REPORTED FOR THE STATESMAN.

U. S. Senate - Special Session. Washington, March 7.—The Vice President laid before the Scuate a letter from Mr. Chase, resigning his seat as Senator from Ohio, and asking him to have the goodness to make this known to the Senate and the Governor of Ohio. On motion of Mr. Lane, a copy of the letter was ordered to be furnished to the Governor of

Mr. Wigfall said, that as Mr. Douglas yesterday had entered into a discussion of the meaning of Mr. Lincoln's Inaugural, it was proper that his (Mr. W.'s) construction of it should also be given to the country. It was impossible for an Administration dealing in generalities, whether glittering or not, to give peace to the country. It is a fact that seven States have withdrawn from the Union, entered into a compact, and formed a Government. Though the fact is not officially announced, the whole country knew that the representatives of the Southtry knew that the representatives of the South-

Moonix resigned his position as Treasurer of existence of their government, they are here to the Society, and Mr. John Mules, of the firm of Miller, Donaldson & Co., was elected to fill the vacant post, until the annual meeting of the Society in May next. A balance of \$804,96 was found to be remaining in the hands of Mr. Mooder, the late Treasurer. The Board appointed a Committee to make a settlement with him.

Settled, either by treaty or by the sword. It is casy to talk about enforcing the laws, and holding and occupying and possessing the forts; when you come to this, bayonets and not words must settle the question, and he could say that forts Pickens and Sumter cannot be held much longer. The present administration will soon be forced to construe the Inaugural. Forts Moultrie and Johnson and Castle Pinckney are in possession of the Confederate States, but the

other night, the only question is whether there shall be a decent, quiet funeral after the Protestant form, or an Irish wake. The Union is dead, and has to be buried. If you want a Protestant funeral you can have it; if not, you can have an irish wake.

Mr. Wigfall proceeded to speak of the difficulty of enforcing the revenue laws, adding that oles as to this will environ you all around.

tically.
Unfortunately, Mr. Lincoln will have but a brief period during which to decide the ques-tion. If he supposes the reinforcement of Fort Sumter will lead to peace, he can make the experiment. And as to recapturing Fort Moultrie, if he should not remove the troops from Fort Sumter, they will be removed for him.

The adoption of the Crittenden Compromise proposition might have adjusted the difficulties of the country but it only recalled proposition.

proposition might have adjusted the difficulties of the country, but it only received nineteen votes in the Senate. The Senater from Illinois, Mr. Douglas, had said that war cannot preserve the Union. The Union, however, is dissolved; seven Southern States have formed a Confederation, and to tell them, as the President has done, that their acts of accession are no more than pieces of blank paper, is an insult. He repeated, there is no Union left, the seceded States will never surely come back. They will not come back under any circumstances; they will not come back under any circumstances; they will not live under this Administration—with-draw your troops then; make no attempt to col-lect tribute, and enter into a treaty with these States. Do this and you will have peace. Send

your flag of thirty-four stars thither, and it will be fired into, and war will ensue. Will you divide the public property and make fair assessment of the public debt, or will you sit stupidly and idly, doing nothing, till there shall be a conflict of arms because you cannot compromise with traitors. Let the remaining States reform their governments, and if it la sceptable, the Southern Confederacy will enter into a treaty of peace and amity with them.—

Scrofula, or King's Evil is a constitutional disease, a corruptice of the blood he which this fluid becomes stitated, weak, and poor. Being in the circulation, it pervales the whole body, and may burst out in disease on any part of it. No organ is free from its attacke, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unbealthy food, impure air, fitth and filthy habits, the depreaang vices, and, above all, by the venercal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the infequities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, cruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous constitutions and the attacks of other diseases; consequently vast numbers perish by disorders which, although not scrofulous in their which which

stand the attacks of other diseases; consequently vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are serofulous; their persons are invaded by this hurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

Compound Extract of Sarsaparilla. the most effectual remedy which the medical skill of our times can devise for this everyskill of our times can devise for this everywhere prevailing and fatal malady. It is combined from the most active remedials that have
been discovered for the expurgation of this foul
disorder from the blood, and the rescue of the
system from its destructive consequences.
Hence it should be employed for the cure of
not only Scrofula, but also those other affections which arise from it, such as Emprive
and Skin Diseases, Sr. Antiony's Firs,
Rose, or Envsipelas, Poerles, Pustules,
BLOTCHES, BLAINS and BOILS, TURORS, TEXTER

The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

AYER'S

Ague Cure,

FOR THE SPEEDY CURE OF Intermittent Fever, or Fever and Ague, Remittent Fever, Chill Fever, Dumb Ague, Periodical Headache, or Blious Headache, and Billous Fevers, indeed for the whole class of diseases originat-ing in biliary derangement, enused by the Malaria of Miasmatic Countries.

We are enabled here to offer the community a remedy which, while it cures the above complaints with certainty, is still perfectly harmless in any quantity. Such a remedy is invaluable in districts where these afflicting disorders prevail. This "CURE" expels the minamatic poison of FEVER AND AGUE from the system, and prevents the development of the disease, if taken on the first approach of its premonitory symptoms. It is not only the best remedy ever yet discovered for this class of complaints, but also the cheapest. The large quantity we supply for a dollar brings it within the reach of every body; and in billous districts, where FRVEN AND AGUE prevails, every body should have it and use it freely both for cure and protection. A great superiority of this remedy over any

have it and use it freely both for cure and protection. A great superiority of this remedy over any other ever discovered for the speedy and certain cure of Intermittents is that it contains no Quining or mineral, consequently it produces no quinism or other injurious effects whatever upon the constitution. Those cured by it are left as healthy as if they had never had the disease.

Fever and Ague is not alone the consequence of the minesmatic poison. A great variety of disorders arise from its irritation, among which are Neuralyia, Rheumatism, Gont, Headache, Blindness, Toothache, Earnehe, Catarrh, Asthma, Paigitation, Painful Affection of the Spleen, Hysterics, Pain in the Bowels, Colic, Paralysis and Devangement of the Stomach, all of which, when originating in this cause, put on the intermittent type, or become periodical. This "CURE" expels the poison from the blood, and consequently cures them all alike. It is an invaluable protection to immigrants and persons travelling or temporarily residing in the malarious districts. If taken occasionally or daily while exposed to the infection, that will be excreted from the system, and cannot accumulate in sufficient quantity to ripen into disease. Hence it is even more valuable for protection than cure, and few will ever suffer from Intermittents if they avail themselves of the protection this remedy affords.
