Beware of slysters who are offering

shares in money paying allegations, especially strangers who travel abroad in the land to catch suckers. Money making institutions have no shares in their business to sell, but sharpers and schemers who want easy money will put up the old bluff of how much money can be saved and made by shares in their represented concerns. Experienced in the past has proven to many in this locality who have bitten on these schemes that they have lost the money invested. Order the strangers off your place when they call with their money-making propositions. If their projects would pay the money they claim, they would not be offered for sale at all.
