanged but unsteady. Beet pulp easier, tendency downward. Quoted: \$6% cottonseed meal \$22 Memphis, bran \$17, middlings \$16 Minneapolis; iour middlings \$25, red dog \$30 Chicago; linseed meal \$40 Buffalo and Minneapolis; No. 1 alfalfa meal \$21 St. Louis, white and yellow hominy feed \$21.50 St. Louis; rye middlings \$15 Minneapolis, \$19 Chicago; dried brewers grains \$28 Milwaukee, \$23.50 Philadelphia.

DAIRY PRODUCTS.

No. 1 siralia meal \$21 St. Louis, white and yellow hominy feed \$21.50 St. Louis; rye middlings \$16 Minneapolis, \$19 Chicago; dried brewers' grains \$23 Milwaukee, \$23.50 Philadelphia.

DAIRY PRODUCTS.

Week opened with butter markets unsettled but considerable strength developed and markets have all shown gradual advancement, today's prices averaging three cents above week ago. Prices \$2 score: New York \$4\forallow{9}c\$, Chicago \$7cc. Philadelphia \$0\forallow{9}c\$, Boston 50c. Buyers caught with low stock when advances began.

Cheese markets weak and lower; prices at about low point in December. At Wisconsin primary markets: twins \$20\forallow{9}c\$; Daisles 21\cdot{1}c\$, Young Americas and Leughorns \$22\cdot{2}c\$.

FRUITS AND VEGETABLES.

Potato markets firm at northern shipping stations, closing \$5c-\$1.05. Chicago car lot market up 10c at \$1.0-120. New York round whites held at \$1.0-120. New York round whites held at \$1.0-120. New York round whites held at \$1.0-150. bulk. New York cold storage Baidwin apples down about 25c per barrel city wholesalo markets at \$4.75-5.75. Northwestern Extra Fancy Winesaps slightly weaker Chicago \$2.25-2.35 per box; steady Kansas City \$3.50-4.00.

Middlewestern yellow onlons slow and dull in city markets, \$0c-31 per 100 10s. Texas yellow Bermuda onlons, commercial pack mixed, Nos. 1 and 2, \$3.25-3.50 per standard crate New York. Louislana Klondike strawberries firm New York at 20c-25 per pint. Prices 25c per crate higher in middlewestern markets at \$4.00-6.75; sheep steady to 25c higher, April 20c-25 per pint. Prices 25c per crate higher in middlewestern markets at \$4.00-6.75; sheep steady to 25c higher, April 20c-25 per pint. Prices 15c per crate higher in middlewestern markets at \$4.00-6.75; sheep steady to 25c higher, April 20c-25 per junt crate.

Live STOCK AND MEATS.

Chicago prices; hors bulk of sales, \$8.75-9.76; medium good beef steers \$8.25-9.65; butcher cows and helfers \$5-9.55; foeder steers \$7.50-9.09; light and medium weight veal calves \$7.9-5.67; higher \$1.20.90; fe

#### Industrial Barometer

"The country is better off today than it was three months ago, and the business world is feeling its way with increasing confidence and with the conviction that the worst has passed," David F. Houston, secretary of agriculture and later secretary of the treasury in the Wilson administration, said in commenting on the second survey of national conditions just completed by the Fidelity & Deposit Co. of Baltimore.

More than 1,000 representatives of the company gathered the information contained in the survey from bankers, manufacturers, business men and others. The review was made in the same fashion as the first survey last September, answers being obtained to a questionnaire covering economic, agricultural, industrial and general conditions.

The survey reveals these principal conditions:

Raw materials are pientiful and trans-

Raw materials are plentiful and trans-Raw materials are pientiful and transportation good.

No marked industrial resumption has taken place.

No business failures of consequence have occurred since September.

The public is still on a "buying strike."
Wage reductions have been general.

The cost of living has appreciably decreased in all sections.

Building operations are increasing, except in New England and the Rocky Mountain states, though sentiment is generally reported unfavorable to building at present costs.

The credit situation is better.

present costs.

The credit situation is better.

The crop outlook is good. Nowhers, however, is there a noticeable back-to-the-farm movement from industrial ceners. Except in Massachusetts and New York, no strikes are reported.

The productivity of labor per man has increased.

Farmers in all sections of the country are still holding portions of last season's

Farmers in all sections of the country are still holding portions of last season's crops.

Retail prices have not been reduced in the same proportion as wholesale prices, all sections report.

"The country has successfully borne the strain caused by a most notable drop in prices, particularly of a vast volume of raw materials, and has weathered a trying period of liquidation," Mr. Houston commented.

"Confidence in business circles is slowly spreading, and the country is working back to a more stable condition. What the survey discloses should be an encouragement to us all to go forward with confidence, though not with recklessness.

"The public is still restricting its buying, but as retailers more generally reduce their prices consumers will come more heavily into the market, larger oriers will result and manufacturers can shar production schedules with reasonable issurance that prices will not fall lower.

"An appreciable reduction in wages is noted in every section and in virtually stry kind of industry. The fact that avings accounts move increased in industrial sections, however, would seem to indicate that in such districts wage and salary reductions in the prices of commodities and that, therefore, fortunately, the decrease in wages has not necessitated a lowering of the standard of living. "The housing shortage leads as the most important local question, with insamployment second and taxation third."

Indigestion and Constipation. "Prior to using Chamberlain's Tabets, I suffered dreadfully from indigestion. Nothing I ate agreed with me and I lost flesh and run down in health. Chamberlain's Tablets strengthened my digestion and cured me of constipation," writes Mrs. George Stroup, Solway, N. Y .- adv.

Investigation of the Bergdoll case will doubtless reveal the fact that he wasn't a poor man. Dull safety razor blades all makes erfectly sharpened. F. A. Morris'
