

RENOWNED AS GREAT RULER

Roman Emperor, Trajan, Spread the Boundaries of the Empire and Governed Justly at Home.

The Roman emperor, Trajan, whose full name was Marcus Ulpius Trajanus, was born about the year 58 at Italica in Spain, which was then a Roman province. He was trained for a military career and gained distinction in the Parthian and German campaigns, and after holding two civil offices was adopted by the Emperor Nerva, whom he succeeded on the imperial throne in the year 98. The greater part of his time as emperor was spent in the field commanding his troops. His first campaign was carried on beyond the Danube against the Dacians, whom he conquered after a long struggle. In the conquered country he planted a Roman colony, and the descendants of those colonists are the Roumanians of today. Trajan's next war was carried on in the East. He made Armenia and Mesopotamia into Roman provinces, but suffered defeat at Ctesiphon, not far from Kut-el-Amara, where a British force was cut off and compelled to surrender during the World war. In his rear the Jews of Cyprus and Cyrene rose in revolt and made fearful massacres, and disorders also arose in the West. Trajan returned to the coast and took ship for Italy. His health was broken and while on the journey he died at Selinus in Cilicia, Asia Minor, in August, 117. Trajan found time to accomplish much in the internal improvement of the empire. He beautified Rome; he constructed canals, great military roads, and harbors, and built up towns. Law was enforced and justice fairly administered.

FISH MISTAKEN FOR VESSEL

Peculiar Appearance of Swordfish Gave Rise to Many Strange Stories Concerning It.

In the warm waters of the Indian ocean there lives a strange mariner, who is the cause of many tales among the natives of the near-by coasts. They tell of a wonderful sail often seen in the calm seasons, when not a breath disturbs the water, and the sea rises and falls like an immense sheet of glass. Suddenly a sail appears, apparently driven along by a mighty wind. This sail glistens with rich purple and golden hues. On it comes, quivering and sparkling as if covered with gems; then, suddenly, it disappears as quickly as it came! Many travelers have listened with unbelief to this strange tale, until, one day, this beautiful craft passed directly under the stern of a passing vessel, and it was seen to be a gigantic swordfish which is now known as the "sailor-fish." The sail was really an enormously developed dorsal fin, over 10 feet high, and richly colored with blue and iridescent tints. As the fish swam along near the surface of the water this great fin waved to and fro, so that from a distance it was easily mistaken for a sail.

Father of Three Kings.

Charles Bonaparte, father of the great Emperor Napoleon, was a humble lawyer, with no very extensive practice, in the sleepy little town of Ajaccio, in the Isle of Corsica. He seems to have been a most affectionate and exemplary parent, and as the father of three sons who became kings (Joseph, king of Naples and Spain; Louis, King of Holland, and Jerome, king of Westphalia), and a fourth who became the greatest military commander, monarch and king-maker of modern times, he holds an unique place in history.

There were thirteen children in the family, Napoleon being the second. Charles Bonaparte, although hardly well-to-do, strove to give his sons the best possible education, and had he not decided to send Napoleon (then aged ten) to the military school at Brienne, the whole course of the world's history might have been changed.

Word "Lot" of Puritan Origin.

The use of the word "lot" to designate a field or plot of land, is universal in the United States. It had its origin among the Puritans, and was the product of their strict adherence to Biblical customs.

Among the early settlers of New England the extensive salt-marshes from which the salt-hay was cut, were owned in common, every man helping himself to as much hay as he wished. As the population increased this condition could not prevail with general harmony, and it was agreed to divide the marshes equally among all the families. This was done by the Biblical fashion of lot and the portion which fell to each man was known as "his lot." In a short time the word came to apply to any piece of land, and finally reached the meaning of any great quantity.

Survival of Old Roman Custom.

The custom of appointing prominent citizens to act as a guard of honor at a great man's funeral is the survival of an ancient Roman custom. The name "pallbearers" also descends from the old days in the "City of the Seven Hills."

"Pall" comes from the Latin word "palla," the long sweeping robes worn only by priests and men and women of the highest standing. When a great personage died his "palla" was thrown over his coffin and a number of his distinguished friends were permitted to "bear the palla" to the grave and to act as guard of honor to the dead.

The Key.
The key to every man is his thought.—Emerson.

Two Toos.
The trouble with most of us is that our past is too near and our future too far away.

Circular Slide Rule.
A circular slide rule that can be curled in a coat pocket is the invention of a San Francisco man, a magnifying glass aiding in reading it.

Tell-Tale Traits.
You cannot rightly judge people by what others say about them, but you can by what they say about others.—Boston Transcript.

The Real Minimum.
After close observation we conclude that the minimum on which a family of five can live is the sum the provider happens to earn.—Mansfield News.

Weeping for a Year.
Widows and widowers who weep twice a day for a year, and who are allowed to eat only on each second day for a month, figure in the funeral ceremonies of the head-hunting natives of Borneo.

Frets Because She Fumes.
Some one in the "Periscope," gazing out over the sea of contemporaneous life as it were, observes that "There is nothing more pathetic than the spectacle of a sturdy boy scout begging his mother not to smoke."—Boston Transcript.

Jarrah Wood Defies Decay.
The jarrah of western Australia produces the most indestructible wood grown. It is impervious alike to insect attacks and to decay, and boats built of it do not need to be copper-sheathed.

Care of Machine.
Keep a small stiff brush on hand for cleaning the under work of the sewing machine. It is important that this part of the machine be clean if it is to run well, and going over it with a brush will not injure any of the mechanism.

Seven Wonders of New World.
The Seven Wonders of the New World is an appellation sometimes conferred upon the following group of natural objects in the United States: (1) Niagara Falls, (2) Yellowstone park, (3) Garden of the Gods, (4) Mammoth Cave, (5) Yosemite Valley, (6) Giant Trees of California, (7) Natural Bridge.

Elephants Rip Up Piles.
Wild elephants have caused considerable difficulty on the Island of Sumatra during oil development work, as these animals seem to have taken a special dislike to the pipe lines laid above ground through the jungles, and have repeatedly torn them up, so that gangs of men are kept busy repairing the damage.

Thackeray.
He faces posterity as a great figure of rich genius and honest purpose, a purpose occasionally obscured by the force of imagination and the irresistible promptings of humor; weighing mankind in a gloomy balance, but not without hope; and bequeathing to us rich and various treasures of literature, which may well survive, if anything survives.—Lord Rosebery.

The Weakest Finger.
The third finger on the left hand, on which the engagement and wedding rings are worn, is anatomically the weakest of the fingers. Pianists have to give the third finger twice as much drill as the others.

BACK GIVES OUT

Plenty of Hays Readers Have This Experience
You tax the kidneys—overwork them—They can't keep up the continual strain.

The back may give out—it may ache and pain; Urinary troubles may set in. Don't wait longer—take Doan's Kidney Pills.

Hays people tell you how they act. Mrs. J. P. Jones, Hays, says: "I have had attacks of backache and other symptoms of kidney trouble. At times when I stooped, my back ached awfully and twinges would shoot through the small of my back and shoulders. I would feel dizzy when I stooped and the irregular action of my kidneys annoyed me. I always used Doan's Kidney Pills for such attacks and the trouble would soon disappear."

60c. at all dealers. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

KEY OVERALLS
They'll "Hold" Him!
Dress your boy in Key Overalls—save his Sunday Clothes. Buy Key Overalls for real satisfaction. Boy-proof! We guarantee satisfaction or your money back—without argument.

No Annoying Delays, Either
MARKEL
HAYS, KANSAS

TODAY
Marks the beginning of the operation of our store on a **Strictly Cash Basis** as announced by quarter page advertisements in the last two issues of this paper.
Wholehearted approval of our announcement has greeted us from scores of our friends and customers, who, in common with us, acknowledge the benefits of doing business on a cash basis.
Substantial reduction of overhead expense will enable us from now on to sell the same quality goods at **Lower Prices to You**
We want to explain our policy to you, for we feel confident that you will readily recognize its real advantages.
Yours for better business methods,
Bellman & Illingworth

CHIROPRACTIC Saves Little Girls Life

ANANIAS MEDICAL ASININITY

A chorus of protesting hee-haws from a herd of baffled A. M. A. medicals at Waukegan, Illinois, makes sweetest music to drugless healers. Here are the facts. Little Miriam Rubin was afflicted with the precise opposite of sleeping sickness. She had talked incessantly for over two hundred hours and by reason of general nervous excitement and restlessness was rapidly approaching death's portals. Allopathic wizardry was stumped. Poison pumps and serum squirts "consulted" and doped in vain!
Dr. Paul Berger, a Chiropractor, was summoned, performed some spinal adjustments to the young girl's spinal malalignment and relief resulted. The "talking girl" ceased her incessant flow of words, restlessness decreased, sleep came, temperature fell and health's restoration began. News dispatches mentioned it, editorialists wrote of it, publicity's flood

poured upon it and Allopathy now begins to froth at the mouth o'er the cure it couldn't make! For once the daily press ceased its pander to the serum squirts and pus punchers and told the truth about their helpless bafflement and it certainly did hurt! Baffled Allopathic wizard Nesbitt—whose little patient's life was doubtless saved by Chiropractic skill—rushes into print to tell you that "no medical man, surgeon, physiologist, neurologist, psychologist, or psychiatrist of any analytical mind would for a moment think that any excited state of the speech center buried deep in a lobe of the brain could be quieted by any snap of the neck or thumbing of the spine." What difference does it make what all these nincompoops think or think they think? Whatever they thought or think they thought about little Miriam Rubin they thought wrong!
Baffled, stumped and helpless, with its patient almost at death's gates, Allopathic wizardry fails to "wiz" and

Chiropractic steps in and performs what seems almost miraculous. Whereupon poison pumpy serum squirts has a fit, falls into its mouth and tells you what did happen couldn't happen!
If some vandyked vivisectional poison pumper and serum squirts—torturer of helpless animals and poisoner of human beings—had "discovered" some new "serum," which couldn't cure anybody of anything except distention of the bank publicity wouldn't have been perfect all right wouldn't it? You know!
But when a Chiropractor steps in and saves a patient for baffled Allopathy and the feat is heralded far and wide why its equally all wrong isn't it? You know that too.
Why, some of these money hound poisondom would rather look at a day at a little mound in a cemetery than at a little child restored to health by drugless healing. You know that too.—Jim Jam Jems.

WHAT IS CHIROPRACTIC?

It is a scientific hand adjustment applied to any of the movable segments of the spine or to any other movable bone or tissue where nerves can be impinged.
Is Chiropractic only for chronic disease?
No indeed, it is equally as effective and more so in acute fevers, etc. Almost any trouble can be adjusted with great benefit. There is as much difference in the old way of Doctoring and CHIROPRACTIC as there is in oil lamps and Electric lights. An electrician is a man who understands the creation, transmission and expression of Electricity.
A CHIROPRACTOR is a man who understands the creation, transmission and expression of mental currents and nerve impulses over the nerves.
When you tell a Chiropractor your stomach room is dark, he knows just what button in the line shaft is wrong and he knows how to turn on that

button. When the button is in position the window is open, the current flows forward to the organ connected at the other end and the stomach lights up (function is restored) and you are well. All this takes time because those vertebrae become distorted and misshapen and it takes time to rebuild them to normal, this ought to make it clear to you why some get immediate results and others have to wait.
Can't you now see the effectiveness of the CHIROPRACTOR. He knows every room in your body, and he knows where each button is that turns on the current even though it be at some distance. God made these buttons for the electrical mechanic (the CHIROPRACTOR).
To Whom It May Concern:
I wish to say that our little girl was so bad with rheumatism that she did not walk for five weeks; continual medical aid seemed to have no effect

at all. I then decided to try CHIROPRACTIC adjustments and took her to Dr. Stuckey and am so glad to say that in only two weeks she began walking and now walks, runs, and plays with the other children. Her left limb was so badly drawn up that I feared it would always be so; but thanks to Chiropractic, and also Dr. Stuckey.
Mrs. G. A. Baggall, Hays, Kan.
I have taken the treatments for nervousness and know of nothing else that did me so much good. I am entirely well, and must say they are certainly all right.
Cornelia White.
As I am entirely well of Pneu-monia in just a few weeks, I no longer have more faith in Dr. Stuckey and also in Chiropractic. My eyes were also greatly improved.
Lydia Stebbins.
Many more Similar Letters can be had. Chiropractic gets at the Cause of Disease.

DR. J. E. STUCKEY, Hays, Kans
At Ellis Monday Wednesday and Friday Afternoons

"We're In Our Home"
Hays, Kansas, June 1st, 1922.
Dear Alice: I'm all tired out from moving,
Alice, but just as happy as I can be for we are actually in our home now and everything is straightened out so we can settle down and enjoy things. The Pershing Heights neighbors are so friendly and interested in each new family that joins them—I feel already as though I had lived here always.
One thing is such a relief,
The Bird Investment Company's head builder keeps coming around to see that everything is absolutely all right—you know they guarantee everything about these houses. Most real estate companies lose all interest in you just as soon as the sale is made but they feel a real pride in their houses and are determined to catch any slight imperfection that may show up and remedy it at once. We feel so "Looked after." I'll send you a picture soon showing just how it looks.
Affectionately,
MARY.
