L. W. Eldridge, one of the old-time residents of Fergus county and throughout that period a leader in the local republican ranks, says that politics take some mighty queer turns in these hurly-burly days of progressives, insurgents, stand-patters, etc. As an example, Mr. Eldridge was the Taft candidate for nomination as delegate to the county convention from his precinct, Upper Cottonwood, while his son, Harry, was the Roosevelt candidate. The returns showed a decisive victory for the son. Despite this fact, the old-timer does not appear to be greatly cast down and says that he has the satisfaction of having been licked by a mighty good man.

A GOOD STORY WILL BEAR REPEATING

The Mountain States Telephone and Telegraph Company has invested in property \$1.15 for every dollar worth of stock issued. It has no bonds, no interest charges, consequently, its rates are 11% less than its investment actually warrants. Had you ever thought of it in that light?

The only possible answer to lower rates is a reduction in operating costs. These are now as low as careful management will permit without injuring the quality of service. To give good service, good rates are essential. Good service and good rates go hand in hand, and are alike just to the public and to the corporation which has no water in its stock—which pays only honest, reasonable dividends. Safe, reasonable dividends are deserved by a corporation which has more actual property than stock issued.

Repeating, The Mountain States has \$1.15 invested for every dollar of capitalization. Arguing in a circle? Yes! But its a true circle.
