

# FARM STOCK

## SHEEP PROFITABLE ON FARM

More Can Well Be Maintained in Addition to Live Stock That Are Already Kept Thereon.

(By W. F. BAIRD.)

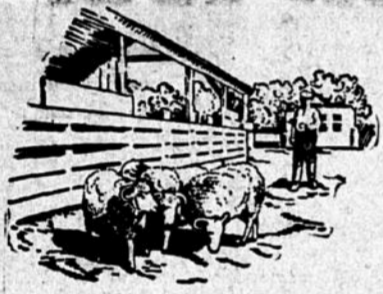

While it is not my purpose to try to induce stockmen to abandon cattle and pork production and engage exclusively in sheep raising, I do claim that from ten to one hundred more sheep could be profitably maintained on a very large portion of our farms.

Well-Bred Specimen.

In addition to the live stock that are already kept thereon. For a period of 23 years I have been engaged in general farming and stockraising where I now reside. I have been raising horses, cattle and hogs during this entire period, and for the last 16 years I have kept from 100 to 125 breeding ewes of the mutton type. I have endeavored to produce as good stock of all kinds as I could, and to keep them in the most profitable manner. I have found no other class of live stock more profitable in dollars and cents than the sheep. Aside from this fact, I find that I can now keep as much other stock as formerly in addition to the sheep.

Some of my fields produce twice as much grain as formerly, and my grass lands are much more productive than they were. There is no great mystery connected with the care of the farm stock, but there is more to do than to purchase a flock and turn them out to shift for themselves without proper attention and shelter, if one expects to add to his bank account. Costly barns are not a necessity, but some sort of a shed that will keep them dry is needed. Let your roofs be constructed of shingles, boards, iron or any material that will keep off cold rains, sleet, etc. I prefer a shed extending east and west, open or partly so on the south side, so arranged that it can be

Prize Mutton and Wool Sheep.

closed if bad storms occur. Give plenty of pure air, a dry place to lie down, and all the sunshine possible, thereby adding to the comfort and thrift of the flock and the profits of the owner.

## HARVEST CROPS WITH SWINE

Results Given of Experiment Conducted by Ohio Station—Best Gains Made on Clover.

In tests made by the Ohio station three lots of pigs were fed 30 days as follows: Lot 1, ear corn and clover pasture; lot 2, allowed to hog down rye, and lot 3, ear corn and clover pasture. In addition all lots were fed approximately one-fourth pound of tankage daily per pig. The respective lots made average daily gains of 0.82, 0.57 and 0.75 pounds per pig, and consumed, aside from pasture, 2.06, 6.34, and 2.91 pounds of feed per pound of gain. Lot 2 was then put in with lot 1 on clover and lot 3 remained on the rye, where the pigs were fed for 20 days. The pigs on clover made an average daily gain per pig of 0.75 pounds, consuming 3.64 pounds of feed aside from pasture per pound of gain, and the lot on clover, 0.87 pounds gain, consuming 3.16 pounds of feed per pound of gain.

## PEDIGREE OF DIRECT VALUE

Gives Record of Ancestors of Animals for Five or Six Generations—“Like Produces Like.”

The pedigree of an animal is a record of its ancestors, or family. The ordinary pedigree usually shows the ancestors for five or six generations. The value of the pedigree lies in the fundamental law of nature that “like produces like.”

## DON'T SELL BREEDING STOCK

Fancy Prices Offered for Brood Sow or Cow Should Not Tempt Farmer at This Time.

Don't let the temptation of high prices now being offered for live stock or undue fear of the prices asked for many popular breeds mislead you into selling a breeding cow or a brood sow that will drop the golden calf or litter.

## FARMERS WILL KEEP ACCOUNTS

Many Iowa Farmers Begin Cost Accounting Project in Co-Operation With Extension Men.

Farmers in all sections of Iowa have taken up the keeping of cost accounts on different farm enterprises under the supervision of county agents and farm management demonstrators from the extension department at Iowa State college.

This system of cost accounting has been developed for the farmer to help them increase their efficiency for war production. The system helps them to decide what and how much of each farm enterprise should be included in their farm business. It also helps them to increase the efficiency of farm labor. It is believed by officials in charge of the work that the results obtained will be of value in helping to settle the agitation regarding price fixing.

Corn, hogs and beef cattle are the branches of farming upon which the most accounts have been started. A considerable number of accounts have also been established by dairymen. Sheep, oats, wheat and sweet clover are other farming enterprises which have been chosen by farmers for their cost account projects.

## NEW KIND OF CANNING SCHOOL.

An innovation in methods of conducting canning schools has been devised by Miss Helen Burling, county home demonstration agent of Cerro Gordo county, with headquarters at Mason City.

Miss Burling has opened every public school in Mason City and has established canning schools, which are open from one to three afternoons a week. She has trained three to five women in each community to take charge of these schools each afternoon. The housewives in each neighborhood go to the school nearest them and bring their jars and material with them. Their canning is done at the school under the supervision of these women, who have been specially trained. In this way the canning demonstrations will reach practically every housewife in the country, as this system is being extended throughout the county.

## CONCRETE FLOOR SAVES FEED.

Successful hog feeders are nearly unanimous in advocating the use of concrete feeding floors, according to the observations of animal husbandry at Iowa State college. There is a great saving of feed, feeding is made easier and the hogs make greater gains. Sanitation is much improved, thereby reducing disease and making it easier to clean up the animals or marketable shape.

After the harvesting and threshing season is over there will be time for the farmer to put in this concrete floor. Such floors are easily made and are inexpensive in comparison with the saving they make. In building them it is well to have a foundation that will keep out the rats. With the scarcity of feed and the necessity for avoiding waste as far as possible, it is more than ever advisable for the farmer to have a good concrete feeding floor to conserve feed in his operations.

## MANURE RETURNS PLANT FOOD

About three-fourths of the nitrogen and phosphoric acid in the feeds consumed by animals is returned in the form of manure. The rest of the plant food in these feeds goes to build up animal tissue.

The amounts of the various plant foods found in farm manure vary considerably, depending upon the kind of animal, its age and the kind of feed consumed. Professor Van Slyke of the New York experiment station found that the manure produced in a year by a horse of 1,000 pounds live weight contained 128 pounds of nitrogen and 43 pounds phosphoric acid. The value of these constituents was computed at \$23.60. The cow produced, per 1,000 pounds live weight, 156 pounds nitrogen and 38 pounds phosphoric acid, with a value of \$29.60. For the pig the figures were 150 and 104, with a value of \$30.00, and for the sheep, 119 and 44, with a value of \$24.25.

From these figures it may be seen that cow and pig manure are the more valuable, if they are properly taken care of. This data should also make it clear to the reader that it pays to properly conserve manure.

## OTTUMWA DRIER SUCCEEDS

One of the most successful community driers in Iowa is located at Ottumwa. Its capacity is about 800 pounds of food material before drying per day. Any person in Wapello county can bring food to the caretaker and receive it after it is dried. A nominal charge is made to cover the cost of operation. The patronage has so far been excellent and the drier is running to capacity.

In connection with the subject of home drying, home economics extension workers at Iowa State college announce that now is the time to dry beans, greens of all kinds, peas, rhubarb, carrots and soup stock. These vegetables should be thoroughly washed before drying.

To cook dried vegetables after they have dried, it is first necessary to wash the dried material, then soak with three parts of water for one part vegetable for 12 hours or over night. They can then be allowed to simmer with seasoning for three hours in the same water in which they were soaked.

H. P. Saggau, proprietor of the Denison Auto company, received a consignment of Fordson tractors last week which are attracting considerable attention. Mr. Saggau tells us the tractor is a great success, and considered the best on the market. The machine will do the heaviest kind of plowing and is capable of traveling 15 miles an hour over good roads. All of the tractors were contracted for before they reached Denison.

The people who decided it was foolish to waste their valuable time in the garden are now complaining bitterly of the impossible prices asked for vegetables.

## HAULING FRENCH SHELLS TO THE FRONT

French artillerymen hauling shells to the Somme front in two-wheeled carts.

## WORTHY OF MORE MENTION

Brakeman Seldom Properly Appreciated in Life or Appropriately Honored in Death.

Following a railway accident recently, there was great relief in official circles when the report was made that only a brakeman had been killed. Only a brakeman! And there were hundreds of others waiting to fill his shoes.

Only a brakeman! His name was not given in the telegraphic report of the accident. He had not made a name to which the world would pay tribute. There were only a few friends who knew him in the railway Y. M. C. A. and a brother and sister in Russia. Home, family, friends he had left in the land of oppression to come to America, the country of opportunity.

Alone, ignorant, untrained in American ways, he was only a brakeman in the official report telling of his death. Only a brakeman! Yet it is such as he who are moving our freight, trucking the meat that supplies our tables, hauling the coal that heats our homes, bringing the milk with which we feed our babies. Standing on top of their freight cars, leaning against the wind, with the dust of the deserts in their faces, the roar of the engines in their ears, and the grime of the nations on their hands, wherever you find cars, engines, freight, soot, danger, there you will find the brakeman, tolling sleeplessly, hopefully, uncomplainingly, with death stalking ever at his side, to give us comforts and make our homes happy. Yet when the car couplers pinch him within their giant jaws or the wrecked train crushes out his life beside the railway track, the reports that the public reads record the death of only a brakeman.—Milwaukee Journal.

## COLD IN NORTHERN SIBERIA

Ninety Degrees Below Zero Is Record for the Whole World—Eighty Above in Summer Time.

Turn up your collar, thrust your hands to the bottom of your pockets, and read about the “cold pole” of northern Siberia, where the natives speak patronizingly about Greenland’s icy mountains and other such relatively balmy resorts. At the town of Verkhovsk, which would probably never have had any inhabitants if the late czar’s government had not sent occasional batches of exiles thither, says the Popular Science Monthly, the temperature has been known to drop to 90 degrees below zero, which is a “record” for the whole world.

While the regions about the north and south poles of the earth are cold all the time, the Siberian cold pole gives its inhabitants a comfortable let-up in summer, when the thermometer frequently climbs up into the 80’s above zero. During the brief summer season the life-giving rays of the sun, which remains about the horizon day and night for some time during the height of the season, exert an intense stimulating influence upon the vegetation, and the ground is covered with flowers.

## Played Too Slow Pieces.

Wienlawski had his humorous experiences—this even after he was quite widely known. On one occasion, relates Alexander Bloch in the New York Times, he was asked by a wealthy British nobleman to state his terms for playing a half-hour at his home. They came to an agreement, and on the evening of the musicale Wienlawski opened the program with Beethoven’s Romanze in F.

He was playing his best and deeply engrossed in the music when he suddenly noticed out of the corner of his eye the host nervously looking at his watch. This happened several times before the Romanze was finished.

At its close, as he was bowing his acknowledgments to rapturous applause, the British peer caught him by the sleeve and whispered in his ear:

“For heaven’s sake, man, how much do you expect to get through in half an hour at this rate? Why do you play such slow pieces?”

## Steady as a Rock.

Farmer Hays—That Jones boy that used to work for you wants me to give him a job. Is he steady?

Farmer Seeds—Well, if he was any steadier he’d be motionless.

## YIELDS “APPLE OF SODOM”

Curious Plant Which Grows on the Borders of the Dead Sea Produces This Fruit.

The Dead sea is situated in the southeast part of Palestine, and is called by the Arabs Bahr Loot, or Sea of Lot. It is about 47 miles long, with an average breadth of nine miles. Its depth varies considerably. It is fed by the Jordan from the north, and by many other streams, but has no apparent outlet, its superfluous water being supposed to be entirely carried off by the evaporation. The north shores of the sea are marked by the blackened trunks and branches of trees which are incrustured with salt, as is everything that is exposed to the spray of this sea.

On the southern shore is the remarkable mass of rock called Udsun (Sodom). It is a narrow, rugged ridge of hill extending five miles northwest, and consisting of rock salt. To the north of Udsun, and at no great distance, is the supposed site of the ancient Sodom.

On the borders of the Dead sea a curious plant grows which yields fruit called the “Apple of Sodom,” beautiful on the outside but bitter to the taste, and, when mature, filled with fiber and dust.

The mean level of the Dead sea is 1,292 feet below the level of the Mediterranean. The water contains from 24 to 26 per cent of salts, of which 7 per cent is common salt. A salt-water fish put into the Dead sea perishes at once. Owing to its density due to salt the water of the sea is very buoyant.

## YOUTH AT A DISADVANTAGE

Younger Men Are Ineffective in Obtaining Credit as Well as in the Control of Workmen.

Christian Girl, president of the Standard Parts company of Cleveland, O., says in the American Magazine: “When a man of noticeably youthful appearance goes to a cautious banker seeking to finance even the soundest kind of a proposition, his line of argument is discounted before he says a word, by his youthful looks. The banker is afraid of being carried away by mere boyish enthusiasm and is on his guard. If I were much under thirty-five and had a tip-top business scheme to finance, I would get an older man of established reliability and conservatism to present it for me to the bankers.

“Youth is not always so good, either. In the production end of a big business—handling a force of men and getting the work out of them. In the first place, the man who is bossing the job should have occupied all the lesser jobs between him and the bottom rung of the ladder. This requires time. And, furthermore, men do not like to work under a boss who looks too much like a mere boy, no matter how smart or capable or experienced he may be. It isn’t necessary that he be as old as most of them, but he should be old enough to give an impression of maturity. The average workman doesn’t care much whether the boss is thirty or forty, but it might make a difference whether he is thirty or only twenty.”

## Painter’s Frenzy.

The painter-engraver, Alexander Lunov, excelled in Oriental scenes. He had passed half his life in the hands of the Musselman. His works were full of light, full of color, full of movement. During his last illness, at Paris, where his elegant apartments looked out upon the quay, he was on his couch, burning up with fever. From time to time he threw a glance upon a beautiful Van Dyck. The picture was covered by a glass. Suddenly in the reflections of a glass of water he imagined that he saw in the sparkling light a dance of odalisques, such as in former days he had seen in Constantinople. He could not restrain himself. He leaped from his bed and, all trembling, he seized his palette, his brushes, and frantically set to work upon a marvelous sketch. His wife found him, nude save for a slight covering over his shoulders, his eyes sunken, his teeth chattering, painting with the fury of a madman. She led him back to his couch. He died a few days later, and the last picture of the great artist remained unfinished.

## MELON WILT CAUSING DAMAGE

Melon growers in certain parts of Iowa are much distressed at the present time because of the attacks upon their vines by the melon wilt. This disease, which attacks melons and cucumbers, can be told by the wilting of the leaders of the vines. The wilt starts at the tip of these leaders and gradually runs back to the main plant. After the disease becomes established the only treatment is to pull out or cut off the affected parts of the vines, say the truck crops men at Iowa State college. To prevent the wilt, it is necessary to keep the cucumber and melon beetles off the vines. Plant pathologists have proved that this insect transmits the melon wilt and it should therefore be destroyed in the spring and kept off in the summer with a repellent, such as Bordeaux mixture sprayed on the vines.

Growers whose vines have been affected are advised to clean up their melon ground this fall and destroy all beetles to reduce the chances of the disease appearing next year.

## FIND SUGAR SUBSTITUTES FOR BOTTLES.

Methods of reducing the consumption of sugar in soft drinks has been worked out by the bureau of chemistry, United States department of agriculture, which is now co-operating with the producers throughout the United States. The bureau has prepared directions for making soft drinks that include formulas that utilize substitute sweet materials such as corn sirup (ordinary glucose), corn sugar, maltose sirup, honey and high grade refined sirup. By following these directions, which are being distributed among bottlers, the actual sugar content in soft drinks can be cut to 50 per cent or less. A saving of approximately 50,000 tons of sugar annually is thus possible, it is estimated, and at the same time the customary taste and quality of the beverage can be preserved. It is estimated that there are 110,000 producers of soft drinks in the United States, employing 2,000,000 workers and having a total capitalization of \$250,000,000.

The many friends of the family of H. J. Cook, who resided in this county for so many years, will be interested to know of the marriage of their youngest daughter, Abbie. The Camp County Record, published at Gillette, Wyo., July 25th, has an extensive writeup of the wedding. It was conducted as a military wedding with an old union soldier as the minister. The groom was Frank M. Dannister, who has just been called to the colors and started for Ft. Riley, Kans., to serve his country a few days after the wedding. The bride is well remembered as a pleasing young lady and her Crawford county friends hope her husband has a fine military career and returns to Gillette in safety.

## WEST SIDE ITEMS

Chas. Martens went to Colorado on Wednesday to look after farm interests.

Mr. and Mrs. George Mumm, of LeRoy, Minn., came Wednesday. Mr. Mumm left with the Crawford county drafted men Friday.

Gus Bennings and sister, Mrs. Aug. Bornhoff, returned Wednesday from a week’s visit with relatives at Calamus.

J. B. Malloy and son, James, and T. J. Biernie went to Sac City Wednesday to see the races.

Miss Margaret Firth, of Wall Lake, is visiting at the Lake Evans home.

On Thursday morning when the West Side boys were to report at Denison they were accompanied by the band and a large number of citizens. Trucks decorated with flags were provided and a great number of people assembled on the street at 6 a. m. to bid them farewell and godspeed until their safe return.

Dewey and Grace Voss, Theresa Nickelsen, Mrs. A. W. Starek and Ruth Frost motored to Omaha Friday and returned Saturday.

Mr. and Mrs. Scott Campbell, of Boone, are visiting West Side relatives.

Louise Schomberg and family, of McLean, Neb., spent a few hours with friends here Saturday, being on their way to Camp Dodge to see their son, Fred, who is in training there.

John Holland, of Vail, transacted business here Saturday.

Born to Mr. and Mrs. Chas. Mielk on Saturday at the Carroll hospital, a daughter.

James McLaughlin, of Wall Lake, was in West Side on business Saturday.

John Moore returned Friday from

## A STITCH IN TIME.

Denison People Should Not Neglect Their Kidneys

No kidney ailment is unimportant. Don’t overlook the slightest backache or urinary irregularity. Nature may be warning you of approaching dropsy, gravel or Bright’s disease. Kidney disease is seldom fatal if treated time, but neglect may pave the way. Don’t neglect a lame or aching back another day. Don’t ignore dizzy spells, headaches, weariness or depression. If you feel you need kidney help begin using the reliable, time-tried remedy, Doan’s Kidney Pills. For 50 years Doan’s have been found effective. Endorsed by grateful people.

Mrs. R. T. Maynard, Woodbine, Iowa, says: “I have taken Doan’s Kidney Pills off and on for the past two years and they have done me more good than anything else I have ever used. Rheumatic pains were the worst trouble I had. My limbs were swollen, I had pains in my hands and joints and I ached all over. My back was so lame I couldn’t get around and my feet were so swollen I couldn’t stand up. I used Doan’s Kidney Pills and they helped me at once. The swellings went away; my kidneys became normal and my back got strong. Since then I have been better than before in years.”

Price 60c at all dealers. Don’t simply ask for a kidney remedy—get Doan’s Kidney Pills—the same that Mr. Maynard had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

## CLINTON, where he went to see his brother who was in the draft.

Mr. and Mrs. Faye Shoenjahn and children and Miss Irene Dolise spent Saturday and Sunday with relatives in Mapleton.

Pete Mumm went to LeRoy, Minn., Saturday to help his brother, Henry, during the harvest season.

Roy Moeller and Herman Pacholke came down from Ames Sunday to visit relatives, and friends.

Bart Mitchell, Chas. Schoenjahn and John and Hans Wilkens shipped cattle to Chicago Saturday, and Wm. Goetsch and Fred Stoffers shipped Monday.

Miss Hattie Voss and Miss Gertrude Yerovitch, of Des Moines, spent a few days at the Aug Voss home.

Walter Winters and John Strathman were passengers to Omaha Tuesday.

Mrs. Jack Hall and children arrived Monday for a visit at the H. J. Moeller home.

Misses Lucinda McHenry and Erma Chamberlain, of Dow City, spent several days here as the guests of Miss Verna Voss.

On Monday afternoon Mrs. Isaac Patterson pleasantly entertained a number of girls at a surprise party for Miss Gertrude Simpson. The surprise was indeed a success and was enjoyed by all. A delicious supper was served on the lawn. Out of town guests were Miss LaVere Smith, of Waterloo, and Misses Mabel and Nell Dugan, of Vail.

Misses Verna, Grace, Hattie, Evelyn and Dorothy Voss and Gertrude Yerovitch autographed to Dow City Sunday and spent the day at the McHenry home.

## DEFIANCE ITEMS

Wm. Young and relatives had a very pleasant family reunion Thursday in the Rudy Hulsebus grove one mile north of Defiance. Several relatives from a distance were present and the ages ranged from 72 years to four months, four generations being represented. Those attending were: Mrs. Sarah Young, of Pittsburg, Pa.; Mr. and Mrs. I. W. Alter, of Wawne, Neb.; Mr. and Mrs. J. J. Young, of Irwin; Mrs. Stockdale and Miss Kate Young, of Harlan; Ernest Hulsebus and family, of Buck Grove; Rudy Hulsebus and family, Miss Mayme Carroll and Mr. and Mrs. Wm. Young, Sr., of Defiance. Mrs. Sarah Young is an aunt of Mr. Young and Mrs. Alter, Mrs. Stockdale and Miss Kate Young are sisters.

Word was received here Saturday of the death of Charles A. Legge by drowning at Iowa Falls, his home. He was a resident of Defiance for a few years and his wife is the youngest daughter of Mr. and Mrs. O. F. Cox, who left Saturday evening to be with her. Later news states that Mr. Legge lost his life while attempting to rescue one of his Sunday school scholars, a ten year old boy, who stepped off a ledge in the Iowa river. Both were drowned. Mr. Legge leaves his wife and two small children.

Defiance had a new 60 foot flag pole with fine 6x10 foot flag. Subscriptions for it were secured by the Boy Scouts and the pole purchased for about fifty dollars, the usual price being \$100. It was raised on Main street Friday evening.

Miss Ida Hillis returned Monday from a week’s visit with Miss Ida Peterson in Harlan.

Mr. and Mrs. Ray Westbrook and daughter, Virginia, left Friday for a visit with relatives in Delmar before returning to their home in California.

## VAIL ITEMS

The dances given in the M. W. A. hall Wednesday and Saturday evenings of last week were both well attended and enjoyed.

Willie Gallagher and family motored to Buck Grove Sunday to visit relatives and be present at the six o’clock dinner given in honor of their cousin, Bernard Finnigan, who left Friday for Camp Gordon.

Clare and Lizzie Aylward were Sunday guests at their home from Denison.

A dance will be given in the M. W. A. hall Friday evening, August 3d. The Vail Jazz orchestra will furnish the music so you are assured of the latest and best in music. Everyone invited to have a good time.

A farewell party was given in honor of Vincent Launderville Wednesday evening at the Tom Meehan home south of town. Vincent left Friday with the boys for Camp Gordon and a number of his friends gathered to enjoy a good time before he left. The evening was spent in music and games. At a late hour the guests departed with wishes for a successful military career.

Quite a little excitement was caused at the J. J. Costello farm Tuesday when it was discovered that their Red touring car was on fire. The cause of the fire was a leaky gasoline pipe and it was thought for a time that the garage and house might not be saved, but the car was hauled out before anything else caught on fire.

The war savings stamp entertainment and play, “Mary and Belinda,” given at the Osterlund school house in Milford township was well attended and all were highly pleased with the entertainment.

The Red Cross work rooms will be closed all during the month of August but all persons having garments should try to hand them in as early as possible.

Mrs. Raymond Langan, of Clinton, visited here Saturday at the Dr. J. M. Glynn home.

Perry Ambrose, formerly a Vail boy, is now, according to the Register, the youngest American soldier now in France. Perry enlisted in the field artillery when but a boy of 14 years and has been until recently stationed at Deming, N. M.

Elise Shupitor was home over Sunday from Denison.

Dr. J. M. Young and wife left on Tuesday for a visit at the Henry Engebach home at Sanborn and at the J. H. Johnson home at Early.

Train No. 5 was about two hours late Tuesday morning owing to the fact that it was derailed near Arcadia.

Mrs. Ed Mitchell was a passenger to Omaha Tuesday.

Clark White and family were down from Denison Monday.
