

NEW NORTH-WEST.

BEER LODGE CITY, FRIDAY, SEPT. 17.

A French Story.

How a Frenchwoman Disposed of her Conscience—Two Husbands Sent Together to Eternity.

A Paris correspondent writes as follows: "Notwithstanding the political crisis at present hanging over the fate of France, the Parisians devote as much time as ever to the less important but more congenial matters of social life. Madame de B. is a lady on the sunny side of forty, rich, goodlooking and bonhomie. Her husband, some score of years her senior, was ordered six months ago to Algeria, where he holds an official position. Madame B., whose health did not permit her to accompany him, remained in her villa on the banks of the Seine; she continued to keep open house, gave balls and parties and appeared in no way grieved at the cruel separation from her dear lord obtained by the official fates. Things went on some time in the most irreplicable manner. At length, however, the solitude of single bliss began to weigh on the lady's mind and ended in a liaison with a dashing Lothario of 30 years. One morning she announced the decease of her husband, producing at the same time a forged certificate of death. The funeral services of the lamented deceased, who had been buried in Algeria, were scarcely over when the friends of the wife kindly received an letter de faire part announcing her marriage with the Lothario aforesaid. The honey-moon went off sweetly enough and the couple had entered on what the French had called la lune de miel, when the official fates band No. 2 received a letter from Algeria informing him that husband No. 1 was not dead and was en route to France. Madame B.—thereupon decided to dispose of the obvious old man in a summary way, and hired a ruffian to kill him. The ruffian had entered the house. Everything went off as well as a play. The old man arrived from Algeria, alighted at his country villa, and was going up stairs to his wife's room, when he suddenly fell a croak and expired down dead. The only thing now was to get rid of the body before the authorities could hear of the affair. Husband No. 2 was called into service, and in obedience to the fascinating entreaties of his guilty paramour, took the body to the river, and threw it into the water, but unfortunately fell in himself and was drowned, neither of the bodies ever being discovered. It now turns out that Madame B.—had sewn the sack containing the body of husband No. 1 to the coat of husband No. 2, and thus killed two birds with the same stone. The villain who stabbed M. De B.—gave himself into custody a few days ago and confessed all; but the lady is supposed to be in the back woods of America with another adventurer."

It is remarkable and sad to contemplate how few of the eminent discoverers and conquerors of the New World died in peace. Columbus went to his grave broken-hearted; Roland and Boadilla were drowned; Ovando was harshly succeeded; La Cosa sought refuge in a cow; Orellana died in extreme poverty; Enlico was deposed by his own men; Nicuesa perished miserably by the cruelty of his party; Vasco Nunez was disgracefully beheaded; La Salle, "who delighted marvellously in adventures," was brought to a sad and untimely end by one of his lawless followers, who murdered him in a dreary Texas wilderness; Navarez was imprisoned in a tropical dungeon, and afterward died of hardship; Cortez was dishonored; Alvarado was murdered in an ambush; Almagro was garroted; Pizarro was murdered, and his four brothers cut off; and there was no end of the assassinations and executions of the secondary chiefs among the energetic Spaniards and Portuguese. In the case of the latter, the most notable was that of Juan Ponce de Leon, who on the morning of the 30th of June, 1783, "with a joy that cannot be expressed," discovered the Mississippi river, died alone on the banks of Lake Michigan, and was buried near the mouth of that river, which has ever since borne the faithful missionary's name.

For more than ten years past, scientific men of the world have told us that during the months of August and September, this year, the most wonderful comet the world has ever known would reappear. It would approach nearer the earth than any comet ever before; that either the comet or the planet wherewith we live would have to change its course, or a collision would be inevitable. This comet is several times larger than our earth. According to astronomers, it is the same one that preceded the wars of Greece, and was followed by a terrible contagion in Persia. Several years after it reappeared, and was preceded by a most terrible war with Rome, and ended the dead in the streets of the eternal city, until there were not enough living to bury the dead. This same comet is paying its respects to our sphere again. It may be seen by the naked eye on any night in the northern part of the heavens at from eleven to twelve o'clock, and from that time till daylight. It will grow brighter and brighter as it approaches the earth.—Rocky Mountain Herald.

Isn't you ashamed, Goldrick, for to trifle so with our feelings?

INDIA MOONSHINE.—Mr. Coffin, in his record, "Our New Way Round the World," thus writes of its effects on a man within the tropics. He is in India: "The moon at its full, pouring its rays from the zenith straight down upon us, with a power that is almost unbearable, and that of the sun at mid-day. There is no heat in its rays, but they have great effect upon the brain. The blood rushes to the head, and there is a sense of fullness and pressure, which, although not attended by acute pain, is exceedingly unpleasant. It is difficult to keep our umbrellas spread, and it is as well to do so at mid-day. It is dangerous to sleep in the moonlight in the tropics. In this country we see new beauty in the words of the Psalmist, expressive of God's eye for those who love him: 'The sun shall not smite thee by day, nor the moon by night.'"

While Thad. Stevens was a young lawyer, he once had a case before a bad-tempered Judge of an obscure Pennsylvania court. Under what he considered a very gross insult it was decided against him; whereupon he threw down his books and picked up his hat in a high state of indignation, and was about to leave the court room, scattering impressions all around him. The Judge straightened himself to his full height, assumed an air of offended majesty, and asked Thad. if he meant to "express his contempt for this court?" Thad. turned to him very deferentially, made a respectful bow, and replied, in respectful answer: "No, your honor, I do not mean to do that. I am only trying to express my honor," adding, as he turned to leave, "but I find it a—hard to do it."

THE MILKY WAY.—Eighteen million stars furnish the light for the milky way, which is the grandest feature of our heavens. How far scattered these stars may be we know not, but they are so scattered that they are not seen as a mass, but as a thin, light, traveling with its incredible speed, it is seen in streaking the earth. One astronomer said he had gone back in the milky way, to see how weakly it glowed. He found it to be a mass of light. Whether the telescope has allowed the human eye to gaze in a more or less, the fact stands that the bounds of creation are so immeasurable as their eternal Creator.

Business Fortune.

A Young Milliner Falls Head to Hindon Million Dollars.

From the Dispatch, (New), Denmark. A few years since a young Englishman residing in this country formed the acquaintance of a young lady in the town of Fort Edwards, New York, by the name of Ellen Gray, a young woman who earned her daily bread by pursuing the vocation of a village milliner and dressmaker. Like many others this acquaintance ripened into love, and subsequently they became engaged. He resided in England, whither he repaired, and after a short time became the fortunate possessor of immense wealth by the death of a blood relation. Corresponding regularly with his fair betrothed living across the briny sea, he expected to return at a certain day and make her his wife. He died about two years ago, before consummating his wishes, leaving his immense wealth to the Fort Edwards milliner. The will was contested, but his validity was fully established, and certain messages bearing the seal of old England, have been transmitted through the English Consul to the young lady, informing her that there awaits her order in one of the English banks a small parcel containing over nineteen millions dollars. As a proof of the correctness of the above we are reliably informed that Miss Gray has left England, accompanied by the English Consul, and other friends, to receive this snug little fortune.

And now, young men, in the words of Cromwell, when about to invade Ireland, as he stood upon the deck of his vessel, and pointed to the western hills: "Young men, there's a prize worth striving for."

Traveling One Hundred Years Ago. The advertisement, of which we here give a literal copy, is deserving of preservation on account of the quaintness of the language, the peculiarity of the spelling and diction, and the quaintness of the passenger list, and the general idea which it gives us of the way in which traveling was performed in America at the time it was issued.

PHILADELPHIA STAGE WAGON, and New York STAGE BOAT performs their Stages twice a Week. John Butler, with his wagon, sets out Mondays from his house, at the Sign of the Death of the Fox, in Strawberry alley, and drives the same day to Trenton Ferry, where Francis Holman meets him, and proceeds on Tuesday to Brunswick, and the passengers and goods being shifted into the wagon of Isaac Fitzrandolph, he takes them to the New Hiasing Star to Jacob Fitzrandolph, the same day, when Mr. Fitzrandolph, with a boat well suited, will receive them, and take them to New York that night. John Butler returning to Philadelphia on Tuesday with the passengers and goods delivered to him by Francis Holman, will again set out for Trenton Ferry on Thursday, and Francis Holman, &c., will carry his passengers and goods, with the same expedition as above, to New York. March 8, 1758.

DEATH OF A MODERN SAMSON.—John W. Russell died in Franklin county, Kentucky, recently, aged seventy-five years. The Louisville Courier-Journal says: "He was famous among western pioneers for his courage and intrepidity. He served in the war of 1812, was a member of the State Senate, and an intimate, personal and partisan friend of Henry Clay. He was for many years a Mississippi steamboat captain. The incidents of his life and career, who were of command would fill a volume. On one occasion in New Orleans he had a personal encounter with the pirate Lafitte, and, unarmed, whipped him and ejected him from a ball room."

"On another, while landed at Natchez, a passenger of his boat was robbed by the gang which then infested the portion of the town bordering on the river, and known as 'Natchez under the Hill.' By surrounding with his crew the house in which the robbers took refuge, he passed a cable around it, and under threat of pulling it, with the inmates, into the river, he compelled restitution of the money, and made himself a terror to the thieves and gamblers who then infested the river town. Of his great strength persons who knew him only in his later years, when enfeebled by age, would have had but little conception, though when in his prime it was known from Pittsburgh to New Orleans, he had lifted a she-wolf weighing 1,647 pounds, and that he had carried entirely across the deck of the boat an anchor of 1,243 pounds weight."

The Future of America. The New York Evening Post presents the following interesting figures: The United States have an area of 3,375,000 square miles, or 3,150,170,000 acres, nearly an acre for every dollar of the national debt. The population in 1890 was 51,448,321. It was then computed by the Census Bureau that the mean annual increase of population is three per cent, and the United States would probably contain: 52,225,000 in 1891 population of 53,000,000 in 1892 population of 53,785,000 in 1893 population of 54,570,000 in 1894 population of 55,355,000 in 1895 population of 56,140,000 in 1896 population of 56,925,000 in 1897 population of 57,710,000 in 1898 population of 58,495,000 in 1899 population of 59,280,000 in 1900 population of 60,065,000 in 1901 population of 60,850,000 in 1902 population of 61,635,000 in 1903 population of 62,420,000 in
