Read's Concentrated Syrup of Sarsaparilla.

THE subscriber now offers to the public, his preparation of Sarsaparilla, which has been much used at the East, though never heretofore offered for sale. It is not intended for cure of every disease, but as a grand renovator of the human system, and perfect remedy for such diseases as proceed from an unfree state of the blood or habits. It is intended for scrofulous affections, chronic rheumatism, diseased liver, general chronic disorders, syphilis, and is particularly efficacious in removing the effects of mercury from the system. The following recommendations will satisfy all of the great usefulness of the medicine. To those to whom Dr. Carroll is known, his name is quite sufficient.

ATTLEBORO', Mass. Dec. 25, 1845.

Read's Sarsaparilla has been of great service in this community, and numerous instances of radical cures might be named. It is particularly efficacious in Chronic diseases, and I know of nothing surer in removing the effects of mercury from the system. Though heretofore made only for private use, its virtue has become extensively known.

A. S. DRAPER

Being a friend privately and gratuitously benefitted by the above article, I can freely say that I agree with all that has been said by Mr. Draper, and am pleased to learn that the article is about to be offered publicly for sale, as the suffering community will be greatly assisted by it. D. C. CARROLL, M. D.

The above medicine is neatly put up, and sold, wholesale and retail, at the City Drug Store, by J. READ.

March 29, 1845,

MAHTEEN SYRUP.

THIS delicious preparation is now offered for the first time to the people of this Territory. Its great efficacy in relieving severe coughs has rendered it justly popular at the East. It can be given with perfect safety to the youngest children.

Interesting to Farmers and Others.

J. READ, formerly of the city of New York, informs Farmers and the public in general, that he is now prepared to dispose of the APPROVED PATENT REAPING MACHINES Or of rights for Counties, States or Territories, on reasonable terms. A small working machine may be seen now in Burlington—the same which was exhibited but a short time since in the Park at New York, in the presence of the Mayor and Committee of the American Institute, and at Washington, in the presence of the Hon. Henry L. Ellsworth, Commissioner of Patents and a large number of members of Congress and citizens—all of whom approved, and were entirely satisfied with its operation. Mr. Ellsworth pronounced it the best reaper he had ever seen. At the Fair of the American Institute in 1844, this machine took the premium, and the Medal then awarded is now in possession of the subscriber. Also a number of letters from members of Congress testifying to the quality of the Reapers, may be seen by calling on me.

The machine makes clean work—cutting every spear. The grain is raked off by a rake attached to the machine, and worked by a child, who rakes up the grain completely from the machine, and leaves it in bundles ready for binding.

An excellent opportunity is now offered to enterprising mechanics, who may wish to engage in manufacturing these machines. By purchasing a few counties they would realize a good business, simply by making and selling them. The subscriber will sell large or small districts to suit purchasers, and will take PART PAY in any good disposable property or notes.

For further particulars apply personally or by letter (post paid,) to the subscriber, at the City Drug Store. J. READ.

Important

To House-keepers, House-holders, and Mechanics generally.

The first China, Glass, Queens and Hardware Store in Iowa.

D. McINTIRE, importer of, and dealer in the above goods, has fixed on the city of Burlington for the transaction of mercantile business, and has just opened a well selected assortment of goods, which he offers for sale both by *Wholesale and Retail* at the St. Louis prices. Although he deems it unnecessary to go into particulars, yet he would say, that in this establishment will at all times be found every article in his line adapted to the wants of town and country. Retailers especially throughout the Territory will always find a *full Stock of common ware* to suit the wants of their customers in a new country. To the Mechanics of Burlington and neighboring towns he would just remark, that he will make it his constant care to be well supplied with *edge tools* of every description, and of the best manufacture. Orders from a distance thankfully received and carefully and promptly executed.

☞ The Iowa City Standard and Keosauqua Democrat will each publish the above to the amount of $5, and charge the advertiser.

New Leather Store.

THE subscriber is about opening, in Mr. Barger's large brick building on Front street, a few doors north of the Steamboat Hotel, a NEW LEATHER STORE, where he will at all times constantly keep on hand sole and upper leather, calf and morocco, lining, binding, shoemaker's findings &c. Also, shoemaker's kits and tools.

He will also exchange leather of all kinds for raw and dry hides, as he is about establishing a tannery in Burlington or its vicinity. Persons in the county having hides which they wish tanned can be accommodated by the subscriber on the most reasonable terms.

june 29 '44—tf. J. F. FIECHTNER.

Jewett's Patent Cary Plough.

THE subscriber would inform his friends and customers that he has now on hand a large supply of the above justly celebrated ploughs, this year's manufacture, and is therefore prepared to fill all orders at the shortest notice.

Within the past year I have added some valuable improvements to said plough. The mould board is 1 1-2 inches higher, and is fastened to the standard with bolts and screws, instead of rivets as formerly. It can therefore be easily taken off for repairs or any other purpose, at pleasure. The standard is also 2 inches higher, and cast with the same circle as the mouldboard until it enters the beam. This prevents all possibility of its choking, even in the most foul ground. The heel of the landside is also cast with a shoe, which will prevent its wearing so fast, thereby causing the plough to run less steady than when new.

To those who have used these ploughs, (and there are thousands of the best farmers in Va., ohio and Illinois who have,) not one word as to their performance need be said. To those who have not tested their superiority, over all other kinds now in use with us, and their perfect adaptation to our light, loamy soil, I will say, that you would promote your interests by giving them a trial. You will find them to work easy for your team, to do the work with great expedition and to do it well. The mouldboard being made of wrought iron, of a peculiar shape, and the entire share of steel, they scour brighter in all soils, which is the great desideratum in a plough for this section of country.
