

# HANSON FILES SUIT FOR ATTORNEY FEE DAY CASE

ASKS \$75,000 FOR SERVICES IN RECOVERING ESTATE, VALUED AT \$150,000.

Yvonne Loretta Dean, formerly Yvonne Loretta Hanson, made defendant in an action filed last week in the district court by the late Eugene E. Day, Jr., who died in 1922.

The plaintiff, Yvonne Loretta Dean, is the widow of the late Eugene E. Day, Jr., who died in 1922. She is the plaintiff in the case. The defendant is the late Eugene E. Day, Jr., who died in 1922.

The plaintiff, Yvonne Loretta Dean, is the widow of the late Eugene E. Day, Jr., who died in 1922. She is the plaintiff in the case. The defendant is the late Eugene E. Day, Jr., who died in 1922.

**Death Ends Divorce Case.**

Plaintiff states that he devoted much time in preparing for the divorce trial, and that defendant's husband and the Day family entertained very bitter feelings toward the divorce case. In his capacity as attorney it became necessary for him to investigate the property rights of his client, which required much time. After completing preparation for the trial, the judge who was to hear the case on January 16, 1922, disqualified himself, and a month later, on February 11, 1922, E. R. Day died. By his will he left nothing to the widow and designated his brothers, Harry L. Day and Jerome J. Day, executors of the estate. From that time plaintiff says he gave much time to investigating property rights of plaintiff and became satisfied that her interest in the estate had a value of anywhere from one to two million dollars.

**Would Compromise Divorce.**

A short time before the death of Mr. Day plaintiff alleges that his advice was sought by Agnes Loretta Day "concerning compromise and final settlement of said divorce, which had been submitted by E. R. Day and his family first for the sum of \$20,000, and thereafter for a sum approximately \$100,000, and upon plaintiff's advice the representatives of said deceased and his family were informed that Agnes Loretta Day would not settle for less than \$500,000."

Plaintiff states that he attended the hearing on proof of will, and later upon filing of voluminous inventory of the estate he gave much time in its examination and filed many exceptions on behalf of his client. In May, 1922, he alleges that he secured an allowance of \$1000 per month for his client dating from February 11, the date of death of her husband, and that prior to that time she had received only \$250 per month.

**Contested Power of Attorney.**

As further evidence of his services, Mr. Hanson states that he contested the power of attorney held by P. J. Maggy for E. R. Day, under which Mr. Maggy and John H. Wornum undertook to distribute the property of the deceased among his brothers, sisters, nephews and nieces, and instituted proceedings in court to prevent it; also that he contested the right of Mrs. Eleanor Day Boyce to the Reeves one-sixteenth interest in the Hercules mine. From the date of the death of Mr. Day until the summer of 1923, the plaintiff states that he devoted much time representing the interests of defendant, which involved attention to voluminous correspondence and required frequent trips to Portland, Spokane, Coeur d'Alene and other places.

**The Widow's Winnings.**

Coming down to net results, Mr. Hanson in his complaint states that the controversy over the estate was finally settled in May, 1923, and that under the terms of the settlement "defendant received the sum of \$1600 per month until the 6th day of August, 1923; \$100,000 in cash; an undivided 3-160 in the Hercules mine and all of the real and personal property of the Hercules Mining company, a partnership; 12,127 shares of the capital stock of the Hecla Mining company; 412,524 shares of the capital stock of the Tamarack & Custer Consolidated Mining company, all of the value of approximately not less than a million and a half dollars."

**Value of Services Reasonable.**

Finally in his complaint Mr. Hanson states that a reasonable value of his services is \$75,000, and adds that he has been paid no sum by defendant except an expense bill of \$900. Judgment is therefore asked for the sum of \$75,000, with interest from August 6, 1923, and for costs.

It makes a lot of difference to a man whether a girl smiles or laughs at him.

There are many things children would never think of doing if they weren't told not to.

# JACK WAITE STOCKHOLDERS WANT INFORMATION ABOUT AFFAIRS OF THE COMPANY.

For the announcement of an assessment to the stockholders of the Jack Waite Mining company, has been followed by expressions of dissatisfaction by many of the local stockholders. These are not directed at the assessment in itself, but rather to the persistent failure of the officers of the company to issue a financial statement and advise the stockholders of company affairs, why the assessment is levied and for what purpose funds of the company have been used in the past. Much ore has been shipped from time to time by the company and it is said that 15 or 16 cars were shipped last summer. One stockholder here who has been doing a little investigating, states that since 1917 he estimates that receipts from ore shipments and assessments amount to \$200,000, and yet the stockholders have not been favored with a financial statement or any information regarding the affairs of the company. A meeting of local Jack Waite stockholders will be held in the office of G. W. Walker Saturday evening at 8:00 o'clock to discuss the situation.

**Callahan Returns.**

Donald A. Callahan, vice president of the Callahan Zinc-Lead company, accompanied by Mrs. Callahan, returned last week from a protracted visit in the east. He spent much time visiting in his old home town, Galena, Ill.

# RICHARD DAXON PASSES AWAY ON SUNDAY NIGHT

DEVOTED MANY YEARS TO DEVELOPMENT OF TARBOX MINE.

Richard Daxon died at about 12:30 last Sunday night. Although it had been realized for some time that he was in failing health, he had been seen on the street within the past few days and he was planning on leaving for the east soon in connection with a mining enterprise in which he was interested. Under these circumstances the news of his death came as a distinct shock to his many friends. Mrs. Daxon was in Seattle, and Mr. Daxon, in anticipation of an extended absence, had rented his residence and the day preceding his death had removed to the home of Mrs. Thos. Jay, where he passed away. His brother, William Daxon, was with him when the end came. Mr. Daxon was very restless and unable to sleep, and complained of being too warm. Finally throwing the cover off he dropped off into what appeared to be restful sleep. In a little while his brother placing the covers over him found that in the brief period he had peacefully and painlessly passed away. Mrs. Daxon arrived from Seattle Tuesday. The funeral will take place Friday afternoon at 2:00 o'clock, the services being under the direction of the Fraternal Order of Eagles, of which Mr. Daxon was a life member. He was also a member of the Red Men, and that order will also participate in the services.

**Came to Coeur d'Alene in 1883.**

Mr. Daxon was a native of Illinois, having been born in Rock Island county July 7, 1859. At the age of 11 he moved with his family to Girard, Kas., and in 1879 went to Colorado and later to New Mexico. In 1883 he was in Montana, and with his brother, William, joined the stampede which followed the news of the gold discovery on Prichard creek, which marked the birth of the Coeur d'Alene mining district. He and his brother spent the winter of 1923 at Thompson Falls and in the spring of '84 went to Murray. Following the discovery of the lead deposits on the South Side, Mr. Daxon went to Mullan and assisted in laying out the original townsite. As the years passed he was engaged in business in Mullan and Wallace, but all the time giving much attention to prospecting. In 1887 Mr. Daxon and his brother became interested with E. J. Tarbox in a group of claims on Packer creek, three miles from Seltice, and in the early '90s a company was organized to take over and develop the property. This was the beginning of the Tarbox Mining company, of which Mr. Daxon became manager, a position he held until about a year ago. Under his management a large amount of development work was accomplished, much ore exposed, but financial difficulties and failing health prevented him from realizing his greatest ambition to place the Tarbox on a productive basis.

**Generous-Hearted Man.**

The news of the death of "Dick" Daxon was received with sincere expressions of regret by a host of friends who knew him from the early days and who knew from personal contact his generous and kindly disposition. He is best known in connection with his long struggle to make a mine of the Tarbox, and his was the pathetic fate that befalls so many in the mining districts of the west. He found "a grave at the end of the trail" before his dreams came true.

Mr. Daxon is survived by his wife; two brothers, William Daxon, of this city, and James F. Daxon, of Parsons, Kas.; two sisters, Mrs. Helen Marnell and Mrs. Belle Marnell, both of Girard, Kas.

**NOTICE OF ANNUAL MEETING.**

Office of the Silver Moon Mining Company, Limited, Wallace, Idaho, January 31, 1924.

Notice is hereby given that the annual meeting of the stockholders of Silver Moon Mining Company, Limited, will be held at the office of the company, to-wit: Steward's drug store, Wallace, Idaho, on Tuesday, the 19th day of February, 1924, at 1:00 o'clock p. m. of said day, for the purpose of electing a board of directors to serve for the ensuing year, and for the transaction of such other business as may legally come before the meeting.

H. C. LAMBACH, Vice President.  
GUS EHRENBURG, Secretary of the Silver Moon Mining Company, Limited. J31-F28-31

# NOTICE OF ASSESSMENT.

Office of the Imperial Mining Company, Wallace, Idaho, January 31, 1924.

Notice is hereby given that at a meeting of the board of directors of the Imperial Mining company, held on the 30th day of January, 1924, an assessment of two and one-half (2½) mills per share was levied upon the outstanding capital stock of the corporation, payable on or before the 29th day of February, 1924, to Homer G. Brown, secretary-treasurer of the corporation, at the office of the company, 710 Hotel street, Wallace, Idaho.

Any stock upon which this assessment remains unpaid on the 29th day of February, 1924, will be delinquent and advertised for sale at public auction, and unless payment is made before will be sold on the 29th day of March, 1924, at 7:30 p. m. of said day, at the office of the company, 710 Hotel street, Wallace, Idaho, to pay the delinquent assessment thereon, together with the costs of advertising and expenses of sale.

HOMER G. BROWN, Secretary-Treasurer of the Imperial Mining Company, 710 Hotel Street, Wallace, Idaho. J31-F28-41

**Rapid Progress Being Made in Crosscut from Idaho-Montana Tunnel.**

The bulletin issued monthly by the Richmond Consolidated Mining company has the following regarding the crosscut that is being run from the Montana-Idaho tunnel:

"Nearly two-thirds of the distance from the Montana-Idaho long tunnel to the Richmond vein has been covered. This indicates that the vein will be encountered on schedule time, early in April. This estimate makes allowances for any unforeseen delays of a minor nature, which might possibly hinder progress. The crosscut is now going forward at the rate of around 10 feet per day, or approximately 300 feet each month."

The total length of the crosscut will be 1606 feet, according to estimate and it will cut the Richmond vein at a depth of 1900 feet from the surface. The bulletin also contains a financial statement covering the period from July 2, 1923, to January 1, 1924. Receipts from two assessments and miscellaneous, \$33,914.24. Disbursements include mine labor, \$10,003.59; printing, advertising, reorganization expense, \$1140.36; payment on account old company debt, \$15,068.64; mine equipment, \$4840.61; cash on hand, \$1043.54.

# OLSON ELECTRICUTED.

**Meets Instant Death at Hecla Mill on Monday Morning.**

After starting the Hecla mill at Gen early Monday morning, the electric power suddenly failed and Ed Olson, shift boss, went out to locate the trouble. He discovered a post burning near the electric station, evidently caused by a short circuit. It is presumed that he attempted to extinguish the fire and in doing so came in contact with the main current carrying 60,000 volts. Mr. Olson was widely and favorably known in the district, having been employed in various mills for many years. He had been with the Hecla company for about two years, having been previously employed at the Hercules. He is survived by his wife.

# SUNSHINE.

**Shaft Being Sunk From the Main Tunnel Level.**

The wonderfully rich ore shoot above the main tunnel at the Sunshine is to be explored at further depth, with every indication that it will be found equally as rich and as large. The ore above was 14 feet wide, consisting of both galena and gray copper, both having a very high silver content. The shaft is now being sunk and at a depth of 100 feet a crosscut will be run to the vein. If the ore is found to be satisfactory the shaft will be continued another 100 feet and even deeper, hoisting facilities having been provided with that in view. The Sunshine was originally known as the Yankee Boy and has a record of large production of high grade silver ore.

# LEAD AND ZINC.

The Engineering and Mining Journal-Press of January 25 says, "Demand for lead continues excellent, though most of the business has been on a contract basis. The cable and battery business is active. Prices asked for spot lead continue considerably above the general market, as high as \$½ being currently reported, but these figures are almost entirely nominal. No weakness is yet apparent in the lead situation, despite high prices. The advance in London indicates that that market can not get along with part of its supply from Mexico diverted to this country, as has been the case recently. Production, too, seems to have been increased about as much as possible without important enlargements in mine and smelter capacity. On the other hand, no immediate scarcity of lead is apparent, for consumers are already pretty well taken care of for their requirements up to the end of February."

"Zinc has been in fair demand during the week at gradually increasing prices. Export business has been done, the local quotations being substantially on a parity with the London market. Galvanizers have been the chief buyers, though more interest is expected on the part of brass makers, now that copper buying is picking up."

Every married man knows what it like to be pressed for money. The chief delight in beauty is lost if there is none to share it.
